

Trump Imposes Sweeping Tariffs on Allies, Doubles India's Rate to 50%

【特朗普对盟友全面加征关税 | 印度税率翻倍至50% | 70国商品面临涨价潮】

Summary: The Trump administration has announced sweeping tariff hikes on nearly 70 countries, with India facing a 50% rate for purchasing Russian oil. These measures, set to take effect immediately or within weeks, mark the highest U.S. tariff rates in a century. The White House frames this as economic pressure on Russia through secondary sanctions, while India condemns the move as "unfair." Experts warn consumers will eventually bear the costs, though the administration floats potential tariff revenue rebates.

摘要： 特朗普政府宣布对近70国全面加征关税，其中印度因购买俄罗斯石油面临50%惩罚性税率。这些美国百年来最高关税措施将立即或数周内生效。白宫称此举是通过次级制裁向俄罗斯施压，印度则谴责"不公正"。专家警告成本终将转嫁消费者，而政府考虑用关税收入发放补贴。

🎵 As President Trump's sweeping tariff hikes on nearly every trading partner set to officially kicked in, the president says he's raising tariffs on a country that is also a key ally.

随着特朗普总统对几乎所有贸易伙伴全面加征关税的措施即将正式生效，总统表示他正在对一个关键盟友国家提高关税。

🎵 The president says he's doubling taxes on imports from India to 50% because India, he says, is buying oil from Russia.

总统表示，他将对从印度进口的商品征税提高一倍至50%，因为他说印度正在从俄罗斯购买石油。

▶ India is calling the escalation quote unfair, unjustified, and unreasonable.

印度称这一升级“不公平、不合理且毫无道理”。

bilibili 00:00:22

▶ Those new tariffs are set to take effect on India in 3 weeks.

这些新关税将在3周后对印度生效。

▶ But at midnight Eastern time tonight, tariffs of at least 10% are set to become reality on imports coming in from nearly 70 different countries.

但今晚东部时间午夜，对来自近70个国家的进口商品征收至少10%的关税将成为现实。

▶ That marks the highest tariff rates the US has seen in almost 100 years.

这标志着美国近100年来最高的关税税率。

▶ Let's bring in NBC News business and data correspondent Brian Chung.

让我们请进NBC新闻商业和数据记者Brian Chung。

bilibili 00:00:43

▶ Also with us, NBC News White House correspondent Monica Alba.

和我们在一起的还有NBC新闻白宫记者Monica Alba。

▶ Great to see you all.

很高兴见到大家。

▶ Monica, what are we learning about this tariff rate specifically for India?

Monica，关于这次针对印度的关税税率，我们了解到什么？

▶ And why is the president going after Russian oil right now?

为什么总统现在要针对俄罗斯石油？

🎧 Yeah, this of course has some geopolitical implications here, Kate, in addition to the economic ones.

是的，Kate，除了经济影响外，这当然还有一些地缘政治影响。

 00:01:00

🎧 And what's notable is that as the president is trying to secure a potential ceasefire between Russia and Ukraine, he's essentially threatening Russia with secondary tariffs, right?

值得注意的是，当总统试图确保俄罗斯和乌克兰之间可能的停火时，他实际上是在用次级关税威胁俄罗斯，对吧？

🎧 With these kinds of sanctions that go after countries that do business with Russia.

这些制裁针对的是与俄罗斯做生意的国家。

🎧 So that's why specifically he is slapping this higher rate on India right now because they are purchasing Russian oil that the US argues fuels the Russian war machine.

这就是为什么他现在特别对印度征收更高的税率，因为他们正在购买俄罗斯石油，而美国认为这为俄罗斯的战争机器提供了燃料。

 00:01:26

🎧 So that is why that is something that they had said would potentially take place on Friday once that deadline that had been truncated down from 50 days to 10 days for President Putin had ended.

这就是为什么他们说这可能会在周五发生，一旦给普京总统的期限从50天缩短到10天后结束。

🎧 But instead he's announcing that he's going to go forward with that now.

但他现在宣布他将立即推进这一措施。

🎧 Again, that could be a pressure tactic to try to see if there could be some resolution to that other conflict, but it also fits into this broader picture of the president deciding these tariff rates and continuing on with these decisions on trade as he has been with other countries as well, guys.

再次强调，这可能是一种施压策略，试图看看是否能解决其他冲突，但这也符合总统决定这些关税税率并继续推进这些贸易决策的更广泛背景，就像他对其他国家所做的那样。

 00:01:56

▶ Hey, Brian, you know, something that jumped out to me was the president saying that Americans might get some cash from the government because of the money coming in um from tariffs.

嘿，Brian，你知道，让我印象深刻的是总统说美国人可能会因为关税收入而从政府那里得到一些现金。

▶ Here's what he said on Friday.

以下是他在周五说的话。

▶ Let's listen.

让我们听听。

▶ a lot of people that would like to see us do sort of a dividend to the people of our country.

很多人希望我们给国民发放某种分红。

▶ It's something I'd consider.

我会考虑这一点。

 00:02:13

▶ How much would I'd also want I want to pay off debt, but there's a possibility I do a dividend.

我也想偿还债务，但也有可能我会发放分红。

▶ I mean, is that a tacit acknowledgement, Brian, that prices are going to be rising for people and there could be some pressure on the household budgets and and as tariff money is coming in, he kind of wants to give some of that to Americans.

我的意思是，Brian，这是否是一种默认，即物价将会上涨，家庭预算可能会面临压力，而随着关税收入的增加，他有点想把这些钱的一部分返还给美国人。

▶ Yeah.

是的。

 00:02:29

▶ Yeah, I mean a lot of this is kind of putting money in one hand and putting it in the other in some respects because yes, if you are giving the American people some of this as a rebate, if you will, and giving some of these savings back to the American consumer, well, that just might go into buying things that are going to cost a lot more because of the same tariffs that are leading to that revenue coming in in the first place.

是的，我的意思是，这在某种程度上是把钱从一只手放到另一只手，因为如果你把这些钱的一部分作为退税返还给美国人民，或者把这些节省的钱返还给美国消费者，那么这些钱可能又会用来购买由于同样的关税而变得更贵的东西，而这些关税正是最初带来这些收入的原因。

▶ So, what is true is that the president has said there's \$30 billion that came in from the tariffs as as as of last month.

所以，事实是总统说截至上个月，关税收入为300亿美元。

▶ That is fact check true according to what the Treasury Department has reported.

根据财政部的报告，这一数字是真实的。

 00:02:58

▶ Uh but of course where that money comes from is going to be of much debate.

当然，这些钱的来源将引发很多争论。

▶ As we know how the tariffs work, it's American companies that have to pay those increased costs.

正如我们所知，关税的工作原理是美国公司必须支付这些增加的成本。

▶ So it's not necessarily other countries.

所以不一定是其他国家。

▶ So that \$30 billion might just be coming from America itself.

因此，这300亿美元可能只是来自美国本身。

🎧 Just again going from basically the companies that are then paying it uh to potentially the consumer if it is indeed paid out as a dividend.

再次强调，这些钱基本上是从公司那里收取的，然后如果确实作为分红支付，可能会流向消费者。

 00:03:19

🎧 Another thing that's worth pointing out here is that the last time a similar idea was floated, it was with regards to savings that were made by Elon Musk Doge.

另一件值得指出的事情是，上一次提出类似想法时，是关于Elon Musk Doge节省的费用。

🎧 There was a proposal that was floated around there publicly that perhaps there would be something called a Doge dividend.

当时公开提出了一项提议，可能会发放一种叫做Doge分红的东西。

🎧 Again, very similarly, any savings coming from government cuts in terms of programs would be refunded to Americans in the form of a rebate.

同样地，任何来自政府项目削减的节省都将以退税的形式返还给美国人。

 00:03:38

🎧 I want to point out there has been no movement on that.

我想指出，这方面没有任何进展。

🎧 And even the president seemed to admit in that soundbite that we just played that the primary purpose for the tariff collections are to pay down the debt and that maybe somewhere down the line he could do this kind of dividend to pay out to the American consumer.

甚至总统在我们刚刚播放的录音中似乎也承认，征收关税的主要目的是偿还债务，也许在未来的某个时候，他可以发放这种分红给美国消费者。

🎧 But again, as you point out, this is all very much kind of a shell game of money that's kind of moving around as a result of as a result of these policies.

但正如你所指出的，这很大程度上是一种由于这些政策而导致的钱的转移游戏。

Um, Brian, with let's talk about the tariff rates that are going to go into effect tonight supposedly at midnight Eastern time.

嗯，Brian，让我们谈谈今晚东部时间午夜即将生效的关税税率。

How likely are consumers, all of us, to feel the impact of those tariffs?

我们消费者有多大可能感受到这些关税的影响？

Yeah.

是的。

Well, we are likely to impact them.

我们很可能会受到影响。

I think it's a question of when.

我认为问题是什么时候。

When you take a look at the map of all the tariff rates that are set to take effect at midnight tonight, you have to bring up a magnifying glass because there are so many countries.

当你查看今晚午夜即将生效的所有关税税率的地图时，你需要拿出放大镜，因为涉及的国家太多了。

There are about 70 countries that are going to be impacted here at different rates.

大约有70个国家将受到不同税率的影响。

And I know a lot of people might be thinking, "Wait, Brian, I thought that we had been hearing about these tariffs. They were on again, they were off again. I thought we weren't taking this seriously."

我知道很多人可能会想，“等等，Brian，我以为我们一直在听说这些关税。它们时有时无。我以为我们没有认真对待这件事。”

Well, this is the most uh uh kind of hard threat that we've seen of these tariffs taking effect because there have been negotiations with countries where there has been a finalization of these discussions to say actually you will be effectively tariffed at this rate.

嗯，这是我们看到的最严厉的关税生效威胁，因为已经与一些国家进行了谈判，并最终确定了这些讨论，表示实际上你们将按这个税率被征税。

bilibili 00:04:45

Look at a country like Vietnam where yes, even though there were discussions, there was an agreement, it's still a 20% tariff which will impact the cost of footwear, clothing that comes in so much from that country, you look at Brazil at a 50% tariff rate that can make coffee beans more expensive, but what we have seen based off of tariffs that have been put effect earlier this year, it takes months to experience.

以越南为例，尽管进行了讨论并达成了协议，但仍然有20%的关税，这将影响从该国进口的大量鞋类和服装的成本；再看看巴西，50%的关税可能会使咖啡豆更贵，但根据今年早些时候实施的关税来看，我们需要几个月的时间才能感受到影响。

So again, it's not that prices will go up immediately on Friday.

所以再次强调，价格不会在周五立即上涨。
