00:00:07

Prime Minister Carney's new cabinet was sworn in this week.

卡尼总理的新内阁本周宣誓就职。

He has gender parody in his inner circle.

他的核心团队实现了性别平等。

And the prime minister also appointed an AI minister to talk more about this and other topics.

总理还任命了一位人工智能部长来进一步讨论这一议题及其他话题。

So let's bring in Retesh Coteek, cyber security and tech analyst.

现在有请网络安全与技术分析师雷泰什·科泰克。

[Back to Top](#)

 00:00:21

Hi there Retesh.

你好，雷泰什。

Hello.

你好。

What does this move mean for the development of artificial intelligence within Canada?

这一举措对加拿大人工智能的发展意味着什么？

I believe that this is a significant move and a clear signal that artificial intelligence is a top priority for this new government.

我认为这是一个重要举措，明确表明人工智能是新政府的首要任务。

[Back to Top](#)

 00:00:37

I think by actually appointing a minister, there's some very there's some very big issues that have to be addressed when it comes to uh fostering innovation, having some sort of framework, this idea of responsible AI, these are all topics that have been discussed but no real action has been taken.

通过实际任命一位部长，我认为在促进创新、建立框架、负责任的人工智能等重大议题上，尽管已有讨论但尚未采取实际行动。

And I think by actually appointing someone who is now in charge, maybe we can get some legislation, maybe we can get some framework and really push this forward because this is

the new arms race and clearly a major topic for the new government.

通过任命专人负责，我们或许能推动立法和框架制定，真正推进这一议题，因为这是新的竞争焦点，也是新政府的重点议题。

 00:01:08

Let's move on to uh tech giant Apple.

接下来谈谈科技巨头苹果。

It's introducing new accessibility features including accessibility nutrition labels.

苹果正在推出新的无障碍功能，包括无障碍营养标签。

Tell us more.

请详细说明。

So, Apple has been leading the way when it comes to accessibility um on their devices and now with the latest advancements in chipsets, you're actually able to do more processing right on the device.

苹果在设备无障碍功能方面一直领先，随着芯片组的最新进展，现在可以直接在设备上进行处理。

[Back to Top](#)

 00:01:29

Now, with more processing also comes the ability to add new features and one of those relates to accessibility.

更强的处理能力也带来了新增功能的可能，其中之一与无障碍相关。

So, what that allow individuals to do is leverage better magnifying glasses.

这使得用户能够利用更好的放大镜功能。

Um, so you're able to zoom in on text, remove distraction and noises.

可以放大文本、消除干扰和噪音。

[Back to Top](#)

 00:01:46

And the other big thing is when you go and download an app, there's now going to be nutrition labels.

另一项重要功能是下载应用时会出现营养标签。

So, we've seen privacy labels before, uh, which tells us about what type of data the app is collecting.

此前已有隐私标签，说明应用收集的数据类型。

Well, now we're going to have accessibility labels, and these labels are going to tell us what accessibility features are actually on the app, thus allowing the user to make a more informed decision before hitting download.

现在将有无障碍标签，说明应用实际具备的无障碍功能，帮助用户在下载前做出更明智的决定。

[Back to Top](#)

 00:02:10

What else has Apple been working on?

苹果还在进行哪些工作？

So, Apple has been working a lot on the health space, and we've seen this with their latest releases of their app, the Apple um watch, which allows for sleep apnea detection.

苹果在健康领域投入很多，最新发布的Apple Watch应用支持睡眠呼吸暂停检测。

There's also AirPods that they really they wanted to have the ability to act as hearing aids.

AirPods也试图具备助听器功能。

[Back to Top](#)

 00:02:31

Now, this is something that's under review, has not been approved in Canada.

目前该功能正在审核中，尚未在加拿大获批。

It has been approved in other countries.

已在其他国家获得批准。

And it really speaks to this idea of AI devices and big tech working together to make our lives safer and healthier.

这体现了AI设备与大型科技公司合作让生活更安全健康的理念。

Retesh, many of us have received these.

雷泰什，很多人都收到过这类信息。

[Back to Top](#)

 00:02:50

Now, Google has a solution for those unpaid toll tech scams.

谷歌现在针对未付费通行费诈骗提供了解决方案。

Will it work?

这会有效吗？

Do you think?

你认为呢？

I I think it will.

我认为会的。

Here's the thing is that the bulk of these messages that we receive, I'm sure we've all received it with those text messages saying, "Click here. You have an upcoming bill. You have a uh a new tracking uh link for a package that's coming."

关键在于我们收到的大部分信息，比如“点击这里，你有未付账单”或“新包裹追踪链接”等短信。

[Back to Top](#)

 00:03:11

It's it's literally in overdrive.

这类信息简直泛滥成灾。

And sometimes these messages seem very um they seem accurate and they're becoming much more sophisticated.

有时这些信息看起来非常逼真，且手法日益复杂。

Well, now with technology right on the device, these apps and devices are able to potentially detect, and that's what Google is doing.

现在通过设备端技术，这些应用和设备能够进行潜在检测，这正是谷歌的做法。

[Back to Top](#)

 00:03:28

They want to detect these messages to inform users, hey, wait a second.

谷歌希望检测这些信息并提醒用户：等等。

We know you got this text message, but based on our algorithm, based on all the information we've collected, this is probably a scam.

根据算法和收集的信息，这条短信很可能是诈骗。

Beware.

请警惕。

So, I am certain that this is going to continue to evolve.

我确信这一技术会持续发展。

[Back to Top](#)

 00:03:41

I know fraudsters are going to try to find ways of working around uh working around these systems, but it is a start and anything we can do to help our citizens for being victimized is a step in the right direction.

虽然诈骗者会试图绕过系统，但这是一个开端，任何帮助公民避免受害的措施都是正确的方向。

How true Retesh.

说得太对了，雷泰什。

Always appreciate your insights.

感谢你的见解。
