

Trump Administration Links Tylenol Use During Pregnancy to Autism, Igniting Scientific and Medical Debate

【CNN News 20250923 孕期服用泰诺致自闭症？特朗普政府惊人声明引争议 | 专家驳斥 | 孕妇用药安全指南 | 科学共识何在？】

Summary: The Trump administration announced a potential link between acetaminophen (Tylenol) use during pregnancy and increased autism rates, a claim strongly refuted by the manufacturer and medical experts. Experts Dr. Veronica Gillespie Bell and Dr. Paul Offit defended the current scientific consensus that Tylenol is safe when used as directed, expressing deep concern over the administration's "dangerously irresponsible" suggestion for pregnant women to "tough out" fevers without medication. They highlighted that untreated fevers, especially in the first trimester, pose significant risks to fetal development. The announcement has created confusion for both patients and physicians, who now face conflicting guidance from top government officials versus established medical societies.

摘要：特朗普政府宣布孕期使用对乙酰氨基酚（泰诺）可能与自闭症发病率上升存在关联，这一声明遭到制药商和医学专家的强烈反驳。专家维罗尼卡·吉莱斯皮·贝尔博士和保罗·奥菲特博士捍卫了当前科学共识，即按说明服用泰诺是安全的，并对政府建议孕妇“硬扛”发烧而不服药表示严重关切，认为此举“极其危险”。他们强调，未经治疗的发烧（尤其在孕早期）对胎儿发育有重大风险。此声明给患者和医生带来了困惑，使他们陷入政府高层与专业医学协会指导意见矛盾的困境。

🎵 A We Are Back Now Following the Breaking News In Our Health Lead, the Trump Administration announcing a link between the use of a CEDA Minifin, which you likely know as Tylenol during pregnancy, and a rise in autism rates.

我们回到健康头条的突发新闻：特朗普政府宣布使用CEDA Minifin（即孕期泰诺）与自闭症发病率上升存在关联。

🎵 Tylenol's manufacturer responding in a statement that reads, quote, independent, sound science clearly shows that taking a CEDA Minifin does not cause autism.

泰诺生产商发表声明称：“独立可靠的科学证据明确显示，服用CEDA Minifin不会导致自闭症。

▶ We strongly disagree with any suggestion, otherwise, and are deeply concerned with the health risk this poses for expecting mothers.

我们坚决反对任何相反暗示，并对此给准妈妈带来的健康风险深感忧虑。”

 00:00:30

▶ My two medical experts are standing by Dr. Veronica Villanique, the Westwood Bellas, and OB-GYN Dr. Paul Offit is the director of the Vaccine Education Center at the Children's Hospital of Philadelphia.

我的两位医学专家已就位：维罗妮卡·维拉尼克博士（西木贝拉斯）和妇产科医生保罗·奥菲特博士（费城儿童医院疫苗教育中心主任）。

▶ It's good to have both of you with us.

欢迎二位做客节目。

▶ Dr. Gillespie, I want to start with you.

吉莱斯皮博士，我想先请教您。

▶ So the president also went on to talk specifically the health secretary, RFK Jr., said, we should leave this up to the doctors.

总统接着特别提到卫生部长小罗伯特·肯尼迪的说法：“我们应把决定权交给医生”。

 00:00:52

▶ The president for his part, I just want to play a little bit more of what he said in terms of what women should and shouldn't do.

而总统本人方面，我想再播放一段他关于女性应如何行事的讲话。

▶ Take a listen.

请听。

▶ For this reason, they are strongly recommending that women limit Tylenol use during pregnancy unless medically necessary.

因此，他们强烈建议女性在#怀孕#期间限制使用泰诺，除非医疗必需。

▶ That's, for instance, in cases of extremely high fever, that you feel you can't tough it out, you can't do it.

例如当出现极高烧情况，自觉无法硬扛时。

bilibili 00:01:19

▶ I guess there's that.

我认为存在这种情况。

▶ It's a small number of cases, I think.

但这类案例数量很少。

▶ But if you can't tough it out, if you can't do it, that's what you're going to have to do.

但若无法硬撑，那也只能用药。

▶ Toughing it out, of course, can have some pretty dire consequences for the woman carrying that baby for the fetus as well.

当然，硬扛可能对孕妇和#胎儿#产生相当#严峻#的后果。

▶ Two weeks ago, I know you told Jake, you stand by the current guidance when it comes to a seduminifin and that it is safe.

两周前您曾向杰克表示，您坚持当前关于塞度米尼芬（泰诺）安全性的指南。

bilibili 00:01:48

▶ From what you heard, just a short time ago, has any of that changed for you?

听完刚才的发言，您的立场是否有所改变？

▶ Nothing has changed in my mind.

我的观点毫无变化。

▶ We know the information from the American College of Obstetricians and Gynecologists, as well as the Society of Maternal Fetal Medicine, reiterate that the studies show that Tylenol is safe in pregnancy and that there is no study that shows Tylenol causes autism.

美国妇产科学会和母胎医学学会均重申，研究显示泰诺在孕期使用安全，且无任何研究表明泰诺会导致自闭症。

 00:02:13

▶ When we look at what we do know, and again, it's some, frankly, more surprising comments than I think anybody was expecting from both the President and from Secretary Kennedy.

坦白说，总统和肯尼迪部长的言论比任何人预想的都更令人惊讶。

▶ This Dr. Offit, in your 2020 book Overkill, you did touch on how sometimes people may lean on Tylenol to treat fevers unnecessarily.

奥菲特博士，您在2020年著作《过度治疗》中曾提及人们可能过度依赖泰诺退烧。

▶ Is it something that in pregnancy is typically overused in your experience?

根据您的经验，#怀孕#期间是否存在泰诺滥用现象？

 00:02:39

▶ Being pregnancy is different.

#怀孕#情况特殊。

▶ If you have a high fever in your first trimester pregnancy, that child has a risk of having a variety of possible problems.

孕早期发高烧可能引发胎儿多种潜在问题。

▶ You need to treat fevers, especially in the first trimester.

必须治疗发烧，尤其在孕早期。

▶ In fact, there are studies showing that when you don't, that you increase your risk of for example, attention deficit disorder.

事实上，研究显示不治疗发烧会增加例如注意力#缺陷#障碍#等风险。

 00:02:57

▶ By treating fevers in the first trimester, you lower the risk of attention deficit disorder.

孕早期退烧可降低注意力#缺陷#障碍#风险。

🎧 Also what they didn't reference was a Swedish study that just was published that was 25 year study, 2.5 million children, where they did the kind of controls that Meg Turel just said, which is that you have to control for the mother.

他们未引用的是瑞典刚发布的25年研究（涉及250万儿童），该研究采用梅格·图雷刚提到的对照法——需以母亲为对照变量。

🎧 You look at the mother who, for example, treated Tylenol in one pregnancy but didn't treat with Tylenol in another pregnancy, so-called sibling controls.

例如对比同一母亲两次#怀孕#期（一次用药一次未用药）的所谓#同胞#对照。

 00:03:22

🎧 What you find there is that there is no association with autism.

结果发现与自闭症无关联。

🎧 I think it is pretty solid that there is no association with the set of menifin or Tylenol given in pregnancy and autism.

我认为孕期服用梅尼芬（泰诺）与自闭症无关联的结论相当可靠。

🎧 This was a dangerously irresponsible thing for President Trump to say when he said tough it out because that only puts children at higher risk, especially with fevers in the first trimester.

特朗普总统“硬扛”的说法危险且不负责任，这只会增加儿童风险，尤其是孕早期发烧情况。

 00:03:40

🎧 This is now the guidance though.

然而这已成为现行#指南#。

🎧 So what do doctors do with that?

医生该如何应对？

🎧 What do patients do with that?

患者又该如何？

▶ Dr. Glossi Bell?

格洛西·贝尔博士？

▶ I think it is very concerning.

我认为这非常令人担忧。

▶ I think it is very concerning.

确实极为令人忧虑。

▶ I know that patients are going to be scared now.

我知道患者现在会感到恐惧。

▶ They are not going to know what advice to go after or what to follow.

他们将不知该听从何种建议。

 00:04:03

▶ I think even for physicians, it puts us in a very difficult predicament.

即使对医生而言，这也让我们陷入非常困难的#困境#。

▶ Our professional societies and the science tells us that Tylenol is safe.

专业学会和科学证据均表明泰诺安全。

▶ When you have the FDA that is saying something different, it puts us in a very difficult position.

当药监局给出不同说法时，我们处境艰难。

▶ I know that President Trump and that Secretary Kennedy said that patients should always consult their physician.

我知道特朗普总统和肯尼迪部长强调患者应咨询#医生#。

 00:04:26

▶ This is very true.

这非常正确。

▶ They should.

理应如此。

▶ But they really have left us between a rock and a hard place.

但他们确实让我们进退维谷。

▶ Again for me, I have to follow the science.

于我而言，必须遵循科学。

▶ I went into medicine believing that the science and the evidence is what should guide how I practice.

我投身医学时就坚信科学证据应指导临床实践。

▶ For me and for my patients, I will continue to recommend Tylenol.

对我和我的患者，我会继续推荐泰诺。

▶ As has been said, the times that we recommend Tylenol are usually for fever for pain.

如前所述，我们推荐泰诺多用于退烧止痛。

 00:04:51

▶ We don't have a safe alternative, especially for fever.

尤其对于发烧，我们尚无更安全的替代品。

▶ We know what happens when fever is untreated.

我们知道发烧若不治疗的后果。

▶ Can I also just get a couple of fact-checking if you don't mind Dr. Offett?

奥菲特博士，可否再核实几个事实？

▶ I'm sorry to put you on the spot, but a couple of things that also stood out to me that we heard.

抱歉让您为难，但有些发言令我印象深刻。

▶ The Secretary saying that use of Tylenol could be associated with liver toxicity.

部长称泰诺使用可能关联#肝脏#毒性。

bilibili 00:05:08

▶ Is that a major concern?

这是主要担忧吗？

▶ Not if taken into correct doses.

按正确剂量服用则无需担心。

▶ I mean, there are people who, for example, massively overdosed with Tylenol and sort of see those patients and they come in with liver toxicity, but not at the correct dose.

例如超大剂量服药者会出现肝毒性，但规范用药不会。

▶ He also said that in children, he said it could prolong a viral illness.

他还称儿童用药可能#延长#病毒#性疾病病程。

▶ So there are about 20 studies showing that when you have a viral infection and you choose to treat the fever, that you can prolong the illness.

约20项研究表明，病毒感染时退烧可能延长病程。

bilibili 00:05:34

▶ That is true because fever is really part of our immune response.

确实如此，因为发烧本质是#免疫#反应的一部分。

▶ And so your immune response actually works better at a higher temperature.

较高体温下免疫反应效率更高。

▶ When you look at this, Dr. Gillespie, you said you're going to stick with your current guidance that you had.

吉莱斯皮博士，您表示将坚持现有#指南#。

▶ There was concern that this is dangerous.

有人担忧这是危险行为。

▶ What makes it doctor-offent?

危险何在？

▶ What makes this dangerous?

为何说其危险？

 00:05:56

▶ It was a broad side against vaccines.

这是对疫苗的全面攻击。

▶ I mean, they brought up all the anti-vaccine tropes.

他们搬出了所有反#疫苗#的套路。

▶ For example, the hepatitis B vaccine, as a birth dose, the notion of the Luminum Adjuvance in vaccines, mercury, which by the way hasn't been in vaccines for children for the last 25 years, which is a perfect example actually.

例如新生儿乙肝疫苗、疫苗铝佐剂、汞（过去25年儿童疫苗已不含汞）——这恰成反例。

▶ Robert F. Kennedy Jr. has a tortured relationship with vaccines in autism.

小罗伯特·肯尼迪在疫苗与自闭症问题上立场扭曲。

 00:06:18

▶ He believed that the measles Monterey Bell of Vaccine caused autism and was the executive producer of a movie, Vax2, which made that claim even though 24 studies have shown that it does them.

他相信麻疹疫苗导致自闭症，并担任宣传此观点的电影《疫苗2》制片人——尽管24项研究已证伪。

▶ When he says that we are ignoring parents' concerns, we didn't ignore parents' concerns because 24 studies were done.

他指责我们忽视家长担忧，但正因重视才完成24项研究。

▶ Many claim that thymaradol, this ethamurkry containing preservative in vaccines, called autism, wrote a book about it called thymaradol, let the science speak where the science didn't speak at all.

许多人声称疫苗含汞防腐剂硫柳汞致自闭症，还著书立说——但科学从未支持此说法。

 00:06:43

▶ It's been out of vaccines for 25 years given to anybody less than six years of age.

六岁以下儿童疫苗已25年不含此成分。

▶ What's happened to the incense of autism?

自闭症#发病率#如何变化？

▶ It's gone from one in 150 to more like one in 32.

从1/150升至约1/32。

▶ It's increased while thymaradol has been out of there.

硫柳汞禁用后发病率反而上升。

▶ He gets it wrong again and again.

他屡犯错误。

▶ When President Trump says children get 80 vaccines as a young child, what is he talking about?

特朗普称幼童接种80剂疫苗，所指为何？

 00:07:02

▶ Children in the first six years of life will get 13 or vaccines that prevent 13 different diseases.

六岁以下儿童接种13剂疫苗预防13种疾病。

▶ It was just misstatement.

纯属误述。

▶ In fact, if you're misstatement, it was like a fire hose of misstatements.

实际上，错误陈述如消防#水带#般喷涌而出。

▶ We really appreciate helping us to walk through a number of those.

非常感谢您帮我们厘清这些问题。

▶ Dr. Paul Offit, Dr. Veronica Gillespie Bell, appreciate as always your expertise.

保罗·奥菲特博士、维罗妮卡·吉莱斯皮·贝尔博士，感谢二位的专业#见解#。

bilibili 00:07:20

▶ Thank you.

谢谢。

▶ Thank you.

谢谢。

▶ So in terms of what we have heard earlier this afternoon, it's important to note that both the president and the secretary still speaking, this event still going on.

关于今日下午的发言，需注意总统与部长仍在讲话，活动仍在进行。

▶ We are continuing to monitor those remarks.

我们持续关注相关言论。

▶ We are also following breaking news out of Disney and ABC announcing just a short time ago that Jimmy Kimmel will return to his comedy show on the network tomorrow night.

同时关注迪士尼与ABC刚宣布的突发新闻：吉米·坎摩尔明晚将回归网络喜剧节目。

bilibili 00:07:43

▶ What we know about the discussions that actually led to this announcement and just one day before President Trump's address in the United Nations, another country has now joined in saying it will recognize a Palestinian state.

促成此决定的幕后讨论，以及特朗普联合国演讲前夕又一国宣布承认巴勒斯坦国。

▶ How this becomes an isolation move on the U.S.

此举如何形成对美国的#孤立#。

▶ That's ahead.

稍后继续。
