是的，正如我们刚才谈到的，未来几天会有大浪，一些巨大的涌浪，实际上海上的条件可能很危险。

🎧 All thanks to an area of low pressure out to the northwest of the country, tied up in this remnants of what was hurricane Errin, and it's really slow moving this low pressure.

这都要归因于该国西北部的一个低压区域，它与曾是飓风“厄林”的残余部分有关，而且这个低压移动得非常缓慢。

 00:09:05

⏮ Still around 12 or 13 degrees with the winds becoming more southerly into tomorrow morning as that rain band starts to arrive.
