 00:08:46

⏮ He didn't specify what those sanctions could look like, what shape they would take to what extent.

他并未#具体说明#这些制裁可能采取的形式、规模及程度。

⏮ But we did hear from the U.S. Treasury Secretary Scott Besinter a while back where he was speaking to NBC News' Meet the Press program when he said that they were prepared to increase more pressure on Russia, more economic pressure, which in fact if I could just quote, would drive the Russian economy towards a full collapse, and that would bring President Putin to the table.

但此前美国财政部长斯科特·贝辛特在接受NBC新闻《Meet the Press》节目采访时表示，他们准备对俄罗斯施加更大压力——更多经济压力，请允许我直接引用原话——这实际上将推动俄罗斯经济走向全面崩溃，从而迫使普京总统回到谈判桌。

⏮ Mr. Besinter also pointing out that President Trump and Vice President Vance had a very productive call for the European Union precedent,

 00:09:18

⏮ and that they are prepared to increase pressure, but the European partners must also follow them.

⏮ So it seems to be that given everything that we've seen over the last 24 hours play out in Kiev certainly has pushed Donald Trump to go ahead and consider this.

 00:09:41

⏮ But this is all very significant because this will be seen as a huge setback coming less than a month since that summit we saw in Alaska where President Trump and President Putin

而如今不到一个月，唐纳德·特朗普已在考虑对俄罗斯实施进一步制裁。

🎧 00:10:03

🎧 And there have been critics, critics of Donald Trump saying that simply secondary sanctions, that's, you know, as we're outlining their sanctions on other countries who are doing business with Russia should come in.

因此人们不得不提出一个合理疑问：那份获85名联署议员支持、拟对俄罗斯石油买家#征收#500%关税的参议院法案究竟如何了？

▶ It seems to have fallen by the wayside.

它似乎已被搁置。

bilibili 00:12:59

▶ One more thing here, you know, India has been slapped with sanctions for that very reason by Mr. Trump because it buys a lot of Russian oil.

昨天有1097人乘坐17艘船完成#横渡#。

bilibili 00:14:49

▶ That's an average of 65 people per boat.

平均每船65人。

▶ So we talk about small boats, but they've been getting bigger and bigger with more and more people dangerously packed onto them by the people smugglers who organize these journeys from northern France.

虽称小船，但组织从法国北部出发的走私者让越来越多人危险地#挤#上这些越来越大的船。

 00:16:20

⌂ And border security is going to be high on the agenda on that summit.

⌂ But we're hearing from the opposition conservatives, they say, a new home secretary hasn't made any difference to the numbers.

⌂ I think perhaps the big hope for the government and the new home secretary is closer to home and you returns agreement with the French authorities.

我认为，政府和新任内政大臣的主要希望或许更直接，在于与法国当局达成的（移民）返回协议。

 00:16:47

⌂ Now that means that the UK for the first time will be able to send back to France some migrants arriving in Dover on small boats.

这意味着英国将首次能够将一些乘坐小船抵达多佛尔的移民送回法国。

⌂ And in return the UK will accept some asylum seekers from France, the same number believed to have a legitimate claim to come to the UK.

作为回报，英国将接收一些来自法国的#庇护#寻求者，数量据信与那些有#合法#权利要求来英国的人相同。

⌂ We're expecting numbers initially as part of this exchange to be small but possibly the first migrants arriving in Dover will be deported later this month.

我们预计此次交换的初始人数会很少，但首批抵达多佛尔的移民可能在本月晚些时候被驱逐。

 00:17:12

▶ And the government hoping that could start acting as a deterrent because the numbers that we saw yesterday are going to be very worrying for ministers who promised to smash the gangs.

政府希望这能开始起到#威慑#作用，因为我们昨天看到的数字会让那些承诺打击犯罪团伙的部长们非常担忧。

▶ Thanks to Simon there.

感谢西蒙的报道。

▶ Now people right around the world have been enjoying a stunning spectacle tonight, a total lunar eclipse.

今晚，世界各地的人们都在欣赏一场令人惊叹的#奇观#——一次#月#全#食#。

bilibili 00:17:30

▶ It would turn the full moon red as it passes through the earth's shadow there, takes on that deep red hue creating a striking blood moon.

当满月穿过地球的阴影时，它会变成红色，呈现出深红的#色调#，形成引人注目的“血月”。

▶ The lunar eclipse is when the earth is positioned between the sun and the moon and the moon is in the darkest part of the earth shadow called the umbra.

#月#全#食#发生在地球位于太阳和月球之间，且月球处于地球阴影最暗部分（称为本影）的时候。

▶ And that's a total lunar eclipse.

这就是月全食。

bilibili 00:17:57

▶ Now the moon doesn't emit its own light so some may ask how can we see the moon at all then.

月球自身并不#发射#光线，所以有些人可能会问，那我们究竟怎么能看到月亮呢。

▶ Well the sun, the light from the sun, passes through the earth's atmosphere and it has to pass through such a long distance that some of the blue light which is the shorter

wavelength scatters more easily and filters out through our atmosphere.

嗯，太阳，来自太阳的光线，穿过地球大气层，它必须穿过很长的距离，以至于一些波长较短的蓝光更容易散射，并通过我们的大气层过滤掉。

⏮ And the longer red wavelength continues to push past the earth's atmosphere and refracts around it and then hits the moon's surface

而波长较长的红光则继续穿过地球大气层，在其周围折射，然后照射到月球表面，

 00:18:24

⏮ which is why it appears as a sort of reddish tinge as many of us saw on some beautiful pictures through this evening.

这就是为什么它呈现出一种#微红#的#色调#，正如我们许多人在今晚一些美丽的图片上看到的那样。

⏮ Yes, so it was quite a couple of hours and you could kind of see it from well it's about three quarters of the earth you could see it and it did look absolutely spectacular.

是的，整个过程持续了几个小时，大约地球上四分之三的地区都能看到，它看起来确实非常#壮观#。

⏮ Just talk us through the kind of symbolism that was the ancient history, the meaning behind the eclipse.

给我们讲讲月食在古代历史上的象征意义，其背后的含义。

 00:18:53

⏮ So around 85% of the globe's population managed to see this event so 6 billion people so it's no wonder in Asian times that they thought that it was such a sort of ominous event.

全球约85%的人口（即60亿人）设法看到了这一天象，难怪在亚洲古代，人们认为这是一种#不祥#之兆。

⏮ They had no idea about the science back then but of course we do now but in ancient editions the ink of people thought that the jaguar had eaten the moon which is why it turned blood red in color.

那时他们完全不懂其科学原理（当然我们现在懂了），但在古代，玛雅人认为美洲豹吃掉了月亮，所以月亮才变成了血红色。

▶ But nowadays some believe it's a sign of transformation and new beginnings but of course it's just a great way to get out and connect with nature and understand the mechanics of the solar system.

但#如今#，有些人认为这是#转变#和新开始的标志，当然，这只是一个走出户外、接触自然、了解太阳系#运行机制#的好方式。

bilibili 00:19:26

▶ A lot of star gazing type stuff you really need the equipment you need to be in the up high you know all that kind of stuff but this was really visible just taking outside as long as there's no cloud.

很多观星类的活动确实需要设备，需要到高处去，你知道所有这些，但月食只要没有云，在户外就能清楚地看到。

▶ Absolutely I mean parts of Asia were the best views of it they sought from the beginning to the end was 82 minutes long

绝对是的，亚洲部分地区观测效果最佳，他们观测到的全食阶段持续了82分钟，

▶ so really great spectacular event to see but yeah I mean in the UK you needed to be up on higher ground

所以确实是极其#壮观#的天象，不过在英国，你需要到地势较高的地方，

bilibili 00:19:52

▶ you needed to have clear skies but you don't need any fancy equipment which is the beauty of it

需要天空晴朗，但你不需要任何昂贵的设备，这就是它的美妙之处，

▶ and if you want to take a photo you just eat a little of your canvas exposure so yeah it's available to all.

如果你想拍照，只需稍微调整一下#画布#（构图）和#曝光#（设置）即可，所以是的，人人都可以参与。

▶ We were seeing some of these pictures like like they're on on screen now absolutely beautiful and I suppose part of the hope is that people out and about and they suddenly see it and learn a bit about it and then that's a chance to kind of hook people in hook people into your kind of world.

我们正在看一些这样的图片，就像现在屏幕上的这些，非常美丽。我想部分希望在于，人们在外出时突然看到它，并对其有所了解，然后就有机会吸引人们，吸引人们进入你们（天文爱好者）的世界。

bilibili 00:20:24

▶ Yeah absolutely it's a great chance to get people involved in interested in science and nature.

是的，绝对是的，这是一个让人们参与进来并对科学和自然产生兴趣的绝佳机会。

▶ If anyone was on luck enough and didn't see it this time when is it when is it happening again.

如果有人这次运气不够好没看到，那下一次是什么时候？

▶ So the next one is in August 2026 but it's only a partial one for us in the UK so yeah it's still going to be a good event to go down see.

下一次是在2026年8月，但在英国我们只能看到#偏#食，所以，是的，这仍然是一个值得去看的好天象。

bilibili 00:20:46
