

The Future of Robotics: A Glimpse at the 2025 World Robot Conference

【中国展现AI领域的全球领导力 外媒报道中国最先进的机器人技术】

Summary: The 2025 World Robot Conference in Beijing showcased over 200 cutting-edge robotic designs, focusing on "embodied intelligence" – AI with physical forms. Half a million attendees witnessed robots performing tasks like music, combat, and factory work, while China positions itself as a global leader in AI and robotics. Despite some limitations in current capabilities, massive government investments suggest rapid advancements are imminent.

摘要： 2025年北京世界机器人大会汇聚200余家厂商，以"具身智能"为主题展示前沿科技成果。50万观众围观机器人弹琴、格斗、工厂作业等场景，中国正展现其AI领域的全球领导力。尽管当前技术仍有局限，但巨额政府投入预示革命性突破即将到来。

00:00:00

▶ What does the latest in advanced robot technology look like?

最新的先进机器人技术是什么样子的？

▶ Well, it looks something like this and this or this.

嗯，它看起来像这样、这样或这样。

▶ I'm at the 2025 World Robot Conference in Beijing and here more than 200 companies are showcasing their designs.

我正在北京参加2025年世界机器人大会，这里有200多家公司展示他们的设计。

▶ The theme of this conference is embodied intelligence.

这次会议的主题是具身智能。

▶ artificial intelligence like the AI chatbots many people have on their phones except with a human or animal like body.

这是一种人工智能，就像许多人手机上的AI聊天机器人，只不过它拥有类似人或动物的身体。

00:00:32

▶ Hello.

你好。

▶ Hi.

嗨。

▶ Half a million people have come to see the machines on display at this 5-day event.

有50万人前来参观这场为期5天的活动展出的机器。

▶ I asked this boy what he thought.

我问这个男孩他的想法。

▶ I think they're great.

我觉得它们很棒。

▶ They can do many things.

它们能做很多事情。

▶ bend down and a lot of movements people can do.

弯腰和许多人类能做的动作。

▶ And these robots are designed to impress.

这些机器人的设计是为了让人印象深刻。

00:00:58

▶ They can play music [Applause] and even fight.

它们能演奏音乐[掌声]甚至打架。

▶ China wants to portray itself as a world leader in these kinds of technologies.

中国希望将自己描绘成这类技术的世界领导者。

▶ But apart from being quite entertaining, what can these robots actually do?

但除了相当有趣之外，这些机器人实际上能做什么？

▶ Can they be genuinely helpful to organ people and businesses?

它们能真正帮助普通人或企业吗？

▶ Well, this firm UB Tech says they already are.

这家名为优必选的公司表示它们已经可以了。

00:01:21

▶ These droids are working in electric vehicle factories here in China, sourcing and hauling objects.

这些机器人在中国的电动汽车工厂工作，负责搬运物品。

▶ And they've also created this robot, the Walker S2, that can sense when its power is low and change its own battery in just 3 minutes.

他们还创造了这款机器人Walker S2，它能在电量低时感知并在3分钟内自行更换电池。

▶ UX robot has like six cameras on its body.

UX机器人身上有六个摄像头。

▶ We use like a stereo camera, RGBD camera.

我们使用了立体摄像头、RGBD摄像头。

00:01:43

▶ The robot will use all those cameras to uh perceive the environment, say locate itself in the environment to see the or recognize object.

机器人会利用这些摄像头感知环境，比如定位自身位置或识别物体。

▶ But how smart are these latest robots?

但这些最新的机器人有多聪明呢？

▶ I went to find out.

我去一探究竟。

▶ Hi there.

你好。

▶ I'm Katrina, an Alazer journalist.

我是Katrina，一名Alazer记者。

▶ Nice to meet you.

很高兴认识你。

▶ Nice to meet you too, Katrina.

也很高兴认识你，Katrina。

▶ It's great to connect with a journalist from Algeria.

很高兴能与来自阿尔及利亚的记者交流。

00:02:11

▶ Turns out not too smart.

结果发现它们并不太聪明。

▶ So maybe some of us don't need to worry about our jobs just yet.

所以也许我们中的一些人还不需要担心自己的工作。

▶ But with the Chinese government pouring billions of dollars into AI and robotics development, that future may not be too far away.

但随着中国政府向人工智能和机器人技术投入数十亿美元，那样的未来可能并不遥远。

▶ In fact, it may already be here.

事实上，它可能已经到来。

▶ Katrina, you Aljira Beijing China.

Katrina，中国北京报道。

▶ Don't miss out.

不要错过。

00:02:35

▶ Get the full picture.

获取完整信息。

▶ Subscribe to Alazer for reliable news, expert insight.

订阅Alazer获取可靠新闻和专家见解。

▶ Like, share, stay ahead.

点赞、分享，保持领先。
