

剑桥雅思11 | 听力真题 Test 2 Section 3 | Biology Field Trip Report: Research at Rocky Bay

【剑桥雅思11 | 听力真题 Test 2 Section 3 | 海洋生物实地考察揭秘：岩石湾生态研究 | 生物多样性保护 | 学生科研实践】

Summary: Helen and Colin, two biology students, discuss their field trip report on Rocky Bay. They cover their research aims, equipment used, and methods for measuring wave speed and salt levels. The conversation includes challenges like map-making and identifying organisms, as well as findings on different coastal zones and organism adaptations. They also reflect on potential errors in their research.

摘要：海伦和科林两位生物系学生讨论了他们在岩石湾的实地考察报告。他们详细介绍了研究目标、使用设备以及测量波速和盐度的方法。对话涉及绘制地图和识别生物等挑战，以及对不同海岸带生物适应性的发现。他们还反思了研究中可能存在的误差。

🎧 Section 3 You will hear two biology students called Helen and Colin talking about the report they're writing on their recent field trip to a seaside area called Rocky Bay.

第3部分 你将听到两位名叫海伦和科林的生物系学生谈论他们正在撰写的关于最近去一个叫岩石湾的海滨地区实地考察的报告。

🎧 First, you have some time to look at questions 21 to 26.

首先，你有时看下一第21至26题。

▶ Now listen carefully and answer questions 21 to 21.

现在请仔细听并回答第21至21题。

▶ I've brought my notes on our biology field trip to Rocky Bay, Colin, so we can work on our report on the research we did together.

科林，我带来了我们去岩石湾生物实地考察的笔记，这样我们可以一起写研究报告。

 00:01:12

▶ OK, I've got mine too.

好的，我也带了。

▶ Let's look at the aims of the trip first.

我们先看看这次考察的目的吧。

▶ Right, what did you have?

好的，你写了什么？

▶ I just put something about getting experience of the different sorts of procedures used on a field trip, but we need something about what causes different organisms to choose particular habitats.

我只是写了一些关于获得实地考察中使用的各种程序的经验，但我们需要写一些关于是什么导致不同生物选择特定栖息地的内容。

▶ I agree, and something about finding out how to protect organisms in danger of dying out.

我同意，还需要写一些关于如何保护濒临灭绝的生物的内容。

 00:01:37

▶ In our aims, but we weren't really looking at that.

在我们的目标里，但我们并没有真正关注这一点。

▶ I suppose not.

我想也是。

▶ OK, now there's the list of equipment we all had to bring on the field trip.

好的，现在我们实地考察必须带的设备清单。

▶ What did they tell us to bring a ruler for?

他们让我们带尺子是做什么用的？

▶ It was something about measuring the slope of the shore, but of course we didn't need it because we were measuring wind direction and we'd brought the compass for that.

是用来测量海岸坡度的，但我们当然不需要它，因为我们测量的是风向，而且我们带了指南针。

 00:02:00

▶ But not the piece of string to hold up in the air.

但没有带用来举在空中的那根绳子。

▶ Didn't Mr Blake make a fuss about us leaving that behind?

布莱克先生不是因为我们没带那个而大惊小怪吗？

▶ Yeah, he does go on.

是啊，他确实唠叨了。

▶ Anyway, it was easy to get one from another of the students.

不过，从其他同学那里借一根很容易。

▶ Now, the next section is the procedure.

接下来是步骤部分。

▶ I sent you the draft of that.

我把那部分的草稿发给你了。

▶ Yeah, it was clear, but I don't think we need all these details of what time you left and what time you got back and how we divided up the different research tasks.

是的，很清楚，但我觉得我们不需要你几点离开、几点回来以及我们如何分配研究任务这些细节。

 00:02:30

▶ OK, I'll look at that again.

好的，我会再看一下。

▶ Then we have to describe our method of investigation in detail.

然后我们需要详细描述我们的调查方法。

▶ So let's begin with how we measured wave speed.

那我们从如何测量波速开始吧。

▶ I was surprised how straightforward that was.

我没想到那么简单。

▶ I'd expected us to have some sort of high-tech device, not just stand there and count the number of waves per minute.

我原以为我们会用某种高科技设备，而不是站在那里数每分钟的波浪数。

▶ Not very precise, but I suppose it was good enough.

不是很精确，但我想也够用了。

 00:02:56

▶ But the way we measured the amount of salt was interesting.

但我们测量盐量的方法很有趣。

▶ In the water from the rock pools?

是从岩石池的水里测的吗？

▶ Yeah, oh, I wanted to check the chemicals we used in the lab when we analysed those samples.

是的，哦，我想确认一下我们在实验室分析那些样本时用的化学品。

▶ Was it potassium chromate and silver nitrate?

是铬酸钾和硝酸银吗？

▶ That's right.

没错。

▶ OK, and we need the map of the sea shore.

好的，我们还需要海岸的地图。

▶ You just left that to me.

你把这个交给我了。

 00:03:17

▶ And I had to do it while the tide was low.

我必须在退潮时做。

▶ Well, that was OK, but the place I started it from was down on the beach.

嗯，还好，但我一开始是从海滩上开始的。

▶ Then I realised I should have gone up higher to get better visibility, so I had to start all over again.

然后我意识到我应该站得更高以获得更好的视野，所以不得不重新开始。

▶ But at least I got the squared paper, or I'd have had problems drawing it all to scale.

但至少我有方格纸，否则按比例画会有问题。

▶ Yeah, it looks good.

是的，看起来不错。

 00:03:38

▶ We could get a map of the region off the internet and see if we need to make any changes.

我们可以从网上找一张该地区的地图，看看是否需要修改。

▶ Hmm, I had a look, but I couldn't find anything.

嗯，我看了一下，但没找到。

▶ But you took some pictures, didn't you?

但你拍了一些照片，对吧？

▶ Yeah, I'll email you them if you want.

是的，如果你需要，我可以发给你。

▶ OK, I'll make my amendments using those.

好的，我会用那些照片修改。

▶ Then I can scan it into our report.

然后我可以把它扫描进我们的报告。

▶ Great.

太好了。

▶ Before you hear the rest of the discussion, you have some time to look at questions 27 to 30.

在听剩下的讨论之前，你有时间看一下第27至30题。

 00:04:29

▶ Now listen and answer questions 27 to 30.

现在请听并回答第27至30题。

▶ Now when we get to our findings, I thought we could divide them up into the different zones we identified on the shore and the problems organisms face in each zone.

现在说到我们的发现，我认为可以按我们在海岸划分的不同区域以及每个区域中生物面临的问题来分类。

▶ So for the highest area...

所以对于最高区域.....

▶ Displash zone.

飞溅区。

▶ Yeah, we found mostly those tiny shellfish that have strong hard shells that act as protection.

是的，我们发现的主要是那些有坚硬外壳作为保护的小型贝类。

bilibili 00:04:57

▶ But not from other organisms that might eat them, predators.

但不是为了防止其他可能吃掉它们的生物，即捕食者。

▶ No, that's not the main danger for them, but the shells prevent them from drying out because they're in the open air for most of the time.

不，那不是它们的主要危险，外壳是为了防止它们干燥，因为它们大部分时间暴露在空气中。

▶ Right.

对。

▶ And since they're exposed, they need to be able to find some sort of shelter or cover themselves up so they don't get too hot.

而且因为它们暴露在外，它们需要能找到某种遮蔽物或把自己盖起来，以免太热。

bilibili 00:05:17

▶ Then in the middle and lower zones near the sea, we need to discuss the effects of wave action.

然后在靠近海的中低区域，我们需要讨论波浪的影响。

▶ Yes, and how organisms develop structures to prevent themselves from being swept away, or even destroyed by being smashed against the rocks.

是的，以及生物如何发展出结构来防止自己被冲走，甚至被海浪拍打在岩石上而毁灭。

▶ I haven't done anything on the geological changes.

我还没写地质变化的部分。

▶ I don't know what to put for that.

我不知道该写什么。

▶ No, we weren't concentrating on that.

是的，我们没有重点关注这个。

▶ Maybe we need to find some websites.

也许我们需要找一些网站。

▶ Good idea.

好主意。

▶ I've got election notes from Mr Blake's Geology course, but they're too general.

我有布莱克先生地质学课程的讲义，但内容太泛泛了。

▶ But we could ask him which books on our reading list might be most helpful.

但我们可以问他阅读清单上的哪些书可能最有帮助。

▶ Right.

好的。

▶ Okay.

好的。

▶ Now, I did a draft of the section of sources of possible error in our research, but I don't know if you agree.

现在，我写了一份关于我们研究中可能误差来源的草稿，但不知道你是否同意。

▶ For example, the size of the sample and whether it's big enough to make any general conclusions from, but I thought actually we did have quite a big sample.

例如样本的大小以及是否足以得出一般性结论，但我认为实际上我们的样本量相当大。

▶ We did.

确实。

▶ And our general method of observation seemed quite reliable, but we might not be all that accurate as far as the actual numbers go.

而且我们的总体观察方法似乎相当可靠，但在具体数字上可能没那么准确。

▶ Yeah, we might have missed some organisms if they were hiding under a rock, for example.

是的，比如如果有些生物藏在岩石下，我们可能会漏掉。

bilibili 00:06:28

▶ I wasn't sure about the way we described their habitats.

我不确定我们对它们栖息地的描述方式。

▶ I decided it was probably okay.

我觉得应该没问题。

▶ Yeah.

是的。

▶ And the descriptions we gave of the smaller organisms, they weren't very detailed, but they were adequate in this context.

而且我们对较小生物的描述不是很详细，但在这种情况下足够了。

▶ I'm not sure we identified all the species correctly though.

不过我不确定我们是否正确识别了所有物种。

▶ Okay.

好的。

▶ We'd better mention that.

我们最好提一下这一点。

▶ Now, how are we going to do that?

那我们要怎么写呢？

▶ That is the end of section three.

第3部分到此结束。

▶ You now have half a minute to check your answers.

现在你有半分钟时间检查答案。

▶ Now, turn to section four.

现在请翻到第4部分。
