

剑桥雅思10 | 听力真题 Test 4 Section 4

【剑桥雅思10 | 听力真题 Test 4 Section 4 | 纳米科技的未来：颠覆性突破 | 伦理争议 | 应用前景】

Summary: Nanotechnology, the science of manipulating atoms and molecules, holds immense potential for revolutionizing fields like transportation, computing, energy, and medicine. However, its power raises ethical concerns, including fears of uncontrolled nanorobots and privacy violations. Scientists advocate for strict safety measures and responsible innovation. Applications range from unbreakable materials to ozone layer repair, showcasing its transformative impact on society and the environment.

摘要：纳米技术通过操控原子和分子，有望彻底改变交通、计算机、能源和医疗等领域。但其强大能力也引发伦理担忧，如纳米机器人失控和隐私侵犯问题。科学家呼吁严格的安全措施和责任创新。从超强材料到修复臭氧层，纳米技术的应用将深刻影响社会与环境。

▶ Section 4.

第4部分。

▶ You will hear a woman talking to a group of first-year science undergraduates about the developing science of nanotechnology.

你将听到一位女士向一群大一理科生讲解正在发展的纳米技术科学。

▶ First, you have some time to look at questions 31 to 40.

首先，你有时间看一下第31至40题。

▶ Now listen carefully and answer questions 31.

现在请仔细听并回答第31题。

▶ Today we're going to look at an important area of science, namely nanotechnology.

今天我们将探讨科学的一个重要领域，即纳米技术。

 00:01:10

▶ So, what is it?

那么，它是什么？

▶ Nano means tiny, so it's science and engineering on the scale of atoms and molecules.

“纳米”意味着微小，所以它是在原子和分子尺度上的科学与工程。

▶ The idea is that by controlling and rearranging atoms, you can literally create anything.

其理念是通过控制和重新排列原子，你几乎可以创造任何东西。

▶ However, as we'll see, the science of the small has some big implications affecting us in many ways.

然而，正如我们将看到的，微小科学具有深远的影响，在许多方面影响着我们。

▶ There's no doubt that nanotechnology promises so much for civilization.

毫无疑问，纳米技术为文明带来了巨大的希望。

 00:01:42

▶ However, all new technologies have their teething problems.

然而，所有新技术都有其初期问题。

▶ And with nanotechnology, society often gets the wrong idea about its capabilities.

而对于纳米技术，社会常常对其能力产生误解。

▶ Numerous science fiction books and movies have raised people's fears about nanotechnology.

许多科幻书籍和电影引发了人们对纳米技术的恐惧。

▶ With scenarios such as inserting little nanorobots into your body that monitor everything you do without you realising it, or self-replicating nanorobots that eventually take over the world.

比如，在你不知情的情况下将微型纳米机器人植入体内以监视你的一举一动，或者自我复制的纳米机器人最终接管世界。

 00:02:15

▶ So, how do we safeguard such a potentially powerful technology?

那么，我们如何保护这种潜在强大的技术？

▶ Some scientists recommend that nanoparticles be treated as new chemicals, with separate safety tests and clear labelling.

一些科学家建议将纳米颗粒视为新化学品，进行单独的安全测试并明确标注。

▶ They believe that greater care should also be taken with nanoparticles in laboratories and factories.

他们认为在实验室和工厂中应对纳米颗粒更加谨慎。

▶ Others have called for a withdrawal of new nanoproducts such as cosmetics and a temporary hold to many kinds of nanotech research.

其他人则呼吁撤回新的纳米产品（如化妆品），并暂停多种纳米技术研究。

 00:02:47

▶ But as far as I'm concerned, there's a need to plow ahead with the discoveries and applications of nanotechnology.

但在我看来，有必要继续推进纳米技术的发现和应用。

▶ I really believe that most scientists would welcome a way to guard against unethical uses of such technology.

我真心相信大多数科学家会欢迎一种防止此类技术被不道德使用的方法。

▶ We can't go around thinking that all innovation is bad, all advancement is bad.

我们不能总是认为所有创新都是坏的，所有进步都是坏的。

▶ As with the debate about any new technology, it is how you use it that's important.

就像关于任何新技术的争论一样，重要的是你如何使用它。

 00:03:14

▶ So, let's look at some of its possible uses.

那么，让我们看看它的一些可能用途。

▶ Thanks to nanotechnology, there could be a major breakthrough in the field of transportation, with the production of more durable metals.

得益于纳米技术，交通运输领域可能会出现重大突破，生产出更耐用的金属。

▶ These could be virtually unbreakable, lighter and much more pliable, leading to planes that are 50 times lighter than at present.

这些金属几乎无法破坏、更轻且更柔韧，从而制造出比现在轻50倍的飞机。

▶ Those same improved capabilities will dramatically reduce the cost of travelling into space, making it more accessible to ordinary people and opening up a totally new holiday destination.

这些改进的能力将大幅降低太空旅行的成本，使其对普通人更加可行，并开辟一个全新的度假目的地。

 00:03:56

▶ In terms of technology, the computer industry will be able to shrink computer parts down to minute sizes.

在技术方面，计算机行业将能够将计算机部件缩小到微小尺寸。

▶ We need nanotechnology in order to create a new generation of computers that will work even faster and will have a million times more memory, but will be about the size of a sugar cube.

我们需要纳米技术来创造新一代计算机，它们运行更快、内存增加百万倍，但体积只有方糖大小。

▶ Nanotechnology could also revolutionise the way that we generate power.

纳米技术还可能彻底改变我们发电的方式。

 00:04:23

▶ The cost of solar cells will be drastically reduced, so harnessing this energy will be far more economical than it present.

太阳能电池的成本将大幅降低，因此利用这种能源将比现在经济得多。

▶ But nanotechnology has much wider applications than this, and could have an enormous impact on our environment.

但纳米技术的应用远不止于此，它可能对我们的环境产生巨大影响。

▶ For instance, tiny airborne nanorobots could be programmed to actually rebuild the ozone layer, which could lessen the impact of global warming on our planet.

例如，可以编程微型空中纳米机器人来重建臭氧层，从而减轻全球变暖对地球的影响。

 00:04:55

▶ That's a pretty amazing thought, isn't it?

这是一个相当惊人的想法，不是吗？

▶ On a more local scale, this new technology could help with the cleanup of environmental disasters as nanotechnology will allow us to remove oil and other contaminants from the water far more effectively.

在更局部的范围内，这项新技术可以帮助清理环境灾难，因为纳米技术将使我们更有效地去除水中的油和其他污染物。

▶ And if nanotechnology progresses as expected, as a sort of building block set of about 90 atoms, then you could build anything you wanted from the bottom up.

如果纳米技术按预期发展，作为一种由约90个原子组成的积木套装，你就可以从底层开始构建任何你想要的东西。

▶ In terms of production, this means that you only use what you need, and so there wouldn't be any waste.

在生产方面，这意味着你只使用所需的东西，因此不会有任何浪费。

▶ The notion that you could create anything at all has major implications for our health.

你可以创造任何东西的概念对我们的健康具有重大意义。

▶ It means that we'll eventually be able to replicate anything.

这意味着我们最终将能够复制任何东西。

▶ This would have a phenomenal effect on our society.

这将对社会产生巨大影响。

▶ In time, it could even lead to the eradication of famine through the introduction of machines that produce food to feed the hungry.

随着时间的推移，它甚至可能通过引入生产食物以喂养饥饿人口的机器来消除饥荒。

▶ But it's in the area of medicine that nanotechnology may have its biggest impact.

但纳米技术可能在医学领域产生最大影响。

▶ How we detect disease will change as tiny biosensors are developed to analyse tests in minutes rather than days.

随着微型生物传感器的开发，我们检测疾病的方式将改变，可以在几分钟而非几天内完成分析。

▶ There's even speculation nanorobots could be used to slow the aging process, lengthening life expectancy.

甚至有人推测纳米机器人可用于减缓衰老过程，延长寿命。

▶ As you can see, I'm very excited by the implications that could be available to us in the next few decades.

如你所见，我对未来几十年可能实现的影响感到非常兴奋。

▶ Just how long it'll take, I honestly don't know.

具体需要多长时间，老实说我也不知道。

▶ That is the end of section 4.

第4部分到此结束。

▶ You now have half a minute to check your answers.

现在你有半分钟时间检查答案。

▶ That is the end of the listening test.

听力测试到此结束。

▶ In the IELTS test, you would now have 10 minutes to transfer your answers to the answer sheet.

在雅思考试中，你现在有10分钟时间将答案誊写到答题卡上。
