

Canada's July Jobs Report: Worst Numbers in Seven Years

【加拿大青年失业率破14% | 失业潮席卷全国 | 贸易战重创核心产业】

Summary: Statistics Canada's July jobs report revealed a shocking loss of 41,000 positions – the worst non-pandemic decline in seven years. Youth unemployment surged past 14%, the highest since 2010, with 34,000 young workers losing jobs. Over half of economic sectors shrank, particularly construction and export-reliant industries hit by US trade wars.

Economists now predict a 50% chance of Bank of Canada rate cuts amid rising unemployment.
