

Bloomberg Business Week Daily: Markets Rally, Fed Insights, and AI Power Demand Surge

【彭博社商业周刊 20250923 英伟达千亿美元投资OpenAI | 美股创纪录飙升 | 美联储独立性受关注 | 能源巨头警告电力危机】

Summary: This episode of Bloomberg Businessweek Daily covers the record-breaking rally in US stocks, with the S&P 500 heading for its 28th record close this year. Key discussions include new Fed Governor Stephen Myron's emphasis on maintaining an independent voice despite his previous role as President Trump's economic adviser. A major focus is NVIDIA's planned \$100 billion investment in OpenAI to build AI data center infrastructure, highlighting the massive energy demand from AI. The show also features insights from Siemens USA on AI adoption in manufacturing and the potential economic impact of proposed H-1B visa fee increases, alongside an analysis from EQT's CEO on the looming energy supply crunch needed to power the AI boom.

摘要：本期《彭博商业周刊每日简报》报道了美国股市创纪录的上涨行情，标普500指数有望创下今年第28次收盘纪录。重点讨论包括美联储新任理事斯蒂芬·迈伦强调保持独立性，尽管他此前担任特朗普总统的经济顾问。节目重点关注英伟达计划向OpenAI投资1000亿美元以建设AI数据中心基础设施，凸显了AI带来的巨大能源需求。节目还收录了西门子美国公司关于AI在工业应用的见解，以及对拟议的H-1B签证费用上涨可能带来的经济影响的分析，同时包含了EQT首席执行官对为满足AI繁荣所需而即将出现的能源供应紧缺的分析。

🎧 This is Bloomberg Businessweek Daily, reporting from the magazine that helps global leaders stay ahead with insight on the people, companies and trends shaping today's complex economy.

这里是彭博商业周刊每日播报，源自一本为全球领导者提供前瞻视野的杂志，洞察塑造当今复杂经济格局的人物、企业与趋势。

🎧 Plus, global business, finance and tech news as it happens, Bloomberg Businessweek Daily with Carol Massar and Tim Stennett back live on Bloomberg Radio, Television, YouTube and Bloomberg Originals.

此外，实时追踪全球商业、金融与科技动态，彭博商业周刊每日播报由卡罗尔·马萨尔和蒂姆·斯坦尼特主持，重返彭博电台、电视、YouTube及彭博原创平台的直播现场。

▶ And a very good afternoon, everybody, live across bloomberg platforms.

大家下午好，我们正通过彭博全平台进行直播。

00:00:29

▶ This is Bloomberg Businessweek Carol Massar tim back live at bloomberg headquarters in new york city.

这里是彭博商业周刊，卡罗尔·马萨尔和蒂姆重返彭博纽约#总部#的直播现场。

▶ And tim, stocks are up off their lows of the session.

蒂姆，股市已从日内低点反弹。

▶ We've got a rally underway.

市场正迎来一波#上涨行情#。

▶ We're talking about records again on wall street.

我们再次讨论华尔街创纪录的表现。

▶ Yeah.

是的。

▶ S&P 500 right now, higher by 4/10 of 1%.

标普500指数当前上涨0.4%。

▶ The nasdaq composite up 6/10 of 1%.

纳斯达克#综合#指数上涨0.6%。

00:00:46

▶ The dow up more than 1/10 of 1%.

道指涨幅超0.1%。

▶ Charlie Bell, it is going have the details on that in just a moment.

查理·贝尔稍后将带来详细数据。

▶ He keeps us honest and up to date all the time.

他始终确保我们获取准确及时的信息。

▶ We're going to get to him in just a moment.

我们稍后就会连线他。

▶ As Tim mentioned, hey, it's a big week.

正如蒂姆所说，这是关键的一周。

▶ The UN General Assembly underway, Climate Week.

联合国大会与气候周同期举行。

▶ We've got some great macro voices and we're thinking about kind of the big picture.

我们邀请到宏观领域的重要声音，共同探讨整体经济格局。

00:01:03

▶ Having said that, we're also thinking about the Fed, this US Federal Reserve Governor Stephen Myron speaks on President Trump's potential influence and being independent.

与此同时，我们关注美联储动态，美联储理事斯蒂芬·迈伦就特朗普总统潜在影响力及央行独立性发表看法。

▶ A conversation with one of Bloomberg's best.

来自彭博顶尖记者的深度对话。

▶ We'll get to that in just a moment.

稍后为您呈现。

▶ Also, speaking of the president's move to curtail H-1B visas, the potential economic impact, a huge story that is still unfolding, one that unfolded to over the weekend.

此外，关于总统限制H-1B签证的举措及其潜在经济影响——这个周末持续发酵的重大事件。

00:01:26

▶ Also a view from the C-suite on them and more.

还有来自企业#高管层#的相关见解。

▶ Barbara Hampton is back with us.

芭芭拉·汉普顿再次做客节目。

▶ She's president and CEO of Siemens USA.

她是美国西门子总裁兼首席执行官。

▶ Also another voice from the C-suite, Toby Reiss, president, CEO of IGT on the net gas play to fend off higher utility prices and more.

另一位高管声音来自IGT总裁兼首席执行官托比·赖斯，探讨天然气网络策略以应对公用事业价格上涨等话题。

▶ We're also going to talk a little bit about air and energy demand, certainly with both of them.

我们还将与两位嘉宾探讨空气与能源需求问题。

00:01:46

▶ First up, though, as we mentioned, Charlie, keeping us up to speed on today's trading session, but also never to turn the dial to very much.

但首先，如之前所言，查理将为我们带来今日交易动态的最新情况，他的分析总是恰到好处。

▶ And here's what's going on.

当前市场情况如下。

▶ We've got the Dow, we got the S&P, we got NASDAQ all advancing, all trading at records right now.

道指、标普、纳斯达克全线走高，均创历史新高。

▶ Right to the numbers here.

直接看具体数据。

▶ We are on track for our 28th record close for the S&P 500 index this year.

标普500指数有望创下今年第28个收盘纪录。

00:02:05

▶ S&P right now up 26 6690.

标普现报26690点，上涨26点。

▶ That is a gain of 4/10 of 1%.

涨幅为0.4%。

▶ The Dow up 60.

道指上涨60点。

▶ That is an advance of 1/10 of 1%.

涨幅为0.1%。

▶ NASDAQ composite index up 136, up 6/10 of 1%.

纳斯达克#综合#指数上涨136点，涨幅0.6%。

▶ The mag seven index up now by just about 7/10 of 1%, ten year at 4.13% with a two year, 3.59% gold up \$61, the ounce up 1.7%, a record 3746.

"七巨头"指数现涨约0.7%，十年期国债收益率4.13%，两年期3.59%，黄金上涨61美元/盎司，涨幅1.7%，创3746美元/盎司纪录。

00:02:34

▶ And Bitcoin is retreating by 2.6%, 112,453 on Bitcoin.

比特币下跌2.6%，报112453美元。

▶ And to be clear, WTI crude oil flat on the day 60 to 68.

明确一下，WTI#原油#期货持平于60-68美元区间。

▶ But gold, no question their record up 1.7% in video, says it plans to progressively invest as much as \$100 billion in OpenAI as the companies partner to deploy at least ten gigawatts of in video systems for OpenAI infrastructure.

但黄金无疑创下纪录，视频中提及涨幅1.7%，该公司计划逐步投入高达1000亿美元于开放空间，合作部署至少十吉瓦的视频系统用于开放空间基础设施。

00:03:02

▶ NVIDIA shares are up now by 3.6%, and Apple shares today broke into positive territory for the year.

英伟达股价现涨3.6%，苹果股价今日转正，年内首次录得涨幅。

▶ The iPhone maker is up right now.

这家iPhone制造商当前上涨。

▶ We've got Apple shares advancing.

苹果股价走高。

▶ Apple up by 3.6% for on demand news 24 hours a day.

苹果上涨3.6%，为您提供24小时即时新闻。

▶ Subscribe to Bloomberg news now wherever you get your podcasts.

立即#订阅#彭博新闻，无论您通过何种平台收听播客。

▶ I'm Charlie Pelton.

我是查理·佩尔顿。

00:03:22

▶ That is Bloomberg Businessweek.

以上是彭博商业周刊。

▶ Gordon-Levitt Stocks up, Gold up Crypto not so much today, Tim.

戈登-莱维特：股票涨，黄金涨，加密货币今日表现平平，蒂姆。

▶ You never know why it's crypto.

加密货币的走势总是难以捉摸。

▶ Yeah, I think it's for as as somebody who follows it closely, you just don't know.

是的，即便是紧密跟踪它的人也无从得知。

▶ You never know.

你永远猜不透。

▶ All right.

好吧。

▶ Watching the markets, we are also watching some commentary by members of the Fed, His first meeting, in fact, as vote as as a voting member of the US Federal Reserve on leave as President Trump's chief economic adviser.

关注市场的同时，我们也在留意美联储成员的评论。事实上，这是他作为美联储投票成员（目前休假担任特朗普首席经济顾问）的首次会议。

00:03:48

▶ We're talking about Stephen Meyer.

我们说的是斯蒂芬·迈耶。

▶ And he has begun to speak out as a Fed member, including his first public speech today in an in-depth fireside chat at the Economic Club of New York with Bloomberg senior Washington correspondent Sylvia moss.

他已开始以美联储成员身份发声，包括今日在纽约经济俱乐部与彭博资深华盛顿记者西尔维娅·莫斯进行的深度炉边谈话，这也是他的首次公开演讲。

▶ And he stressed having an independent voice.

他强调保持独立声音。

▶ Check it out.

来听一下。

▶ I've had a number of conversations with the president about the economy, about economic policy over the last nine months, about the economy, economic policy.

过去九个月里，我与总统就经济、经济政策进行了多次对话。

00:04:13

▶ A number of those conversations are touching the Fed.

其中不少对话#涉及#美联储。

▶ Also, he's never asked me to set policy in a specific way.

此外，他从未要求我以特定方式制定政策。

▶ So you're never asked me.

所以他从未要求过我。

▶ It's never happened.

从未发生过。

▶ I knew my job as trying to provoke an interesting discussion that will help that will help the FOMC arrive at arrive at arrive at a clearer, clearer understandings of where the economy works and where monetary policy should be set.

我知道我的职责是引发有益的讨论，以帮助FOMC更清晰地理解经济运行的状况以及货币政策应如何设定。

00:04:37

▶ It's a few short months, but, you know, I've got, I think, a lot of a lot of content to work through in those months.

虽然只有短短几个月，但我觉得在这段时间里有很多内容需要处理。

▶ Ah, that, of course, was the Fed governor member, if you will, Stephen.

啊，刚才发言的正是美联储理事成员，斯蒂芬。

▶ Myron, joining our Sylvia moss and joining us joining them at the Economic Club of New York City.

迈伦，他与我们的西尔维娅·#莫斯#一同在纽约经济俱乐部参与活动。

▶ Hey, let's kind of get into it, what he had to say.

嘿，我们来深入探讨一下他的发言。

00:04:58

▶ Bloomberg TV and Radio International Economic.

彭博电视与广播国际经济。

▶ Policy correspondent Michael McKee joining us in studio.

政策#记者#迈克尔·麦基在演播室加入我们。

▶ So I want to address first what we highlighted there, Mike.

迈克，我想先谈谈我们刚才强调的部分。

▶ Does the Street believe he will have an independent voice?

华尔街是否相信他会保持独立声音？

▶ And on the second part of what he had to say, what is it that he wants to help the FOMC when it comes to clear understandings of the way the economy be set?

关于他发言的第二部分，在帮助FOMC清晰理解经济设定方式方面，他具体想做什么？

00:05:18

▶ Well, let's take those one by one.

好的，我们逐一来看。

▶ The first thing, I don't think the Street sees him as an independent voice at all, which was kind of behind some of what he was saying today.

首先，我认为华尔街根本不认为他是一个独立的声音，这也是他今天部分言论背后的原因。

▶ And then the second part of that is that the street doesn't care at this point because he's one voice out of 19 on the committee and one vote out of 12.

其次，华尔街目前并不在意，因为他在委员会19个成员中只占一票，在12票表决权中也只有一票。

00:05:42

⏮ And there's a feeling that he isn't going to make much of a difference with four and a half months or not even that on this term.

而且市场感觉，在剩下四个半月（甚至更短）的任期内，他很难产生太大影响。

⏮ Now, he could stay a lot longer and continue to be a voice for the president's views.

当然，他可能留任更久，继续代表总统的观点发声。

⏮ If we want to be charitable, we can say that his views are the same as the president's and he's not there to do the president's bidding, but the he just happens to align with him, which could be true.

如果我们往好处想，可以说他的观点与总统一致，并非奉命行事，只是恰好立场相同，这可能是事实。

00:06:08

⏮ And so as far as that goes, yeah, he's not he can say he's not been told by the president what to do.

就此而言，他确实可以说总统没有指示他该怎么做。

⏮ Although he certainly knows what the what the president wants now, what he wants to do or what he says he wants to do is to continue to make the arguments that he made today as an economist and convince other members of the Fed to go along with his viewpoint.

尽管他肯定清楚总统的意愿，但他想做的（或者说他声称想做的）是继续以经济学家的身份提出今天这样的论点，并说服美联储其他成员接受他的观点。

⏮ You notice that Jay Powell said at the news conference last week that the real impact that any one on the Open Market Committee has is in their ability to persuade people to their views.

你注意到杰伊·鲍威尔在上周的新闻发布会上说，公开市场委员会任何成员的真实影响力在于他们说服他人接受其观点的能力。

00:06:48

⏮ You know, he sort of sounded like nobody was believing in Dr. Myron's views at that meeting.

听起来好像在那次会议上没人相信迈伦博士的观点。

▶ But Myron seems to believe he can bring people along.

但迈伦似乎相信他能说服大家。

▶ What does he view as the role of the Federal Reserve, and how is that different from other members of the Fed?

他认为美联储的角色是什么？这与美联储其他成员有何不同？

▶ It's like we got a little bit of that philosophy.

我们似乎听到了一些他的理念。

▶ We did.

确实。

▶ In a sense, I think he is committed to keeping inflation low.

在某种意义上，我认为他致力于维持低#通胀#。

00:07:17

▶ It would be hard to be an economist who supported high inflation, and he is certainly committed to keeping the labor market healthy because much of his talk was about that.

很难有经济学家支持高通胀，他当然也致力于保持劳动力市场健康，因为他的谈话大部分围绕这一点。

▶ A lot of what he disagrees with is in the fiscal on the fiscal side, which is not unusual for someone of his political party.

他的很多不同意见在于财政方面，这对于他所在政党的人来说并不罕见。

▶ And also in the philosophical side, he disagreed with the way the Fed picked up some social topics in recent years, although you could argue about how much they really they really did.

在理念层面，他不同意美联储近年来涉足某些社会议题的方式，尽管关于他们实际涉足多深可以商榷。

00:07:51

▶ And then the other part of it is that he has put a little bit of emphasis on the so-called third mandate of stable interest rates and stable long rates.

而另一部分原因在于，他略微强调了所谓的第三重使命——稳定利率和长期利率。

▶ And he said that that is something the Fed could do something about, whereas everybody on the Fed now up to this point has said that just flows from our other policies.

他表示这是美联储能够施加影响的领域，但迄今为止美联储所有成员都认为这仅仅是其他政策的衍生效果。

▶ Can you so can you explain that a little bit?

能否请您稍作解释？

00:08:19

▶ Because for years I've talked about the dual mandate in the context of the Federal Reserve have been getting it wrong by only focusing on stable prices and maximum employment.

因为多年来我一直指出，美联储在理解#双重使命#时存在偏差，只关注物价稳定和最大化就业。

▶ No.

不。

▶ So what is what is what this is?

那么这究竟是怎么回事？

▶ It was put in there in 1977 when they re when they added the dual mandate to the single mandate that they already had.

这条规定是在1977年增补的，当时他们在原有的#单一使命#基础上加入了#双重使命#。

00:08:42

▶ And basically it says that you need to have stable interest rates going forward, long rates going forward.

其核心内容是要求未来保持利率稳定，特别是长期利率稳定。

⏮ And the issue is the Fed doesn't control long rates.

问题在于美联储并不控制长期利率。

⏮ And so what you need is low inflation and a healthy labor market, and then you will get stable and lower long rates.

实际上需要的是低#通货膨胀#和健康的劳动力市场，这样自然会产生稳定且较低的长期利率。

⏮ Now, the the argument is that they could, if they wanted to, and they have done through QE, tried to influence long rates.

当前争议点在于，若有意为之，他们确实可以通过量化宽松等手段尝试影响长期利率。

00:09:15

⏮ And he would seem to think that that is something that could be considered which other people would disagree with.

他似乎认为这个方向值得考量，但其他人会持反对意见。

⏮ Hey, one last thing before you go.

嘿，临走前还有件事。

⏮ H1-B visas.

关于H1-B签证。

⏮ You know, one of the big stories and certainly everybody reading it on the Bloomberg about the President Trump, his administration planning to raise the application fee for such \$200,000.

你知道，最近有个大新闻——肯定每个看彭博社的人都知道——特朗普政府计划将此类签证申请费提高到20万美元。

00:09:35

⏮ It's caused some concern among skilled immigrants in the U.S., including graduate students and workers in the tech industry.

这已引起美国技术移民群体的担忧，包括研究生和科技行业工作者。

▶ What's the economic case for having them?

引进这些人才的经济理由是什么？

▶ What's the economic impact of not having Well, the case for having them is you bring in some of the best and brightest people from around the world who contribute new ideas and also contribute to making U.S. companies more effective and more efficient, more productive.

不引进会有什么经济影响？支持方认为这能吸纳全球顶尖人才，他们既贡献新思想，又助力美国企业提升效能与生产力。

00:09:59

▶ The argument against it is that they can take jobs away from Americans.

反对方则主张这可能抢走美国人的工作机会。

▶ Now that tech companies have always argued that there aren't enough Americans to hire doing these jobs.

科技公司一直声称没有足够美国人能胜任这些岗位。

▶ And I'm not an expert on that, but I think I see one sitting across the studio from me.

我并非这方面的专家，但演播室对面就坐着一位专业人士。

▶ You'll be talking to in a minute.

您稍后就会与他交流。

▶ From an economic point of view, there isn't really evidence that they take a lot of jobs or that they affect the pay of Americans who are here.

从经济学角度看，并没有确凿证据表明他们大量抢占工作岗位或影响本土美国人的薪资水平。

00:10:27

▶ But one of the questions that has come up is, is this another thing that the president isn't legally allowed to do and is just doing anyway and nobody is talking about it because Congress has the legal right to change visa costs and not the president.

但浮现的疑问是：这是否又属于总统在法律上无权实施却执意推进的事项？由于国会才拥有调整签证费用的法定权力，此事竟无人提及。

▶ But it's sort of been taken as a given that he could do this.

但人们却想当然地认为他可以这么做。

▶ So I'm not sure where this goes from here.

所以我不确定事态将如何发展。

00:10:51

▶ All right.

好的。

▶ We appreciate your input out there.

感谢您带来的#见解#。

▶ Bloomberg TV and Radio International economics and policy correspondent Michael McKee.

这里是彭博电视及国际广播电台#经济#与政策#记者#迈克尔·麦基。

▶ Now we do want to get to the tech sector where people are definitely talking about those H-1B visas, and we're going to get to that in subsequent hours here on Bloomberg Businessweek Daily.

现在我们要转向科技领域——人们肯定在热议H-1B签证问题，我们将在后续的《彭博商业周刊每日》节目中深入探讨。

00:11:07

▶ But we really want to get to and actually with some of our later guests, talk about Tim, what Nvidia is up to.

但我们更想与后续嘉宾重点讨论英伟达的最新动向。

▶ Yeah, including one detailing how in video will invest as much as \$100 billion in OpenAI to support the building of new data centers and the infrastructure needed to power A.I. workloads.

是的，其中包含英伟达将向OpenAI投资高达1000亿美元的具体计划，用于支持新建数据中心及满足人工智能工作负载的基础设施。

▶ The two companies signing a letter of intent for Strategic deal just on Monday.

两家公司刚在周一签署了#战略#合作#意向书#。

00:11:27

▶ They said in a statement that coming just two days after Nvidia agreed to invest \$5 billion in Intel as the companies will co-develop chips for PCs and for data centers.

声明称，此举紧随英伟达同意向英特尔投资50亿美元之后两天达成，双方将共同开发用于个人电脑和数据中心的芯片。

▶ We got a great group, Carol.

我们请到了顶尖专家团，卡罗尔。

▶ We do indeed.

确实如此。

▶ Let's get right to it.

让我们直接开始。

▶ Bloomberg Intelligence, Global head of Technology Research, Mandeep Singh, right here in studio.

这位是彭博智库全球科技研究主管曼迪普·辛格，就在演播室现场。

00:11:44

▶ He's also the host of the Tech Disruptors podcast, which focuses on disruptive trends in the tech world.

他同时也是关注科技界颠覆性趋势的《科技颠覆者》播客主持人。

▶ NVIDIA certainly has disrupted the world.

英伟达确实颠覆了世界。

▶ You can find it on Apple, Spotify, wherever you get your podcasts.

您可以在Apple、Spotify等任何播客平台收听。

🎧 And then also with us, the co host, BTEC and VTV and of the BTEC podcast, Ed Ludlow out there in San Francisco.

此外还有我们在旧金山的BTEC播客联合主持人埃德·勒德洛。

00:12:01

🎧 Mandeep, I want to go first to you.

曼迪普，我想先请教您。

🎧 Why is Nvidia doing this investment in OpenAI?

英伟达为何要对OpenAI进行这项投资？

🎧 Well, when I look at in video, clearly, you know, they are at a \$200 billion run rate growing exceptionally well and they have to keep up the growth rate.

在我看来，英伟达目前年化营收达2000亿美元，增长势头异常强劲，他们必须维持这种增速。

🎧 So now that they can really sell to China market or at least there is uncertainty, they have to find those avenues and the base avenue is open.

既然现在他们能真正向中国市场销售（或至少存在不确定性），他们需要开拓新渠道，而基础渠道就是开放平台。

00:12:26

🎧 I mean, they still believe they need a lot of compute for training.

我认为，他们仍坚信训练模型需要大量#计算资源#。

🎧 Microsoft, it seems, has really focused on the inferencing part.

微软似乎更专注于推理环节。

🎧 So this raises up the ante in terms of model training.

因此这提高了模型训练的赌注。

🎧 And just to put it in context, one gigawatt can cost up to \$25 billion in investment.

具体来说，一千兆瓦容量可能需要250亿美元投资。

🎧 So if they're partnering with NVIDIA for ten gigawatts and all that \$100 Billion investment is not one shot.

若他们与英伟达合作建设十千兆瓦容量，这1000亿美元投资并非一次性投入。

00:12:55

🎧 It's going to happen progressively.

而是分阶段实施。

🎧 We are talking about \$250 billion in cost out of which NVIDIA can spend up to \$100 billion.

总成本约2500亿美元，英伟达可能承担其中1000亿美元。

🎧 That's just rough math.

这只是粗略估算。

🎧 Do they have to then I'm assuming this is a deal where they make this investment of \$100 billion and OpenAI uses nothing but Nvidia chips like I'm trying to understand.

他们是不是必须这样？我猜这笔交易是他们投入1000亿美元，然后OpenAI只用英伟达的芯片——我只是想搞清楚。

00:13:14

🎧 Is it a simplistic is that no?

这样理解是否过于简单化了？

🎧 So look open.

其实OpenAI。

🎧 The AI has hinted they could be using Broadcom A6 as well as Nvidia.

已暗示可能同时采用博通A6和英伟达芯片。

🎧 But the other player in this is Oracle, right?

但另一个参与方是#甲骨文#，对吧？

🎧 So what Oracle said was they have a \$300 billion deal with OpenAI and they guided to that backlog going up, their revenue going up.

甲骨文称他们与OpenAI有3000亿美元协议，并预示积压订单和收入将增长。

🎧 A lot of that is the amount of compute that open the AI will consume on Oracle Cloud.

其中很大部分是OpenAI将在#甲骨文#云上#消耗#的#计算资源#。

00:13:44

🎧 So the question is where do they get the compute and the data center capacity?

问题在于他们从何处获取#计算资源#和数据中心容量？

🎧 That's where NVIDIA is coming in and saying, we're going to help you fund that data center build out.

这正是英伟达的切入点——他们表示将资助数据中心的建设。

🎧 Remember, all the other hyperscalers are doing it themselves.

需知其他超大规模公司都是自建基础设施。

🎧 Microsoft is doing it, Google is doing it themselves, Metro is doing it themselves.

微软、谷歌、Meta都在自主建设。

00:14:01

🎧 OpenAI doesn't have the balance sheet, so they need the money from somewhere.

OpenAI没有足够资产负债表支撑，需要外部资金。

🎧 In this case, Nvidia is the bridge that's providing them a lot.

这种情况下，英伟达成为重要桥梁。

🎧 The cost of beta.

贝塔成本。

🎧 Come on in here because I'm really interested in what in video gets out of this.

请继续，我很好奇英伟达能从中获得什么。

🎧 From an equity perspective, we know Microsoft is a huge investor in OpenAI SoftBank as well, not to mention many other venture capital firms.

从股权角度看，我们知道微软是OpenAI的大投资者，软银亦是，更不用说其他风投机构。

00:14:22

🎧 What is it, Nvidia get here?

英伟达到底能得到什么？

🎧 Well, according to Bloomberg sources in video, literally gets equity in OpenAI.

根据彭博社消息源，英伟达确实将获得OpenAI的股权。

🎧 But, you know, you pointed out right at the top of the conversation, Tim, this is a letter of intent for a future strategic agreement and how it structured is really important.

但正如您开场提到的，这是一份未来战略协议的意向书，具体架构非常重要。

🎧 Mandeep gave us the the how the industry works, but what we understand with this deal specifically is that the \$100 billion is split so that once a gigawatt of capacity is installed, then OpenAI gets access to about \$10 billion.

曼迪普解释了行业运作模式，但就本交易而言，我们了解到1000亿美元资金将分阶段释放——每建成一千兆瓦容量，OpenAI可获得约100亿美元。

00:14:56

🎧 But what we don't know is like if this is cash or it.

不确定的是这笔资金是现金形式。

🎧 Just in a video saying here are \$10 billion worth of G.P.S.

还是英伟达直接提供价值100亿美元的GPU。

🎧 That's what I'm wondering.

这正是我的疑问。

🎧 Is this just in kind?

是否以实物形式进行？

▶ That was my first question to Carol when I saw this headline.

看到这个#头条#时，这也是我向卡罗尔提出的第一个问题。

▶ That's a lot of money.

这可是笔巨款。

▶ Is this just in-kind from a video like who has the money?

英伟达是否以实物出资？毕竟谁有这么多现金？

00:15:12

▶ And it doesn't have the cash balance sheet, though, to fund the overall project.

而且英伟达的现金储备并不足以支撑整个项目。

▶ And so, like, what's really interesting here is there are lots of companies that use Nvidia GPUs, if you were to rank them open.

有趣的是，若对使用英伟达GPU的公司进行排名。

▶ I based on what the reporting in the public disclosures is, probably number six, Microsoft, Microsoft's probably the most.

根据公开披露信息，OpenAI可能排第六，微软可能是最大用户。

00:15:29

▶ They probably have 450,000 active hoppers and then you have meter and XLE.

微软可能拥有45万个活跃GPU，其次是Meta和特斯拉。

▶ But each of those has a different business model, right?

但每家公司商业模式不同。

▶ Largely, OpenAI does not own and operate and control the GPUs itself.

OpenAI基本不自主拥有、运营或控制GPU。

▶ As Mandie perfectly points out, they rely on third parties that they basically rent capacity from.

正如曼迪精辟指出的，他们依赖第三方租用算力。

▶ And so it's a bit misleading or

因此这有点误导性...

00:15:50

▶ Confusing to talk about the direct relationship with Nvidia and opening on GPUs.

谈论英伟达与GPU开放之间的直接关系确实令人困惑。

▶ But for a video, you know, and I go back to that, Bloomberg Intelligence reacts to guys so quick.

但在视频中，要知道，我再次强调，彭博智库对市场动态的反应速度极快。

▶ You know the Nvidia loves big round numbers so does the president of the United States the administration and in video uses them to the same sort of effect.

众所周知英伟达偏爱整数关口，美国总统及其政府也是如此，而视频中运用这类数字也能达到类似效果。

00:16:10

▶ But the question is only whether Nvidia makes more money out of this deal than it's putting in.

但问题仅在于英伟达从这笔交易中获取的收益是否高于其投入。

▶ And I think that's the thesis that buy has a mandate.

我认为这正是买方获得#授权#的#核心论点#。

▶ And correct me if I'm wrong.

若我有误，请指正。

▶ So the one thing I would add here is in the case of Microsoft's partnership, you know, if OpenAI I was using Microsoft Compute for training, that would be costs for Microsoft.

需要补充的是，以微软合作为例，若OpenAI使用微软计算资源进行训练，这对微软而言是成本支出。

00:16:31

▶ They can't recognize it as revenue.

这些支出无法被确认为收入。

▶ But if OpenAI is using Oracle to compute for training, that's revenue for Oracle.

但若OpenAI使用#甲骨文#进行训练#计算#，这便成为#甲骨文#的收入。

▶ So that's where, you know, Microsoft is focused on the inferencing part because that's all revenue for that.

因此微软专注于推理环节，因为该部分能产生纯收入。

▶ They don't want more costs there.

他们不愿在此增加更多成本。

▶ As for Oracle, you know, all the training stuff is revenue.

至于#甲骨文#，所有训练相关业务都构成收入。

00:16:50

▶ And so it doesn't surprise me that Oracle wants a lot of that training business and somebody has to finance the chips because it's not Microsoft or Google or Mehra buying those GPUs.

所以甲骨文渴望大量训练业务并不意外，总需有人为芯片买单——毕竟不是微软、谷歌或Mehra采购这些GPU。

▶ So in this case, and Vidya is the one who is financing those chips and taking a stake in OpenAI.

本案中，正是维迪亚出资采购芯片并获取开放生态的#股权#。

▶ One thing I want to throw into the you know, and come on back in, this comes just after that Intel investment.

需要插播一点：此事紧随英特尔投资之后发生。

00:17:10

▶ Nvidia agreeing to invest 5 billion in Intel.

英伟达同意向英特尔投资50亿美元。

▶ Are they connected these moves?

这些举措是否互相关联？

▶ Is there a grand plan here?

是否存在宏大布局？

▶ Is it Nvidia?

是英伟达在主导吗？

▶ I think as you've said earlier about, you know, kind of building out its business or I guess thinking about what else that they need to be doing.

如您先前所言，这或是其业务拓展的一部分，抑或是他们在思考还需采取哪些行动。

▶ Yeah, I mean, Nvidia has some financial clout largely relating to the appreciation in its market value, but it's not a company that's like absolutely flush with cash on its balance sheet and has an infinite war chest to spend.

确实，英伟达凭借市值增长拥有财务影响力，但其资产负债表并非现金充盈，也非拥有无限资金储备。

00:17:39

▶ The main thing, and we write about this in the context of Intel is that NVIDIA is the golden ticket for AI as it stands, right?

关键在于，我们在英特尔相关论述中提到：就现状而言，英伟达是AI领域的#金门票#，对吗？

▶ That it has a literal and technical monopoly in the market for GPUs or accelerators in the datacenter use case.

它在数据中心应用场景的GPU或加速器市场上具有#实质性的#技术#垄断#地位。

⏮ But Mandeep alludes to something that on paper is coming, which is AMD has a product in the market.

但曼迪普提及了理论上即将出现的变数——AMD已有产品上市。

00:18:02

⏮ There's the asexual custom Silicon Solutions that Broadcom offers.

博通还提供定制化#芯片#解决方案。

⏮ Grok with a Q would say that it is more competitive on the inference side than AMD is.

带Q的Grok会声称其在#推理#侧比AMD更具竞争力。

⏮ By the way, OpenAI also has an exclusive agreement with OpenAI as well.

顺便提一句，开放生态与开放生态之间也存在独家协议。

⏮ That's the use of the 400 series, right?

这涉及400系列的使用，对吗？

⏮ And so this puts Nvidia in a position where it can guarantee itself some demand out on top of the backlog that's already there in the future and make sure that the future data center that gets built does so with its designs in its accelerated computing system.

这使得英伟达能确保未来在现有积压订单基础上获得额外需求，并保证新建数据中心采用其加速计算系统设计方案。

00:18:35

⏮ I just love how everybody's working with one another.

我十分欣赏这种多方协作的模式。

⏮ It's fascinating。

这真是#令人着迷#。

⏮ Hey, guys, unfortunately, we have to leave it there.

各位，很遗憾我们得就此打住。

▶ Bloomberg Intelligence, Global head of Technology Research, Mandeep Singh.

这位是彭博智库全球科技研究主管曼迪普·辛格。

▶ Check out the Tech Disruptors podcast he does with the RBI team and then, of course, are Above Love, co-host of Bloomberg Technology.

欢迎收听他与RBI团队合作的《科技颠覆者》播客，当然还有彭博科技频道联合主持人艾伯夫·拉夫。

00:18:52

▶ When we come back, North America gas at an inflection.

稍后回来，北美天然气正处#转折点#。

▶ We'll see what the CEO of NEC gas producer AQ TI has to say about that.

我们将聆听北美天然气生产商AQ TI首席执行官对此的见解。

▶ It's 221 on Wall Street.

现在是华尔街221演播室。

▶ We do check markets all day long.

我们全天候追踪市场动态。

▶ Here at Bloomberg.

这里是彭博社。

▶ We do have stocks pushing higher.

股市确实在走高。

▶ The Dow, the S&P NASDAQ solidly in the green.

道指、标普、纳斯达克#稳健#收涨。

▶ We have got the s&p on track for its 28th record this year.

标普指数正迈向今年第28次创纪录。

00:19:15

▶ S&P right now up 26, 6691.

标普现涨26点至6691点。

▶ The dow up 53.

道指涨53点。

▶ That's an advance right now of just about 1/10 of 1%.

当前涨幅约0.1%。

▶ And West Texas intermediate crude oil is moving lower to the higher today.

而西德克萨斯#中质# #原油#今日由跌转升。

▶ Little change right now.

目前波动不大。

▶ WTI 60 to 70 right now for a barrel of WTI at a ten year, 4.13% with a two year, 3.59% spot.

WTI现报每#桶#60至70美元，十年期收益率4.13%，两年期现货收益率3.59%。

▶ Gold up 1.6%, 3746 The ounce right now on the precious metal NVIDIA is going to invest as much as \$100 billion in OpenAI to support the building of new data centers and the infrastructure needed to power artificial intelligence workloads.

黄金涨1.6%，现报每盎司3746美元。英伟达将向开放生态投资高达1000亿美元，用于支持新建数据中心及人工智能工作负载所需的基础设施。

00:19:56

▶ NVIDIA shares are up now by three and a half percent and Pfizer is paying \$4.9 billion for the obesity startup.

英伟达股价现涨3.5%，辉瑞正以49亿美元收购这家#肥胖症# #初创企业#。

▶ Met Sara in a bid to catch up to rival drug makers after failing to compete with its own weight loss medications.

在与自家减肥药竞争#失利#后，辉瑞通过收购梅特萨拉来#追赶#竞争对手。

▶ Right now, we have got Pfizer shares.

目前辉瑞股价。

▶ They're gaining by just about 5/10 of 1%。

涨幅约0.5%。

▶ As for Matt, Sara, it is surging now by 62% for on demand news 24 hours a day.

而梅特萨拉股价现暴涨62%。欲获取24小时即时新闻，

00:20:24

▶ Subscribe to Bloomberg News now wherever I'm Charlie Pallet and that is Bloomberg Business Flash.

请立即#订阅#彭博新闻。我是查理·帕勒，以上是彭博商业快讯。

▶ All right Charlie, thank you.

好的查理，谢谢。

▶ So Michael Bloomberg reported over the summer that businesses and households served by the largest U.S. power grid will spend a record 16.1 billion to ensure electricity supplies amid a massive artificial intelligence driven demand surge.

迈克尔·布隆伯格今夏报道称，受人工智能驱动需求激增影响，美国最大电网覆盖范围内的企业和家庭将破纪录地支出161亿美元以确保电力供应。

00:20:46

▶ We are talking about this a lot.

我们对此多有讨论。

▶ And having said that, we just talked about what NVIDIA is doing with OpenAI and their spend their price increase, so prompted calls from utilities and energy groups to build more generation.

正因如此，我们刚讨论了英伟达在开放生态的投入及涨价举措，这促使公用事业和能源集团呼吁建设更多发电设施。

▶ So we want to see what our next guest has to say about it.

现在有请下一位嘉宾分享见解。

▶ He is in the midst of it.

他正身处#漩涡中心#。

▶ Toby rice is president and ceo of iq.T.

托比·赖斯是IQT公司的总裁兼首席执行官。

00:21:04

▶ The nearly \$31 billion market cap vertically integrated energy company obviously specializing in nat gas.

这家市值近310亿美元的垂直整合能源公司显然专攻天然气领域。

▶ Toby, good to have you here.

托比，欢迎做客。

▶ I want to start big on broad, the macro.

我想先从宏观大局谈起。

▶ How would you describe it right now for you and your business?

您如何描述当前行业与贵公司面临的局面？

▶ Natural gas markets,

天然气市场，

▶ In one word, I would say it's going to be very volatile in the short term.

用一词概括短期，我会说将非常#波动#。

00:21:22

▶ And one word for the long term, I'd say incredibly exciting.

长期而言，则堪称无比振奋。

▶ When you look at the three major themes that are that are hitting energy right now, the desire to continue to evolve our energy systems, replacing coal with natural gas.

当前能源领域面临三大主题：持续演进能源体系、以天然气替代煤炭；

▶ Major theme ISE what everybody's talking about right now, that's a major that's going to be a major source of demand.

这正是当下热议的焦点，也将成为主要需求来源。

00:21:40

▶ And then providing energy security to our allies is still a thing.

此外，为盟友提供能源安全仍是重要议题，

▶ And that's going to be playing on the LNG.

这将影响液化天然气市场。

▶ You step back and you add it all up.

综合来看，

▶ We're talking about a 20 to 40% increase in natural gas demand in this country.

我们预计美国天然气需求将增长20%至40%。

▶ Well, let me just ask you, because before that, let's go back.

请允许我追问，在此之前——

▶ That's longer term, but I know our API people have put some research and they talked about North American Gas is at an inflection and they talked about data centers and adding to domestic demand near Appalachian Supply, LNG exports sustained global port.

您说的是长期前景，但我知道我们的API团队发布过研究报告，提到北美天然气处于转折点，论及数据中心推动国内需求增长、阿巴拉契亚供应、液化天然气出口维持全球港口运转。

00:22:07

▶ But so tell us about the shorter term. Is there a little bit of an inflection point for you?

那么短期来看，是否存在某个#转折#点？

🎧 I'd say the next the next 3 to 5 years data centers and fueling the revolution is going to be a very big focus.

未来3到5年，数据中心推动的变革将成为重要焦点。

🎧 But keep in mind, we're going to be doubling U.S. LNG exports over the next five years.

但需注意，美国液化天然气出口量将在未来五年翻番。

🎧 So we're doing both of these at once.

这两大需求将同步增长。

00:22:24

🎧 And the good news is that we've got the natural resource in this country.

好消息是美国拥有丰富的自然资源，

🎧 It's just going to come down to how fast we can actually get this infrastructure built,

关键在于我们推进基础设施建设的速度。

🎧 focusing specifically on the power demand side of things.

特别聚焦电力需求侧，

🎧 When you step back and look at electrify everything, not just air,

纵观"万物电气化"趋势（不仅是AI），

🎧 we're looking at a 10 to 18 Bcf a day, natural gas demand to meet that.

我们预计需要每日增加100亿至180亿立方英尺的天然气需求来满足。

00:22:41

🎧 That's a 10 to 18% increase in demand

这意味着需求增长10%至18%，

🎧 and about 4 to 6, about 40% of that is going to be for data centers.

其中约40%将来自数据中心。

▶ So it's going to be this can be really big.

因此市场规模可观。

▶ We're seeing these opportunities happen in our backyard act.

我们已在自家后院看到这些机遇——

▶ We signed up over one and a half Bcf a day of natural gas in cubic feet per cubic feet just for those who might not. And this is a market that's about 100 Bcf a day just to make the numbers ballpark.

我们刚签署了每日超过15亿立方英尺的天然气供应合同（针对不熟悉单位的观众说明：整个市场规模约每日1000亿立方英尺）。

00:23:03

▶ So one and a half Bcf a day of natural gas supply for these data centers in Pennsylvania,

这些宾夕法尼亚州的数据中心所需天然气，

▶ this is going to generate enough power to almost power to New York cities.

产生的电力几乎可满足两个纽约市的用量。

▶ So these are major league infrastructure projects in a grid that desperately needs more power generation.

这些都是在亟需增加发电能力的#电网#中开展的大型#基础设施#项目。

▶ The tech companies like to talk about nuclear power generation powering their data centers.

科技公司常提及核能为其数据中心供电，

00:23:23

▶ The president likes to talk about the promise of nuclear power, and they say promise of it because we know how to do it.

总统也常谈论核能的潜力——之所以称潜力，是因为技术虽成熟，

▶ But it just takes a long time and it's very expensive.

但建设周期长、成本高昂。

▶ How do you view the increased interest in recent years in nuclear power as a threat to your business?

您如何看待近年核能关注度提升对贵公司的潜在威胁？

▶ I think that natural gas is the clear winner right now.

我认为天然气显然是当下的赢家。

00:23:40

▶ You know, this has been a big question

这始终是个重要议题。

▶ That people have been asking over the last call it 18 months, What is going to power this revolution?

过去大约18个月里人们一直在问，这场革命将由什么来驱动？

▶ What was originally thought to be renewable is going to pick this up than people went to nuclear and realized it's going to take too long to get it done, comes back to natural gas.

最初被认为的可再生能源无法担此重任，人们转向核能后又意识到其建设周期过长，最终又回归到天然气。

00:23:55

▶ Why?

为何如此？

▶ Because we have the track record of scale and speed.

因为我们拥有规模化与高速发展的成功先例。

▶ If you look over the last ten years, we've seen natural gas.

回顾过去十年，天然气的发展有目共睹。

▶ Power demand increase 14 Bcf a day.

电力需求每日增长140亿立方英尺。

▶ So think about how much we're planning on doing.

可见我们规划的发展规模有多大。

▶ We've done that with natural gas.

我们正是通过天然气实现了这一目标。

▶ Now, longer term, we think nuclear is going to be a great option.

长期来看，我们认为核能将是绝佳选择。

00:24:12

▶ But understand this natural gas has a vehicle to become zero carbon and that's why we're spending a little bit of money today on carbon capture that will enable natural gas to be the first reliable, affordable, zero carbon energy solution.

但需知天然气具备零碳化的路径，这正是我们如今投入少量资金于碳捕集技术的原因——这将使天然气成为首个可靠、经济、零碳的能源解决方案。

▶ The world does not have that today.

目前全球尚无此类方案。

▶ You know, just like there's a big spending I in data centers, there seems to be a big spend in that energy to support it and what's need it.

正如数据中心领域投入巨大，支撑其运行的能源领域也需大量投资。

00:24:33

▶ You have announced multiple long term sales and purchase agreements I think just in the last few months.

贵公司在最近几个月就签署了多项长期购销协议。

▶ So are fearing an oversupply to be in 2027, 2029.

是否担忧2027至2029年会出现供应过剩？

▶ What are you hearing from LNG buyers about kind of your demand visibility window and how confident are you?

从液化天然气买家那里听到哪些关于需求#可见性#窗口的反馈？您的信心程度如何？

▶ It sounds like you're pretty confident on a longer term pull for LNG or U.S. LNG specifically.

看来您对液化天然气（尤其是美国液化天然气）的长期需求相当乐观。

00:24:54

▶ Yeah, on the LNG front, we certainly wouldn't disagree.

在液化天然气方面，我们完全认同这一观点。

▶ We do see a little bit of an oversupply situation globally for LNG that could lead to softer prices and that 27 to 29 timeframe that you mentioned.

我们确实预见全球液化天然气将出现轻度供应过剩，这可能导致价格走软，时间点正如您所说的2027至2029年。

▶ And you say, well, why did you just go and sign up for a massive amount of LNG?

您可能会问，那为何还要签署大量液化天然气协议？

▶ It's because our contracts are going to be starting, we're going to be getting that exposure in 2030.

因为我们的合同将从2030年开始生效，届时才能获得相关#风险敞口#。

00:25:14

▶ So this oversupply will pass and then we're back to a tight situation and that's where LNG is hitting the market.

当前过剩局面会过去，市场将重回紧张状态，那才是液化天然气大显身手的时机。

▶ When you want to talk about demand, just step back and look at this world for a world is that's going to continue to care about climate and emissions.

探讨需求时需放眼全局：这个世界将持续关注气候与排放问题。

▶ Replacing the coal in this world is going to require an additional 170 Bcf a day of natural gas.

替代全球煤炭消费每日需要新增1700亿立方英尺天然气。

00:25:34

▶ If you care about the people living on this planet, it's going to take an additional 120 Bcf today.

若顾及全球民生，当下每日还需新增1200亿立方英尺。

▶ Sure.

确实如此。

▶ Are you that people care about that we are certainly feeling this year a push back?

您是否认为民众对此的关切正在减弱？我们今年确实感受到一些阻力。

▶ Well, when it comes to concerns about carbon emissions and climate, yeah, this is from everyone and I have to be very careful because there are a lot of folks that are working really hard on this area.

关于碳排放与气候的担忧确实来自各方，我必须谨慎表述，因为众多人士正为此倾注心血。

00:25:53

▶ Yeah, but how?

但具体如何体现？

▶ Yeah, confident and comfortable on the energy transition.

我们对能源#转型#充满信心且从容应对。

▶ There's there's a ton of people that are passionate about this and that passion is not going to go away with just one election.

有大量人群对此怀有#热忱#，这种#热情#不会因一次选举而消退。

▶ But I think what is happening now is people are stepping back and they're looking at the plans they put in place and they're looking at the results of those plans.

但当下人们正在反思，审视既定的计划及其成效。

00:26:11

▶ And what we're seeing is that Americans energy bills are up over 35% now.

我们看到美国家庭能源账单涨幅已超35%。

▶ Renewables is not to blame for all of that.

这并非全是可再生能源的过错。

▶ We've had a massive infrastructure cancellation movement that's prevented us from getting energy infrastructure built.

大规模取消#基础设施#的运动阻碍了能源#基础设施#的建设。

▶ That's the root cause of this issue.

这才是问题的根源。

▶ But when you step back and look at how much how big of an impact this has had, we spent over \$2 trillion on renewables last year.

但退一步看其影响程度：去年全球可再生能源投资超2万亿美元。

00:26:32

▶ And put that in perspective, we spent over \$1.3 billion in oil and gas.

对比之下，油气领域投资超1.3万亿美元。

▶ The the energy solution that provides 80 year \$2 trillion in renewables.

提供全球80%能源的解决方案...可再生能源投入2万亿美元？

▶ What do you mean?

您的意思是？

▶ We spent the world invested over \$2 trillion in renewables buildout and yeah, and then for comparison, oil and gas investments that that provides over 80% of the world's energy.

全球可再生能源建设投资超2万亿美元，而提供全球80%以上能源的油气领域投资为1.3万亿美元。

00:26:56

▶ We invested over \$1.3 trillion.

我们投资了超1.3万亿美元。

▶ So this has been a very big theme.

这已成为重要趋势。

▶ But it shows to you that people are this is the future is renewables.

但这表明人们认为可再生能源代表未来。

▶ That's where they're spending money.

资金正流向该领域。

▶ Is that what you're saying?

您是这个意思吗？

▶ If you went by where people were spending money, that does not necessarily mean what's going to be the future.

若仅以资金流向判断未来并不绝对可靠。

▶ The future of energy is going to be the energy solution that is affordable, reliable and clean, and has all three of those attributes in check.

未来的能源解决方案必须兼具经济性、可靠性与清洁性，三者缺一不可。

00:27:19

▶ I think the energy transition maybe has prioritized the clean aspects of energy.

我认为能源#转型#可能过度侧重清洁性。

▶ But as we're seeing right now, Americans are scratching their heads looking to see the record amounts of energy investments that we're making, and they're record amounts of energy production in this country.

但眼下美国人正困惑地看着创纪录的能源投资与产量。

▶ And their energy bills are up 35%.

他们的能源账单却上涨了35%。

▶ They're scratching their heads.

这令人费解。

00:27:37

▶ Why is this happening?

为何如此？

▶ It's because the solutions that we're putting on the field need to be the right solutions, and that is natural gas.

因为现场实施的解决方案必须正确得当，而天然气正是答案。

▶ But it's also because, as you said, the demand has gone up for years.

但如您所言，这也因需求持续增长。

▶ It was it was kind of flat, it was stable.

需求原本平稳。

▶ And then we saw this huge increase in demand for power here in the U.S.

随后美国电力需求激增。

▶ So demand has a lot to do with it, too.

所以需求也是重要因素。

00:27:53

▶ Well, demand hasn't really started to pick up just yet.

其实需求尚未真正起步。

▶ We're coming out of it.

我们正处于起步阶段。

🎧 I think we're looking at massive growth prospects.

我认为增长前景巨大。

🎧 But this really is is a repercussion from all of the the not under-investment in reliable infrastructure over the past decade.

这实则是过去十年对#可靠##基础设施#投资不足的#后果#。

🎧 Now, this country in America, since 2018, it's become almost impossible to get a pipeline built in this country.

2018年以来，美国几乎无法新建管道。

00:28:16

🎧 We own an asset called Mountain Valley Pipeline took an act of Congress to get that pipeline built.

我们拥有的"山谷管道"#资产#需国会立法才得以建成。

🎧 So infrastructure has been incredibly challenged and that has really strained markets and really put some stress on this.

因此#基础设施#建设面临巨大挑战，这严重#制约#了市场，造成压力。

🎧 So let's talk about those challenges.

我们来谈谈这些挑战。

🎧 Are you having constructive conversations?

是否在进行#建设性#对话？

🎧 Are you having any conversations with the Trump administration or representatives from the Trump administration to try to ease those regulatory delays so this administration truly understands how important, affordable and reliable is in the energy equation?

是否与特朗普政府或其代表沟通以缓解监管延迟？是否让现政府真正理解经济性与可靠性在能源体系中的重要性？

00:28:44

▶ You know, Secretary Wright, fabulous, really understands energy, all forms of energy.

赖特部长#极其出色#，真正懂能源（包括所有形式）。

▶ So I think we're going to have some some a practical approach towards energy solutions that we put in place.

相信我们将采取务实态度推进能源解决方案。

▶ But that being said, the executive branch is not going to dictate the types of energy that we put in this country we're going to need.

但行政部门不应强制规定能源类型。

▶ Congress to act to pass meaningful reform so we can get back to getting the most cost effective, reliable, cleanest form of energy.

需要国会推动实质性改革，从而回归最具成本效益、最#可靠#、最清洁的能源形式。

00:29:08

▶ Do you consider wind power a form of energy?

您认为风能属于能源吗？

▶ Absolutely.

当然。

▶ It doesn't seem like this administration supports that.

但现政府似乎并不支持。

▶ I mean, is that a mistake?

这是否是个错误？

▶ Well, I would say it's as a as a sponsor of a pipeline value pipeline that has had has been subjected to tremendous political force.

作为曾承受巨大政治压力的管道项目推动者，我认为应让市场力量决定能源发展，政治力量退居次位。

▶ This is a situation where I think we would be in a much better place if we were let market forces dictate the energy that makes it way to the playing field, let political force take the backseat.

若如此，我们的处境会好得多。

00:29:32

▶ Unfortunately, we are going to need some help from our leaders in Washington, D.C.

遗憾的是，我们仍需华盛顿领导层的帮助。

▶ I hope they notice that we've got a massive demand surge coming.

希望他们注意到需求#激增#在即。

▶ We do not have the right infrastructure set up right now.

当前我们缺乏合适的#基础设施#。

▶ We need to do a massive build out.

需进行大规模建设。

▶ And just for people to understand the race that we're in right now, this is a national security threat for us.

需让民众明白：我们正参与的是一场关乎国家安全的竞赛。

00:29:49

▶ We have got to win the race for air.

必须赢得这场空中竞赛。

▶ And right now, how we're faring in the U.S., where we put in six gigawatts of reliable power generation.

目前美国仅新增6吉瓦#可靠#发电能力。

▶ This last year, China put over 60 gigawatts of reliable power and most of that coal.

去年中国新增超60吉瓦#可靠#发电能力（多为煤电）。

▶ So we are not keeping pace.

我们未能跟上#步伐#。

▶ We need to do a lot more.

必须加倍努力。

▶ Just want to go back to cost just because it's cheap.

再谈成本问题：不能只因廉价就选择。

00:30:09

▶ And I understand there's other parameters that you're putting in there.

理解您考虑其他参数。

▶ I mean, there are nat gas, there are, you know, leaks and so on and so forth that do impact the environment.

天然气存在泄漏等影响环境的问题#等等#。

▶ So it's not the cleanest and purest.

并非最清洁纯净。

▶ There are there are problems with it.

它存在缺陷。

▶ And I just wonder if we're always constantly chasing the cheapest thing out there, that's not necessarily a good thing.

质疑一味追求最低成本是否明智。

00:30:27

▶ And just bring up all the manufacturing that we've put outside the United States just because it was a cheaper good that we're finding maybe that wasn't such a good strategy.

就像为降低成本将制造业外移，如今发现并非良策。

▶ So I just want to bring that back to the energy sector that maybe sometimes things have to be expensive to get to a really, really smart solution.

因此认为能源领域或许需要承受较高成本以获得真正智慧的解决方案。

▶ I think we need to take a holistic approach when we're looking at energy and we need to look at the balance between cost reliability and the carbon footprint associated with that energy.

应采取整体视角，权衡成本、可靠性及碳足迹三者平衡。

00:30:53

▶ That's why when we look at those attributes for natural gas, that's why we believe that this is the energy solution of the future.

正因天然气在这些属性的平衡表现，我们视其为未来能源解决方案。

▶ When you look at regions that ignore and just over prioritize the clean aspects of energy, you have situations like Europe and we've seen what's happened there.

过度侧重清洁性而忽视其他的地区（如欧洲）已陷入困境。

▶ It's been it's been a crisis, thank goodness for American America and the energy that we've been able to provide them to get them through this with our So it's got to be a balanced approach.

幸有美国能源援助渡过危机，故必须采取平衡策略。

00:31:17

▶ It's not all going to be about cost.

不能只看成本。

▶ It's not all going to be about reliability or carbon footprint.

不能只重#可靠性#或碳足迹。

▶ It's got to be a healthy balance of three.

需实现三者的健康平衡。

▶ Right now we need to get back to the affordable, reliable.

当前需回归经济性与#可靠性#。

▶ Speaking of balance, and I just want go to your balance sheet because there is a spend, right?

谈到平衡，请看资产负债表：存在支出对吧？

▶ Everybody's doing it because they are chasing this.

各方都在为追逐目标而投入。

00:31:31

▶ I spend and trying to be there in terms of support.

我们投入资金以提供支持。

▶ You guys have talked about working down to a 2026 year end debt target of 5 I think that was after the equity.

贵公司提及2026年底将债务目标降至50亿（应是股权融资后）。

▶ Lansdale Tell us about what you're considering to help prop up your balance sheet.

兰斯代尔，请谈谈你正在考虑如何#支撑#资产负债表。

▶ And just got about 30 seconds, 3 seconds, 30, 30, 30 seconds.

现在只剩下大约30秒，3秒，30秒，30秒，30秒。

▶ I'll tell you what our what our priorities, what our priorities are right now, ensure the reliable production of energy.

我来告诉你我们当前的首要任务——确保能源的#可靠#生产。

00:31:52

▶ Right now, we produce a little bit over a million barrels a day of energy.

目前我们每日能源产量略超一百万桶。

🎧 So anything that you need to do to meet that for now, I'm worried about the span for maintenance, for maintenance volumes levels.

因此当前为实现目标所需的一切措施中，我担忧维护工作的#时间跨度#对维护量级的影响。

🎧 We're going to be reliably providing the future by signing up these these growth contracts both on LNG and the data said build out.

我们将通过签署液化天然气和数据中心建设的增长合同，为未来提供可靠保障。

00:32:08

🎧 And from a from a cleanliness perspective, we've already made the investments and we've already slash our methane emissions.

从#清洁#角度而言，我们已完成投资并大幅#削减#了#甲烷#排放。

🎧 We've got one of the best environmental programs, but sounds like the spend the debts.

我们拥有最优秀的环境项目之一，但听起来像是在消耗储备。

🎧 Okay.

好的。

🎧 For now.

目前如此。

🎧 Yes.

是的。

🎧 Okay.

好的。

🎧 I'm going to leave it there.

我就说到这里。

🎧 Toby Rice, president, CEO of Ekerete he Kuti.

托比·赖斯，埃克雷特·库蒂公司的总裁兼首席执行官。

00:32:22

▶ When we come back, we get another view from the c-suite.

稍后回来，我们将聆听另一位#高管层#的见解。

▶ We talk with president ceo of siemens USA.

接下来是与美国西门子总裁兼首席执行官的对话。

▶ That's next.

即将播出。

▶ It's 240 on Wall Street with you.

华尔街时间下午4点整。

▶ Check markets all day long.

全天市场动态尽在掌握。

▶ Here at Bloomberg, we have got the Dow, the S&P and Nasdaq all advancing.

彭博数据显示，道指、标普和纳斯达克指数全线上扬。

▶ Traders defying calls to take a breather after a \$15 trillion stock market rally from those April lows.

交易员无视休整呼声，推动股市自四月低点实现15万亿美元的#反弹#。

00:32:50

▶ In video boosting optimism today on artificial intelligence, write to the numbers of the S&P right now up 30.

英伟达关于人工智能的公告提振今日市场#乐观情绪#，标普指数当前上涨30点。

▶ That is a gain of almost 5/10 of 1%.

涨幅近0.5%。

▶ The S&P now it's 66.94.

标普现报66.94点。

▶ The Dow up 71.

道指上涨71点。

▶ Also a record up now by about 1/10 of The Nasdaq composite index up 1.59 for NASDAQ, a record there as well, up 7/10 of 1%.

同样创历史新高，涨幅约0.1%。纳斯达克综合指数上涨1.59点，同样创纪录，涨幅0.7%。

00:33:14

▶ Ten year, 4.13%.

十年期国债收益率4.13%。

▶ Gold up \$60.

黄金上涨60美元。

▶ The up 1.6%.

涨幅1.6%。

▶ Bitcoin down 2.2%, 112,875 On Bitcoin in videos, going to invest as much as \$100 billion in OpenAI to support the infrastructure needed to power A.I.

比特币下跌2.2%，报112875美元。英伟达宣布将投资高达1000亿美元建设支持人工智能的基础设施。

▶ Again, NVIDIA shares.

再次强调，英伟达股价。

▶ They are rallying today in video up by 3.6% for on demand news 24 hours a day.

今日英伟达股价上涨3.6%。24小时点播新闻随时获取。

00:33:42

▶ you get your podcasts.

欢迎收听播客。

▶ I'm Charlie.

我是查理。

▶ Part of that is Bloomberg business flash.

以上是彭博商业快讯。

▶ All right think wind turbines, power generators and transmitters, industrial motors and gears and motion sensors.

好的，请想象风力涡轮机、发电机与传输设备、工业电机、齿轮以及运动传感器。

▶ And based on a conversation we were just having off air, even crypto and blockchain, they're all related.

根据我们刚才的非正式讨论，甚至加密货币和区块链也都与此相关。

▶ They all you got to have power.

它们都离不开电力支持。

00:34:03

▶ You do to make that crypto, to make it all happen.

是的，无论是加密货币还是其他应用，电力都是必备条件。

▶ But anyway, bigger picture, you get an idea of what Siemens USA is all about.

但总而言之，通过宏观视角你能了解美国西门子的业务核心。

▶ As the company shared with us, the U.S. unit employs about 45,000 employees, 50 states and Puerto Rico, and generated 21.1 billion in revenue in fiscal year 2024.

据公司透露，其美国分部在50个州及波多黎各雇佣约4.5万名员工，2024财年营收达211亿美元。

▶ Back with us.

欢迎回到节目。

00:34:21

▶ Delighted to have with her with us, Barbara Hampton.

很高兴邀请到芭芭拉·汉普顿。

▶ She's president, CEO of Siemens USA.

她是美国西门子总裁兼首席执行官。

▶ She's here in studio.

她现已在演播室。

▶ How are you, Caroline?

卡罗琳，您好吗？

▶ I'm thrilled to be here.

非常高兴来到这里。

▶ So thanks so much for the invitation.

衷心感谢您的邀请。

▶ Well, it's great to have you here.

很高兴您能莅临。

▶ There's a lot to get to.

我们有很多话题要探讨。

00:34:34

▶ So much coming at us.

信息量巨大。

▶ Macro, though, I would like to start your view on the environment right now.

不过宏观层面，我想先听听您对当前环境的看法。

▶ Yeah, right now what I see is a huge emphasis by business in making sure that we are protecting our future.

是的，当前我看到企业界高度重视保障未来可持续发展。

▶ We know that it's in our long term business best interest to make brilliant use of resources, make sure that we keep the future whole and, and, and ready.

我们深知，高效利用资源、为未来做好万全准备符合企业的长远利益。

00:34:59

▶ So this is what Siemens has been working on.

这正是西门子持续努力的方向。

▶ Siemens business strategy is actually built around global megatrends.

西门子的商业战略实际上是围绕全球大趋势构建的。

▶ And so creating technologies, megatrends that can drive you crazy and you can't take advantage of or not right away.

因此创造技术时，有些大趋势可能令人束手无策，无法立即把握。

▶ And there are mega trends that are like, Well, let's do it, let's run, or there or there are megatrends that aren't necessarily aligned with the views of a presidential administration.

有些大趋势会让人摩拳擦掌，有些则可能与政府观点不尽相同。

00:35:20

▶ Exactly.

确实如此。

▶ Makes it more challenging, but it's hard to argue with things that are inexorable forces.

这增加了挑战性，但面对#不可阻挡#的力量，我们很难反驳。

▶ So we know the climate is changing.

我们知道气候在变化。

▶ We know that people everywhere are aging.

我们知道全球人口正在老龄化。

▶ We know that everywhere more and more people are living in cities.

我们知道越来越多的人聚集在城市生活。

▶ Siemens brings technologies that transform the every day, enabling us to really live, manage and thrive in changing circumstances.

西门子带来的技术改变日常生活，使我们在变幻的环境中能够真正地生活、管理并#蓬勃发展#。

00:35:42

▶ So we're going to continue with energy here, and that's where I want to start.

接下来我们继续能源话题，这正是我想切入的起点。

▶ Karel mentioned wind turbines, but here in the United States, the president has made clear his view on wind power.

卡雷尔提到了风力涡轮机，但在美国，总统对风电的立场已非常明确。

▶ How much of a setback has that been for Siemens USA?

这对美国西门子造成了多大程度的#挫折#？

▶ Well, I will clarify that my colleagues at Siemens Energy obviously have taken that on.

嗯，我需要#澄清#，这部分业务显然由西门子能源的同事负责。

00:35:59

▶ And you've seen Siemens Energy thriving over the last year at Siemens AG, the U.S. entity I'm responsible for.

如您所见，西门子能源去年业绩斐然。而我负责的是西门子股份公司旗下的美国#实体#。

▶ Once those electrons are generated, we're the ones who are moving that medium voltage, low voltage.

一旦电力产生，我们负责输送中#压#和低#压#电流。

▶ We're the ones working at the grid edge, which I think is where there's so much fruitful development to be done.

我们正致力于#电网#边缘领域，我认为这里蕴藏着巨大的#丰硕#发展机遇。

00:36:18

▶ So yes, and I just loved your last interview.

所以是的，我非常欣赏您上一场访谈。

▶ We need more power.

我们需要更多电力。

▶ Everyone understands.

这是共识。

▶ We do.

确实如此。

▶ There's just insatiable demand for electrons.

对电力的需求是#永无止境#的。

▶ Actually, we're we're agnostic about how those electrons get generated.

实际上，我们对发电方式持#中立#态度。

▶ What we want to do is move those to where they're used best.

我们的目标是将电力输送到能发挥最大效用的地方。

▶ Think data factories think they are the kind of data centers we've been building.

想想数据工厂——我们正在建造的那些数据中心。

00:36:41

▶ Think about manufacturing coming back to the United States.

想想制造业回流美国。

▶ All of those are brilliant uses of the power that we can generate.

这些都是对发电能力的绝佳利用。

▶ What can you tell us about the air build out and what you guys are seeing firsthand?

关于AI基础设施建设，您能分享哪些一线观察？

▶ Well, it's massive.

嗯，规模极其庞大。

▶ It's massive.

确实庞大。

▶ We it is critical for the U.S. to maintain leadership in A.I..

对美国而言，保持人工智能领域的领导地位至关重要。

▶ We also know that one of the most exciting things that will happen is A.I. at the edge.

我们也知道，最令人兴奋的发展之一将是边缘人工智能。

00:37:03

▶ So you can think about a manufacturing location as a humongous generator of data.

您可以将制造现场视为一个巨大的数据#生成器#。

▶ Every factory is producing just massive amounts of data, more data than any individual could make sense of.

每个工厂都在产生海量数据，远超个人能处理的范畴。

▶ But when you bring tools like our industrial A.I. Co-pilot into the manufacturing environment, it allows users to harness that data, make better decisions, really drive their operations.

但当引入我们的工业AI助手等工具后，用户就能驾驭这些数据，做出更优决策，真正驱动运营。

00:37:30

▶ And we're seeing success all over the place.

而且我们正遍地开花地看到成功案例。

▶ What does it mean?

具体是指什么？

▶ Give us an.

请举例说明。

▶ You bring the co-pilot into what factory or whatever or what plant facility and it does what?

将AI助手引入工厂或设施后，它能做什么？

▶ Well, so the first thing it does is makes it possible for mere mortals like you and me to actually interact with automated machinery instead of having to know the programming languages.

首先，它让像你我这样的普通人无需掌握编程语言，就能直接与自动化机械交互。

00:37:48

▶ We can speak in natural language and have the AI translate into the programming language of the manufacturing equipment that allows us to employ people who maybe previously thought I could never get a job in manufacturing.

我们用自然语言下达指令，AI会将其翻译成设备编程语言。这使得我们可以雇佣那些曾认为"我永远无法在制造业就业"的人。

▶ I don't know enough.

他们可能觉得自己知识储备不足。

▶ I haven't had enough background in it.

缺乏相关背景。

▶ But now we can.

但现在我们能做到。

▶ I'll tell you that we have operations in Fort Worth, Texas, where we're actually building the electrical components that go into data centers.

我们在德克萨斯州#沃斯堡#设有工厂，生产数据中心的电气组件。

00:38:13

▶ And with that incredible demands, Right.

面对巨大的需求——

▶ The switchboards that manage that electricity.

管理电力的配电盘。

▶ We needed to hire 700 people to work in the plant.

我们需要为工厂招聘700名员工。

▶ And the local management said, let's hire retired principals and teachers first.

当地管理层决定优先招聘退休校长和教师。

▶ Let's create an onsite training program.

我们建立了现场培训计划。

▶ And now we have, you know, former pizza delivery guys, former chefs, former checkout clerks are rock stars in the manufacturing environment.

现在，前披萨送货员、前厨师、前收银员都成了制造领域的明星员工。

00:38:41

▶ You talked about the tool that your customers use when it comes to air being a co-pilot.

您提到了客户使用的AI助手工具。

▶ What about internally are you doing since we last spoke, when it comes to A.I.?

那么自上次交流后，西门子内部在AI应用方面有何进展？

▶ Oh, boy.

哦，这个问题很有意思。

▶ You know, we are in that era when no one knows where this will go.

您知道，我们正处于无人能预知AI最终走向的时代。

▶ So the encouragement at Siemens is for everyone to lean in, start learning, get familiar, get comfortable with using A.I..

因此西门子鼓励每位员工投身其中，开始学习、熟悉并适应使用AI。

00:39:04

▶ And my favorite thing at the end of a business meeting, you know, let's say we call the but the meeting ends 5 minutes early.

我最喜欢在商务会议结束时——比如会议提前5分钟结束——

▶ I turn to the team and say, What are you doing with A.I.?

我会转向团队询问："你们最近用AI做了什么？"

▶ And I've heard the most amazing things, like the fine arts team, who said, Well, we just generated the balance sheet that we just reviewed with.

我听到过最精彩的回答，比如艺术团队说："我们刚用AI生成了刚才审议的资产负债表。"

00:39:20

▶ So it's much more informal than it is formal right now.

所以目前更多是非正式探索而非正式部署。

▶ It is.

确实如此。

▶ And I'll tell you why.

我来解释原因。

▶ It's important that we learn.

学习阶段至关重要。

▶ And some people would say, Oh, no, no, I want to control that.

可能有人会说需要严格控制。

▶ I want to make sure that we're sharing best practices.

希望确保最佳实践共享。

▶ Yeah, yeah, yeah.

这些固然重要。

▶ All that's good.

但首先——

00:39:33

▶ But first first, let's push the edges and see what we can do.

首先要做的是突破边界，探索可能性。

▶ Do you think is going to make us all

您认为这会让我们所有人——

▶ Idiots?

白痴吗？

▶ No.

不是。

▶ I think about what you said about anybody who doesn't even know the coding program can get there and talk and have a conversation.

我在想你所说的，关于任何甚至不懂编程程序的人都能去那里交谈和对话。

▶ And I just.

而我只是。

▶ I have this fear that we're just going to rely on A.I. to do it.

我担心我们只会依赖人工智能来做这件事。

00:39:51

▶ Don't be afraid.

别害怕。

▶ Here's what I'm not.

这就是我所不担心的。

▶ Does not afraid.

并不害怕。

▶ And I've played with it and I'm blown away with.

而且我试用过它，我被深深震撼了。

▶ But I also can see how as you get smarter and smarter and smarter and more specific in terms of fields that it can do, it will make you more and more powerful then as you go.

但我也能看到，随着它在所能涉及的领域变得越来越聪明、越来越专业，它也会让你在这个过程中变得越来越强大。

▶ So think about A.I. as that super tool that will take the least among us, those with the least amount of background and expertise, and give us the knowledge and power to perform at a higher level.

所以，把人工智能看作是一种超级工具，它将接纳我们中最弱势的群体，那些背景和专业知识最薄弱的人，并赋予他们知识和力量，使其能够在更高水平上发挥作用。

00:40:20

▶ Hmm.

嗯。

▶ Yeah.

是的。

▶ This.

这个。

▶ This is going to be so exciting to see.

这将是令人非常兴奋的。

▶ Then what do experts do with this additional power?

那么专家们如何利用这种额外的力量呢？

▶ How far can they push?

他们能推进到什么程度？

▶ Makes me wonder if we're going to need sophisticated workers from outside the U.S..

这让我怀疑我们是否还需要从美国以外引进#技术娴熟的#工人。

▶ Perfect segue me to talk about H1-B visas, because that is where we want to.

这正好让我可以谈谈H1-B签证，因为这正是我们想讨论的。

00:40:35

▶ And we're trying to ask everyone we talk to about what stemming from the confusion Friday and through the weekend, how do you use H-1B visas at Yeah, we do.

我们试图询问我们交谈过的每个人，关于上周五开始并持续整个周末的混乱所引发的问题，你们是如何使用H-1B签证的？是的，我们使用。

▶ We bring people from all over the world who have special knowledge on the things that we're, you know, today, I would say less than 5% of our population in Siemens USA is folks on H-1B visas.

我们从世界各地引进对我们所从事领域有专门知识的人才，你知道，今天，我想说我们在美国西门子的员工中，持H-1B签证的人不到5%。

▶ But that's a that's a number that's a great number.

但这数字是个很好的数字。

00:40:58

▶ And and the point is that we're global.

关键点在于我们是全球性的公司。

▶ What we are what we're working on is making sure we share lessons learned, you know, bringing people to the U.S. for experiences and then obviously sharing their knowledge that workers have with a new potential \$100,000 fee associated with these visas, it'll factor in to the business case analysis.

我们正在做的是确保我们分享经验教训，你知道，把人们带到美国获得经验，然后显然分享他们的知识。如果这些签证附带一项可能的新增10万美元费用，这将被纳入商业案例分析中。

▶ Would you still have 5% of your workforce have these visas?

你们还会让5%的员工持有这些签证吗？

00:41:19

▶ We'll have to see.

我们得看看。

▶ We'll have to see.

我们得看看。

▶ You know, I want to see how this develops.

你知道，我想看看事态如何发展。

▶ And we are working to make sure, first of all, that our employees are in good shape, you know, that they're able to travel and and really accomplish the mission is the reason you have those employees, because you cannot find those employees in the US.

我们正在努力确保，首先，我们的员工状况良好，你知道，他们能够出差并真正完成任务，这就是你雇佣这些员工的原因，因为你在美国找不到这样的员工。

00:41:36

▶ In some cases it is.

在某些情况下是这样。

▶ In some cases it is that we want to give people the global experience that's going to really make them more effective and understanding.

在某些情况下，是我们想给人们全球性的经验，这将真正使他们更有效率和更具理解力。

▶ Here's what the U.S. can produce as we address markets elsewhere.

这就是我们在应对其他市场时，美国所能提供的。

▶ You said you're going to do the financial analysis.

你说过你会做财务分析。

▶ Could it mean that that \$100,000 fee, if you guys want those workers, that it's going to feed into costs and higher costs of things?

这是否意味着，如果你们想要那些工人，那10万美元的费用将转嫁到成本上，导致东西更贵？

00:41:56

▶ Just quickly, the I, I think this is going to be part of an ever changing equation.

简单说，我，我认为这将成为不断变化的#方程式#的一部分。

▶ Our our labor costs obviously are a big portion of what we do at Siemens.

我们的劳动力成本显然是我们西门子业务的一大组成部分。

▶ Right.

是的。

▶ And so this is I would tell you that our export controls colleagues have been our heroes this year.

因此，我想告诉你，我们负责出口管制的同事今年是我们的英雄。

▶ I bet.

我敢打赌。

▶ I bet they're on speed dial.

我敢说他们是#快速拨号#上的常客。

00:42:18

▶ Barbara, thank you so much.

芭芭拉，非常感谢你。

▶ Barbara Compton, president and CEO of Siemens USA, joining us right here on Bloomberg Businessweek Daily.

美国西门子公司总裁兼首席执行官芭芭拉·康普顿，在彭博商业周刊每日节目中与我们连线。

▶ When we come back, quick check on the trade and stocks on the move.

稍后回来，我们将快速查看贸易动态和异动股。

▶ This is Bloomberg.

这里是彭博社。

▶ This is Bloomberg Businessweek Daily with Carol Massar and Tim Stent event on Bloomberg Radio and Television.

这里是彭博商业周刊每日节目，由卡罗尔·马萨尔和蒂姆·斯坦特在彭博电台和电视台主持。

00:42:41

▶ All right, everybody.

好了，各位。

▶ Coming up on the last hour of trading on this Monday, September 22nd, 2025, Carol Massar Tim Stanwick Hey, we've got a rally underway and we're looking at records on the s&p, the dow and I believe the nasdaq 100 up about 30 points on the S&P 566 93.

时间来到2025年9月22日这个星期一的最后一个交易小时，卡罗尔·马萨尔和蒂姆·斯坦特维奇，嘿，市场正在上涨，我们看着标普、道指创纪录，我相信纳斯达克100指数也在上涨。标普指数上涨约30点，报566.93点。

▶ Dow Jones industrial average, a gain of more than 80 points.

道琼斯工业平均指数上涨超过80点。

00:43:03

▶ It is at 46,003 98.

报46,003.98点。

▶ Nasdaq 110, up about half a percent, 137 points to the upside.

纳斯达克指数上涨约0.5%，上涨137点。

▶ So it wasn't like this a few hours ago, but we've just been building momentum and pretty much hovering near the highs of the session.

几小时前还不是这样，但我们一直在积聚动能，并且基本徘徊在日内高点附近。

▶ We're also getting a view from another company later today.

稍后我们还将获得另一家公司的观点。

▶ Firefly Aerospace is reporting earnings after the bell.

萤火虫#航空航天#公司将在收盘后公布#财报#。

00:43:21

▶ This will be their first earnings report as a publicly traded company.

这将是他们作为上市公司后的第一份#财报#。

▶ So we're going to stay on that one.

所以我们会继续关注这个。

▶ Looking forward to that.

期待。

▶ I'm Carol Massar along with tim stanwick.

我是卡罗尔·马萨尔，与蒂姆·斯坦特维奇一起主持。

▶ Let's get to some stocks on the move today.

让我们来看看今天的一些异动股。

▶ With us is bloomberg news process that reporter emily griffo and nvidia.

和我们一起的是彭博新闻社记者艾米丽·格里夫，还有英伟达。

▶ Yeah, it's moving a little bit.

是的，它有点波动。

00:43:39

▶ It's moving a little bit.

它有点波动。

▶ When we have a company this big, a little bit in percentage wise is a lot of billions of dollars moving but I'm watching.

当我们有这么大一家公司时，百分比上的一点点变动就是数十亿美元的资金流动，但我正关注着。

▶ Nvidia ticker Nvidia.

英伟达，股票代码英伟达。

▶ It hit a record intraday high today above \$184 a share, currently up about 3.5% after the chipmaker said it plans to invest \$100 billion in OpenAI, which of course is the parent company of GPT.

这家芯片制造商表示计划向OpenAI投资1000亿美元后，其股价今日创下每股184美元以上的盘中历史新高，目前上涨约3.5%。OpenAI当然是GPT的母公司。

00:44:05

▶ And it's going to be used to support new data centers and other infrastructure.

这笔资金将用于支持新的数据中心和其他#基础设施#。

▶ I feel like we were just talking about NVIDIA making partnerships.

感觉我们刚才还在讨论英伟达建立合作伙伴关系。

▶ It was just Friday, right, that NVIDIA agreed to invest \$5 billion in Intel.

就在上周五，对吧，英伟达同意向英特尔投资50亿美元。

▶ Well, now \$100 billion are going to OpenAI history here.

而现在1000亿美元要投向OpenAI，这可是历史性的。

▶ You're going to be listed a billion.

你将看到以十亿计的数字。

00:44:27

▶ The hundred.

这1000亿。

▶ The billions are not in limited.

这数十亿可不是有限的。

▶ Now, in video, the company has \$56.7 billion in cash and cash equivalents on its balance sheet.

现在，根据财报，英伟达资产负债表上有567亿美元的现金及现金等价物。

▶ Well, they just committed a hundred billion to open it.

嗯，他们刚刚承诺了1000亿给OpenAI。

▶ So how does that work?

那这怎么操作呢？

▶ It's a letter of intent.

这是一份#意向书#。

▶ How does that work?

这怎么操作呢？

▶ I intend to do this right.

我打算这么做，对吧。

00:44:45

▶ Yes, but we'll see in reality.

是的，但我们还得看实际情况。

▶ And Nvidia will also be receiving and it's going to happen.

而且英伟达也将获得...这事会发生。

▶ It's not going to be 100 billion all at once.

这1000亿不会一次性全部投入。

▶ From my understanding.

据我理解。

🎧 Bloomberg is reporting that NVIDIA will receive equity in OpenAI as part of the deal, according to people familiar with the arrangements.

彭博社报道，据知情人士透露，作为交易的一部分，英伟达将获得OpenAI的股权。

🎧 And the goal here is to deploy at least ten gigawatts of NVIDIA systems for OpenAI infrastructure.

这里的目标是为OpenAI的#基础设施#部署至少十吉瓦的英伟达系统。

00:45:09

🎧 I thought it was interesting what Cfra They upgraded the stock to strong buy.

我觉得CFRA的做法很有意思，他们将该股评级上调至强力买入。

🎧 They already had a buy rating, moved it up to strong buy.

他们原本的评级就是买入#评级#，现在上调至强力买入。

🎧 They really like it.

他们真的很看好。

🎧 Exactly.

确实。

🎧 And they said the analyst over there, the combination of the OpenAI partnership and a potential RE entry into China at some point among other factors, has the potential to still drive notable upside to our assumptions.

他们那边的分析师说，OpenAI的合作关系以及可能在未来某个时候重新进入中国市场等因素结合，仍有潜力显著推动股价超越我们的预期。

00:45:31

🎧 That would mean the stock in India, right?

那是指英伟达的股票，对吧？

🎧 Well, pull where you want to go.

嗯，选你想去的地方吧。

▶ I want to go to Oracle.

我想去看看#甲骨文#。

▶ Let's go to Oracle.

我们去看看#甲骨文#吧。

▶ Okay, so this is another tech stock that's moving higher today.

好的，这是今天另一只上涨的科技股。

▶ Ticker.

股票代码。

▶ Oh, r c owl jumped up about 5% right now.

哦，ORCL（#甲骨文#）现在跳涨了约5%。

▶ And it's all on optimism about the software firm's role in a potential deal for tech talk.

这完全是由于市场对这家软件公司在TikTok潜在交易中扮演角色的#乐观情绪#。

00:45:53

▶ So Bloomberg reported that a White House official said Oracle would recreate and provide security for a new U.S. version of Tiktok's algorithm.

彭博社报道，一位白宫官员表示，#甲骨文#将为中国所有的TikTok出售给美国投资者财团的交易中，重新创建并为新美国版TikTok的算法提供安全保障。

▶ Under that deal, taking shape to sell Chinese owned TikTok to a consortium of American investors, that seems to be moving the stock.

这项正在成形的交易旨在将中国拥有的TikTok出售给一个美国投资者#财团#，这似乎是推动股价变动的原因。

▶ There is also some Oracle specific management moves they did promote to executives to become co-chief executive officers.

此外还有一些#甲骨文#特有的管理层变动，他们确实提拔了两位高管成为联席首席执行官。

00:46:19

▶ I think I'm going to butcher this name.

我觉得我会#念错#这个名字。

▶ Tim.

蒂姆。

▶ I don't know if you can say this.

我不知道你能不能念对这个。

▶ Clay Mudd, Jurich and Mike Silica will become co-chief executive officers.

克莱·马德、尤里奇和迈克·西里卡将成为联席首席执行官。

▶ I'm getting the thumbs up.

我得到确认了（大拇指）。

▶ Signed.

签了字（确认无误）。

▶ Well, yeah.

嗯，是的。

▶ That wasn't planned, was it?

这不是计划好的，是吗？

00:46:33

▶ The executive changes also or.

这个高管变动也...或者。

▶ Yeah, my understanding is it's not.

是的，我的理解是不是（计划好的）。

▶ Analysts were largely positive, though.

不过，分析师们大体上是持积极态度的。

▶ Well, don't forget, Safra Catz was co-CEO with Mark Hurd.

嗯，别忘了，萨弗拉·卡茨曾与马克·赫德担任联席首席执行官。

▶ Right.

对的。

▶ Years ago.

多年前。

▶ Right.

对的。

▶ And then Mark Hurd passed away, I believe, in 2019 and then suffer.

然后马克·赫德，我相信是在2019年去世了，然后萨弗拉...

00:46:49

▶ Catz was the only CEO Larry Ellison at the time, said he would keep her as the only CEO.

卡茨成了唯一的CEO，当时拉里·埃里森说他会让她继续担任唯一CEO。

▶ And now to CEOs again.

现在又变成两位CEO了。

▶ So going back to that, that plan.

所以又回到了那个计划。

▶ All right, Oracle, we're watching.

好了，#甲骨文#，我们正关注着。

▶ That one's rallying better.

那只股票涨得更好。

▶ Who's that?

那是谁？

▶ We're going to end on a fun note.

我们要以一个有趣的话题结束。

▶ Can I call it fun when a stock is moving in triple digits?

当一只股票出现三位数百分比波动时，我能称之为有趣吗？

00:47:11

▶ Anything Anytime we talk about Eric Jackson, I think it's interesting.

任何时候我们谈到埃里克·杰克逊，我觉得都很有意思。

▶ It's fun.

很有趣。

▶ Oh, I saw this.

哦，我看到了这个。

▶ So this is a digital like online home services company.

这是一家数字化的在线家居服务公司。

▶ They do online mortgages.

他们办理在线抵押贷款。

▶ You can refi your home online.

你可以在网上为你的房子办理再融资。

▶ The ticker is BTR.

股票代码是BTR。

▶ It was up as much as 175% today.

它今天涨幅一度高达175%。

00:47:31

▶ That wasn't even.

这甚至还不是...

▶ A record because it was up to as much as 200% back in 2023.

创下纪录是因为它在2023年曾涨幅高达200%。

▶ And it's all after a Canadian investor that I know.

这一切都源于我认识的一位加拿大投资者。

▶ You guys have spoken to Eric Jackson.

你们和埃里克·杰克逊聊过。

▶ Yeah.

是的。

▶ He used to not be a meme stock either.

他以前也不是迷因股。

▶ Like he's got a tiny hedge fund and to right MJ Capital he tweeted that he's long on better.

比如他有个小型对冲基金，并在MJ Capital的推文中表示他做多Better。

00:47:59

▶ And he called the company the Shopify of mortgages.

他将这家公司称为抵押贷款界的Shopify。

▶ You know, in reading about him, I get a sense that he he is kind of accidentally in the meme stock me.

了解他的经历后，我感觉他有点意外地卷入了迷因股热潮。

▶ I think he's I think he is harness the power of social media and he's seen the power of social media.

我认为他正在利用社交媒体的力量，并且见识到了社交媒体的威力。

▶ I think so too.

我也这么认为。

▶ He's got he's gained a big following.

他已经获得了大量关注。

00:48:14

▶ And now suddenly we're seeing meme stock volume in this company and meme stock moves here in Better Home.

现在这家公司突然出现迷因股交易量，Better Home也出现迷因股波动。

▶ It's an \$832 million market cap right now, even with the increase today.

即便今日上涨后，其当前市值也仅为8.32亿美元。

▶ Yeah, and it did pare those gains, but it's still up about 60% today.

是的，虽然涨幅有所#收窄#，但今日仍上涨约60%。

▶ And of course, this follows Eric Jackson's move on Opendoor technology, sparking a meme stock style rally in that stock a couple of months ago.

这显然是继埃里克·杰克逊操作Opendoor科技股后，两个月前引发该股迷因式上涨的延续。

00:48:41

▶ Love it.

真精彩。

▶ Love it.

太棒了。
