The latest figures for migration to and from the UK have just been released by the Office for National Statistics.

英国国家统计局刚刚发布了最新的英国移民数据。

Well, they show that net migration to the UK is estimated to have halved from 860,000 in the year ending December 23 to 431,000 in the year ending December 2024.

数据显示，英国净移民人数从截至2023年12月的一年内的86万减半至截至2024年12月的一年内的43.1万。

Well, Robert Cuff is the BBC's head of statistics and he explained the significance of the drop having in one year down from near record levels in 2023 down to as you said around

430,000 last year is absolutely huge and it will probably be welcomed by the government who promised in their manifesto to bring migration down.

BBC统计主管罗伯特·卡夫指出，移民人数从2023年接近历史高位一年内骤降至约43万是巨大变化，政府可能乐见这一结果，因其承诺过减少移民。

But of course, many will point out at the same time that the wheels for these falls were set in motion a long time ago.

但许多人也会指出，这种下降趋势早在很久前就已启动。

[Back to Top](#)

 00:00:47

And you can really see that when you start to break into the figures of who's coming, who's going because remember this is a combination of the people who come to the UK to stay for a year which has fallen and the people who leave the UK uh for more than a year which has also risen.

分析具体数据可见，来英停留至少一年的人数减少，而离英超一年的人数增加，两者共同作用。

So that double whack if you want has contributed to this really really massive fall in in migration.

这种双重打击导致了移民人数的急剧下降。

 00:01:08

So just to be clear this is all legal migration.

So this covers everyone who's coming to the UK.

 00:01:32

But the biggest reason by a mile that people come to the UK is to study or to work.

但最主要的来英原因是学习和工作。

Those are the big drivers and we've seen big falls in those numbers last year.

这两大驱动因素去年均显著减少。
