

Astronauts Discuss Life and Research on the International Space Station

【NASA科普：NASA宇航员分享太空生活 20250916】

Summary: NASA astronauts aboard the International Space Station share their experiences adapting to microgravity and conducting groundbreaking research. They describe daily life, including two-hour exercise regimens to combat muscle atrophy and bone loss. The crew discusses ongoing scientific experiments focused on pharmaceutical development and human physiology. They also reflect on the challenges of space adaptation syndrome and the emotional significance of contributing to 25 years of continuous human presence in space. The dialogue highlights international collaboration and the future of long-duration missions to the Moon and Mars.

摘要：国际空间站上的NASA宇航员分享了他们在微重力环境下的适应经历和突破性研究。他们描述了每日生活，包括为防止肌肉萎缩和骨质流失而进行的两小时健身训练。机组人员讨论了专注于药物开发和人体生理学的科学实验，并反思了空间适应综合症的挑战以及参与空间站25年持续载人飞行任务的意义。对话凸显了国际合作的重要性以及未来前往月球和火星长期任务的展望。

GRE生词

bilibili 00:00:00

▶ Station, this is Houston.

这里是休斯顿呼叫空间站。

▶ Are you ready for the event?

你们准备好进行活动了吗？

▶ Houston, this is Station, we are ready.

休斯顿，这里是空间站，我们已准备就绪。

▶ David Salazar with the Fast Company Innovation Festival.

我是来自《快公司》#创新#节的大卫·萨拉查。

▶ This is Mission Control, Houston.

这里是休斯顿任务控制中心。

▶ Please give Station a call for a voice check.

请呼叫空间站进行语音检查。

▶ Station, this is David Salazar.

空间站，我是大卫·萨拉查。

▶ How do you do?

你们好吗？

 00:00:24

▶ We've got you loud and clear.

你们的信号清晰洪亮。

▶ Great to have you with us.

很高兴能与你们连线。

▶ I think you can hear me, but now I can hear you for some reason.

我想你们能听到我，但现在不知为何我能听到你们了。

▶ We've got you loud and clear.

我们接收到的信号非常清晰。

▶ Come check again from ISS.

请国际空间站再次检查语音。

▶ Welcome aboard.

欢迎#登站#。

▶ Amazing.

太不可思议了。

▶ Good morning.

早上好。

 00:00:47

▶ Thanks for being here.

感谢你们的参与。

▶ I'm happy to be here.

我很高兴来到这里。

▶ Thank you.

谢谢。

▶ The left is John Kim and on the right is Zeeland Carmen.

左边是约翰·金，右边是齐兰·卡门。

▶ They are both ISS first time.

他们都是首次来到国际空间站。

▶ I would love to start with what's it been like being up there?

我想先问问在太空中的体验如何？

▶ What was the first sort of adaptations you had to make?

最初需要适应哪些方面？

▶ Are you used to it at this point?

现在是否已经适应了？

 00:01:18

▶ Yes, first of all, it's a dream come true to be here.

是的，首先，能来到这里真是梦想成真。

▶ It takes years of preparation, a lot of teams of instructors and classmates teaching us and preparing us on the ground.

我们经过多年准备，众多指导老师和同学在地面培训我们。

▶ It's such an honor to finally be up here carrying out this mission that we spent so long dreaming about and preparing for.

能最终在这里执行我们长期梦想和准备的使命，是莫大的荣幸。

▶ It's been an extra special treat to be here with a classmate.

能与一位#同学#共同在此更显特别。

 00:01:47

▶ Johnny and I were hired at the same time.

约翰尼和我是同期入选的。

▶ It's really amazing to have a friend up here on this mission with me.

有朋友相伴执行任务实在美妙。

▶ Johnny, you've been up there for quite a while right now, right?

约翰尼，你在太空已停留颇久了吧？

▶ Is there anything that you have done up there that's been really exciting or that you're are you bored of anything at this point after six months in space?

这六个月间，有哪些特别兴奋的经历？或者是否对某些事物感到厌倦？

 00:02:16

▶ Board and now, you know, we do live in a pretty confined environment, but there's always there's always a beautiful view outside to watch and appreciate what we're looking at.

确实，我们生活在受限环境里，但窗外始终有壮丽景致可供观赏。

▶ As far as some of the most fair things I've been able to do has been participating in a lot of the science experiments, science experiments, including our own bodies and helping

ground researchers understand how our bodies change in response to microgravity.

最值得的经历是参与众多科学实验，包括以自身身体帮助地面研究人员了解微重力下的生理变化。

▶ But there have also been other experiments that have a lot more direct positive effects on people home at Earth and some of that is pharmaceuticals research.

但还有其他能直接惠及地球人类的实验，比如药物研究。

 00:02:54

▶ Trying to see how we can potentially develop any manufactured drugs that might be more potent and helpful to people on Earth.

尝试研发更#高效#且有益于人类的合成药物。

▶ Yeah, we're here with Ken from Redwire.

我们现场还有来自Redwire的#肯#。

▶ He told us about the pillbox experiments.

他刚向我们介绍了药盒实验。

▶ We'd love to hear about some of your research work and things you've done that have been sort of in the realm of research and how your background informs that as well.

想听听你们在科研领域的工作，以及你们的专业背景如何助力这些研究。

 00:03:22

▶ Yeah, we all come from different backgrounds.

我们背景各异。

▶ For me, I actually do have a scientific background.

我本人确有科学背景。

▶ Johnny has a medical background in addition to his operational experience.

约翰尼除#操作#经验外还有医学背景。

▶ It's been so interesting getting to use this platform of the International Space Station as a unique laboratory for doing research and development for things that we can't do on Earth.

将国际空间站作为独特实验室进行地球无法实现的研发非常有趣。

bilibili 00:03:47

▶ Of course, as astronauts, we're inherently interested in how do we make space flight safer, better, healthier, especially as we prepare to go farther afield and for longer durations.

作为宇航员，我们自然关注如何让太空飞行更安全、高效、健康——尤其为未来更远更久的航行做准备。

▶ So going to stay for a long time on the moon and eventually on to the surface of Mars, which are a thousand times farther away than the International Space Station is from Earth.

比如长期驻留月球并最终登陆火星——这些地方比国际空间站远上千倍。

▶ But here, because you can be weightless and just floating like this microphone here, you can grow really small crystals that would otherwise be affected by little things like touching the container that they're grown in or these larger scale messy buoyancy driven processes.

但在太空失重环境下，就像这个悬浮的麦克风，可培育微小晶体——这些晶体在地球会因接触容器或浮力干扰而受影响。

bilibili 00:04:32

▶ I used to be a geobiologist and so I am very familiar with these small-scale subtle processes like diffusion or like really small-scale kinetics and thermodynamics that are just messed up.

我曾是地球生物学家，非常熟悉扩散、微尺度动力学等易受干扰的精密过程。

▶ The signal is really hard to read when you've got advection, convection, moving around and changing the chemical signal.

当存在平流、对流干扰化学信号时，数据读取会非常困难。

▶ So it's a great place to develop tiny crystals that are useful for researchers just from a purely scientific standpoint, but also for pharmaceutical development and growing really big or really pure crystals.

因此这里是培育微型晶体的绝佳场所，不仅满足纯科学研究，更为药物研发提供高纯度大晶体。

 00:05:09

🎧 Can I ask about some of the other research that you're doing up there as well?

能否聊聊你们正在进行的其他研究？

🎧 I mean, the Farmer and Dees very excited is what we've talked about a lot, but what are some of the other areas of work and research that you're doing every day?

虽然法默和迪斯的实验令人兴奋，但你们日常还有哪些研究领域？

🎧 So Zena talked a lot about how her past experiences and interests as a microbiologist and how so much of what we see today is in that field and she mentioned I have a medical background and some of the research that we're doing on our own human bodies is really, really interesting.

齐兰刚提到她作为微生物学家的经历，以及当前该领域研究的重要性。我具有医学背景，我们对自身人体的研究极其有趣。

 00:05:43

🎧 You know, something as simple as collecting saliva throughout one's long-terrace mission to see from an immunology perspective of how our bodies change in response to that.

例如在长期任务中收集唾液，从免疫学角度观察身体变化。

🎧 Just last week I participated in a longitudinal study that involves many different countries around the world studying to see how our bodies change specifically for this experiment, how our basculature changes and how that might affect, say, our vision.

上周我刚参与一项跨国纵向研究，专门观察血管系统变化及其对视觉的影响。

🎧 There is a syndrome called Space Associate Neuroachialist Syndrome, which we have a better understanding than we did in the past.

我们称之为太空神经 ocular #综合征#，目前认知已比过去深入。

 00:06:23

▶ We don't quite fully understand it, but a lot of the research that we do here helps us understand how we develop it and how we might develop countermeasures against it, because if we certainly want to be successful as we go on very long-terrace missions to the moon and Mars, we have to make sure we completely understand what's going on and any kind of maladaptive features that happen in response to microgravity, we have a way to counteract it, just like we do for muscle atrophy and bone loss.

虽未完全破解其机制，但太空研究帮助我们制定应对策略。正如应对肌肉萎缩和骨质流失，我们必须全面了解微重力引发的适应不良反应，才能确保未来登月及火星任务的成功。

▶ Can you tell us a bit about the sort of measures you take to prevent muscle atrophy and bone loss in space?

能说说你们预防肌肉萎缩和骨质流失的措施吗？

▶ Yeah, one of the biggest most important things that we do is exercising every single day for two hours.

我们每天最重要的事就是进行两小时锻炼。

 00:07:08

▶ This includes a lot of cardio work, so we have basically a stationary bike.

包括大量心肺训练，我们配有#固定式#自行车。

▶ It doesn't have a seat because we don't need it, but a stationary bike.

因失重环境无需座椅，但仍是#固定式#自行车。

▶ And then we also have a treadmill with a harness and bungees that keep us coming down to the treadmill.

还有配备#束缚带#和弹力绳的跑步机保证我们踩踏在跑带上。

▶ When we're up here, weightless floating around our heart actually doesn't have to work very hard to pump and circulate the blood in our system.

在失重环境下，心脏无需费力泵血循环。

 00:07:31

▶ And so that's a really important part of maintaining our heart health as well as strength.

因此锻炼对维持心脏健康和体力至关重要。

▶ We also have a really great machine.

我们还有台很棒的专业设备。

▶ It's a resistive exercise machine called A-RED and we can dial up basically hydraulic load and then operate it like you would a barbell, but it's got that resistance instead of putting weighted plates on the end of a barbell.

名为"抗阻运动装置"的液压设备，可模拟杠铃训练但通过液压阻力而非配重片实现负荷。

bilibili 00:07:53

▶ And that loading is really, really important for keeping

这种负荷对抗击... (原文未完)

▶ Our bone mass as well as our muscle mass.

我们的骨量以及我们的肌肉量。

▶ A lot of the impacts that we experience as astronauts here are very similar to patients who are osteoporotic on the ground, aging populations, immunocompromised populations.

我们作为宇航员在这里经历的许多影响与地球上#骨质疏松#症患者、老龄化人群、免疫功能低下人群的情况非常相似。

▶ So it's important for us to keep up.

所以对我们来说，坚持锻炼是很重要的。

bilibili 00:08:12

▶ And then that also helps us study these processes and how we recover from them so that we can help those on home at home.

而这也有助于我们研究这些过程以及我们如何从中恢复，这样我们就能帮助地球上的人们。

▶ And I know it is both of your first time up there, so you haven't had the experience of going up going back to Earth yet.

我知道这是你们两位第一次进入太空，所以你们还没有返回地球的经历。

▶ What is sort of the anticipated reaction as a result of that besides, I guess maybe like dropping a lot of stuff because you expected to float.

除了这个，预期会有什么反应呢？我猜可能像是会因为以为东西会飘浮而掉很多东西。

bilibili 00:08:41

▶ Yeah, that's a funny thing you mentioned is getting used to microgravity.

是的，你提到适应#微重力#是件有趣的事。

▶ It's so much easier to lose things.

东西太容易丢了。

▶ I actually really appreciate gravity.

我其实非常感激#重力#。

▶ I think it'll be nice to set something down and know that it won't go anywhere if I turn my head.

我觉得能把东西放下，并且知道即使我转过头它也不会移动，这感觉会很好。

▶ But to answer your question, we have these organs inside of our ears, they're called the semicircular canals, and they have a really special fluid in them.

但要回答你的问题，我们耳朵里有这些器官，它们叫做半规管，里面有一种非常特殊的#液体#。

bilibili 00:09:05

▶ And we have sensors that detect the movement of this fluid, and that helps us understand acceleration.

我们有#传感器#可以#探测#这种#液体#的运动，这帮助我们理解#加速度#。

▶ And specifically when it comes to gravity, it gives us a sense of where the floor is or what gravity is doing.

具体到#重力#时，它让我们感知到地板在哪里或#重力#的作用方向。

▶ Space does not have that.

太空没有这个。

▶ In a microgravity environment, our canals are very confused.

在#微重力#环境中，我们的（半规）管会非常困惑。

▶ And so this mismatch of signals between what our organs are saying and what our brain is interpreting results in a really, really tough will for me.

因此，我们的器官所传达的信号与我们大脑所解读的信号之间的这种不匹配，会导致一段非常、非常艰难的适应期。

bilibili 00:09:36

▶ It manifests itself in motion sickness.

它表现为#运动病#（太空晕动症）。

▶ And it only takes a few days to get over.

而这只需要几天时间就能克服。

▶ Our brain are incredibly adaptive and neuroplastic.

我们的大脑具有极强的适应性和神经可塑性。

▶ But what comes up must come down.

但上去的终究要下来。

▶ And so when we return to Earth for a lot of people, it really affects people in different ways.

所以当我们返回地球时，对很多人来说，这真的会以不同的方式影响人们。

▶ It can also result in severe motion sickness.

它也可能导致严重的#运动病#。

bilibili 00:09:56

▶ And so we're going to keep ourselves hydrated.

所以我们会让自己保持水分。

▶ There are some pharmaceutical medications we can take to help combat that.

我们可以服用一些#药物#来帮助对抗这种情况。

▶ But I'm sure this amazing adventure we've been on, it makes it all worth it.

但我相信我们经历的这段奇妙冒险，让这一切都是值得的。

▶ Absolutely.

绝对值得。

▶ And once you are past the motion sickness of being in space and when you're not doing research or working out for two hours a day, where are some things that you do on station that keep you stimulated and not, I mean, it seems like it would be hard to be bored in space, but I'm sure it happens.

一旦你度过了太空中的运动病阶段，并且当你不在做研究或每天锻炼两小时的时候，空间站上你们会做些什么来保持兴奋而不...我的意思是，在太空里似乎很难感到无聊，但我相信这种情况还是会发生。

 00:10:30

▶ You are exactly right.

你说得完全正确。

▶ It's really hard to be bored here on the International Space Station.

在国际空间站上真的很难感到无聊。

▶ We've got each other for company for one.

首先，我们有彼此作伴。

▶ I think NASA does a really excellent job of selecting astronauts and our international partners do a great job of selecting astronauts and cosmonauts who are not only really technically proficient, but also great teammates.

我认为NASA在选拔宇航员方面做得非常出色，我们的国际伙伴在选拔宇航员和航天员方面也做得很好，他们不仅技术非常熟练，而且是伟大的队友。

▶ And so that makes the adventure a lot of fun.

因此，这让这次冒险充满了乐趣。

▶ We play games with each other after dinner, after our last evening meeting.

晚饭后，在我们最后一次晚间会议之后，我们会一起玩游戏。

▶ And of course, there's always the view out the window that will never get old.

当然，窗外的景色永远都不会让人厌倦。

▶ Okay, so this is a weird one.

好吧，这个问题有点怪。

▶ I was talking to Ken Mariel before this about this.

我之前和#肯#·马里埃尔聊过这个。

▶ I saw a tick-tock about a girl who does like scent stuff and she ordered the scent of space.

我看到一个#滴答#（TikTok）视频，讲的是一个喜欢#气味#相关东西的女孩，她订购了太空的#气味#。

▶ Can you tell us about what space smells like and why it's kind of weird?

你能告诉我们太空闻起来是什么味道，以及为什么它有点奇怪吗？

▶ So this is our first time here on the International Space Station.

所以这是我们第一次来到国际空间站。

▶ Johnny was on board earlier when they did a spacewalk, the previous expedition.

约翰尼在之前的#远征#队进行太空行走时就在站上。

▶ So he might have smelled this smell.

所以他可能闻到过这种味道。

▶ I have not yet from what I hear.

据我所知，我还没有闻到过。

▶ It's a little bit like burnt toasts, a little bit like ozone.

有点像烤焦的吐司，也有点像#臭氧#的味道。

 00:11:51

▶ Some of that is maybe the smell of space.

其中一些也许是太空本身的味道。

▶ Some of that is maybe just off-gassing of volatiles that are in the metal of the space station itself.

其中一些也许只是空间站金属材料中挥发性物质的脱气味道。

▶ Yeah, I think that's a really good description.

是的，我认为这个描述非常准确。

▶ The closest thing I'd say is it's smelling burnt in metal.

最接近的说法是，它闻起来像烧焦的金属味。

▶ It was like very metallic smell and very burnt.

是一种非常#金属#的气味，而且非常焦糊。

▶ And I think for the reasons you described maybe some volatiles coming off of the chemicals during the reprisharization.

我想原因正如你所描述的，也许是在再增压过程中一些化学物质释放出了挥发性气体。

 00:12:18

▶ Not entirely sure, but it was definitely a unique smell when you smelled for the first time ago.

不完全确定，但当你第一次闻到的时候，那绝对是一种独特的味道。

▶ I'm not going to forget that.

我不会忘记那种味道的。

▶ Awesome.

太棒了。

▶ So I was going to mention this earlier, but you're both up there.

所以我刚才想提这个，但你们两位都在上面。

▶ It's the 25th anniversary of continuous human presence in space.

这是人类持续在太空存在的25周年。

▶ For both of you, what does it feel like to be part of that legacy and helping drive innovation in space still, whether you're doing research on yourself or doing research on behalf of companies or NASA?

对你们两位来说，成为这一#遗产#的一部分，并且仍在帮助推动太空创新——无论你们是在对自己进行研究，还是代表公司或NASA进行研究——感觉如何？

 00:12:48

▶ How do you feel about being part of the legacy of space and space exploration?

成为太空和太空#探索##遗产#的一部分，你们有何感想？

▶ It's deeply humbling.

这令人深感谦卑。

▶ I think I speak for both of us when I say we wanted to be part of the NASA mission and human spaceflight specifically to be part of greater than an individual can do on our own.

我想我代表我们两人说，我们想成为NASA任务和载人航天飞行的一部分，特别是为了成为比个人单打独斗所能实现的更伟大事业的一部分。

▶ Whether that's 25 years of astronauts living on the space station or more importantly, all of the teams across the entire globe is taken to make this space station possible.

无论是宇航员在空间站上生活的25年，还是更重要的，是全世界所有团队的努力才使这个空间站成为可能。

bilibili 00:13:23

▶ It's just incredibly connecting, incredibly humbling to be part of that legacy.

能成为这一#遗产#的一部分，令人感到无比的联系感和无比的谦卑。

▶ All right.

好的。

▶ Do you have any questions?

你们有什么问题吗？

▶ Yes, question?

是的，有问题？

▶ Yeah, we have a question from Ariel.

是的，我们有一个来自阿里尔的问题。

▶ Hi, Johnny.

嗨，约翰尼。

▶ I just want to say it's great to see you again.

我只是想说很高兴再次见到你。

▶ We did a panel together in Boston ages ago.

我们很久以前在波士顿一起做过一次小组讨论。

bilibili 00:13:49

▶ Congratulations on both of you to both of you for your spaceflight mission.

祝贺你们两位的太空飞行任务。

▶ Which module are you in and can you tell the audience a little bit about the physical structure of how the station works and where you guys are particularly right now?

你们在哪个#模块#，能向观众简要介绍一下空间站的物理结构及其运作方式，以及你们现在具体在哪里吗？

▶ Hi, Ariel.

嗨，阿里尔。

▶ I actually remember that Boston visit.

我其实记得那次波士顿之行。

▶ I love Boston, so any chance I can visit is always a good one.

我喜欢波士顿，所以任何我能去拜访的机会总是很好的。

 00:14:13

▶ We're in the Japanese module.

我们在日本#实验舱#里。

▶ We call it the Gem, Japanese Experimental Module.

我们称它为#希望号#（JEM），日本#实验#舱。

▶ It's one of the biggest modules we have on the space station.

它是我们空间站上最大的舱段之一。

▶ As far as its location, if you think about the space station, it's the most forward with respect to the direction we're moving and port.

至于它的位置，如果你想象一下空间站，它在我们的前进方向上是靠前的，并且位于左侧（左舷）。

▶ So forward and port.

所以是前向和左舷。

 00:14:31

▶ This thing right here is a small airlock.

这里的这个东西是一个小型气闸。

▶ Now it's not human rated, so you know, put anything live in there.

但它不适用于人，所以你知道，不能把任何活物放进去。

▶ But it's a great platform for getting small CubeSats into space.

但它是将小型立方卫星送入太空的一个绝佳平台。

▶ And actually, Kimi-san, who is one of the Japanese astronauts in our crewmate that's on board, has been working on this and has set to shoot out some CubeSats later this week.

实际上，我们机组成员中的日本宇航员Kimi先生一直在忙这个，并计划在本周早些时候发射一些立方卫星。

bilibili 00:14:56

▶ And actually, we also have windows here.

实际上，我们这里也有窗户。

▶ Zina, what are you mind opening that?

吉娜，你介意打开它吗？

▶ Zina is going to go ahead and open one of those windows.

吉娜会去打开其中一扇窗户。

▶ I don't know.

我不知道。

▶ We're in orbital night, so you won't be able to see much.

我们现在处于#轨道#黑夜，所以你们看不到太多东西。

▶ If we were an orbital day, you could probably see some of the sunlight coming through.

如果是在#轨道#白天，你们可能能看到一些#阳光#照射进来。

▶ But Zina's just opened it.

但吉娜刚刚打开了它。

bilibili 00:15:13

▶ And if it were daylight, we'd be, oh, there's the moon.

如果是#白天#，我们就会，哦，那是月亮。

▶ That's super cool.

太酷了。

▶ If she were, if it was a little bit more daylight, you'd be able to see the truss, the solar rays, and it's just so beautiful.

如果当时，如果光线再亮一点，你就能看到桁架、太阳电池板，景色非常美丽。

▶ Thank you.

谢谢。

▶ That's amazing.

太神奇了。

▶ Thanks.

谢谢。

▶ And you mentioned some other astronauts and cosmonauts up there.

你提到了上面还有其他一些宇航员和航天员。

▶ How many people are up there right now?

现在上面有多少人？

 00:15:39

▶ And how much interaction do you have with them?

你们和他们有多少#互动#？

▶ There are seven people on board the International Space Station right now, and we have a lot of interaction with each other every day.

目前国际空间站上有七个人，我们每天都有大量的#互动#。

▶ Some of that is just by the nature of the work that we're

其中一些只是由我们工作的性质决定的。

▶ Doing.

进行中。

▶ A lot of tasks take two people or multiple people.

很多任务需要两个人或多人完成。

▶ We have a cargo ship coming up tomorrow that's going to bring a lot of experiments, a lot of resources consumables for us.

明天我们有一艘#货运#飞船即将抵达，它会为我们带来大量实验设备和资源消耗品。

bilibili 00:16:06

▶ Johnny's actually going to capture that with the robotic arm on the space station, but then every person on the space station is involved in getting the cargo off of that vehicle and getting it stowed.

约翰尼将用空间站上的机械臂捕获它，但随后空间站上的每个人都要参与将货物从飞船上卸下并存放好。

▶ Stowed is just one of the most interesting challenges that we have on a space station like this.

货物存放正是我们在这样的空间站上面面临的最有趣的挑战之一。

▶ And then some of it is just by choice.

而有些活动只是我们的自主选择。

bilibili 00:16:25

▶ We have meals together, maybe on a Saturday, we'll watch a movie together, play games together.

我们一起吃饭，也许在周六，我们会一起看电影，一起玩游戏。

▶ It's a really awesome part of this long duration mission.

这是这次长#周期#任务中非常棒的一部分。

▶ Was it very clicky Zina when you got up there and the people who'd been there for a while were sort of testing you out as a newbie?

齐娜，当你到达那里时，情况是不是很排外？那些在那里待了一段时间的人是不是像在考验你这个新手？

▶ I would say clicky is not the right word for it.

我会说“排外”这个词用得不准确。

bilibili 00:16:50

▶ Of course you have a bond with the crew that you've been on orbit with, but everyone is incredibly welcoming and we're all in an office together on earth.

当然，你会与和你一起在轨的乘组人员建立纽带，但每个人都非常热情，而且我们在地球上就像是在同一个办公室工作。

▶ We've trained together throughout the years.

多年来我们一直一起训练。

▶ We know each other really well, but every single expedition is different because you have a different combination of people.

我们彼此非常了解，但每一次#远征#都是不同的，因为人员组合不同。

bilibili 00:17:12

▶ And so although Johnny was here for six months whereas I'm still new, it's just really, really fun to be part of this mission together and be our Expedition 73 Part 2 crewmates.

所以，尽管约翰尼在这里已经六个月了，而我还是个新人，但能一起参与这次任务，成为我们第73次远征第二部分任务的队友，真的非常非常有趣。

▶ But I think I did a good job of proving that I was a rookie all on my own.

但我觉得我做得很好，靠自己就证明了我是个#新手#。

▶ Amazing and we've got like one minute left so I'm going to give you a very easy one I think and just this is so dumb.

太棒了，我们大概只剩一分钟了，所以我打算问你们一个非常简单的问题，我觉得这问题挺傻的。

bilibili 00:17:38

▶ I'm sorry.

抱歉。

▶ What's your favorite space movie?

你最喜欢的太空电影是什么？

▶ We actually watched it here for our first movie night with the current crew on board.

我们实际上在这里和现任乘组一起的第一次电影之夜就看它了。

▶ My favorite space movie is actually not very space the met, it's a space theme but it's not really about space and it's actually it's got to go and I think because it tells the just that endominal human spirit there's no genetics for that and so I think to me that's a metaphor that's very powerful in all of our lives.

我最喜欢的太空电影其实并不太太空，它有太空主题，但并非真正关于太空，实际上它必须.....我认为因为它讲述了那种非凡的人类精神，这是没有遗传基因的，所以我认为对我来说，这是一个在我们所有人生活中都非常有力的隐喻。

bilibili 00:18:12

▶ What about you, Z?

你呢，Z？

▶ Oh it's hard to choose and Gadica is really special.

哦，很难选择，《地心引力》真的很特别。

▶ I love watching that.

我很爱看那部。

▶ I think my favorites include Arrival and maybe aliens.

我想我最喜欢的包括《降临》，也许还有《异形》。

▶ Awesome we have worked I think out of time Capcom Houston is that what's happening?

太棒了，我想我们没时间了，卡普康休斯顿，是怎么回事吗？

▶ All right well thank you thank you so much for being here we really appreciate it the audience love this and give them a round of applause.

好的，嗯，谢谢，非常感谢你们来到这里，我们真的很感激，观众们很喜欢，给他们点掌声。

bilibili 00:18:59

▶ Thank you all so much this was really a lot of fun we loved speaking with you thanks for the great questions great conversation over and out from the International Space Station.

非常感谢大家，这真的非常有趣，我们很喜欢和你们交谈，谢谢你们的精彩问题和精彩对话，国际空间站通话完毕。

▶ Wow.

哇。

▶ Station this is Houston ACR.

空间站，这里是休斯顿ACR。

▶ Thank you that concludes our event.

谢谢，我们的活动到此结束。

▶ Thank you to all participants.

感谢所有参与者。

▶ Station we are now resuming operational audio communications.

空间站，我们现在恢复#操作# #音频#通信。
