

Teen Found Guilty of Murdering Classmate in School Stabbing

【BBC晚间新闻 20250809 震惊！15岁少年校内午餐时间持刀杀人 | 受害者家属泣诉 | 校园安全引担忧 | 反刀具犯罪游行席卷谢菲尔德】

Summary: A 15-year-old boy has been convicted of murdering fellow pupil Harvey Wilgoss by stabbing him with a hunting knife during a school lunch break in Sheffield. The attacker, who had a history of violence, was captured on CCTV shoving Harvey before the fatal assault. Harvey's family described him as a "light in every room," while authorities urged parents to discuss knife crime with children. Meanwhile, Israel faces global backlash over plans to escalate its Gaza offensive, with Germany halting arms shipments.

🎧 And scientists think they may have found a new planet there.

科学家认为他们可能在那里发现了一颗新行星。

🎧 This picture was taken from the James Webb Space Telescope and this blurry blob could be a glimpse of a new world.

这张照片由詹姆斯·韦伯太空望远镜拍摄，这个模糊的斑点可能是一个新世界的一瞥。

▶ This is the first time we're taking a photo of an exoplanet in that star system, so we get a really good look at that.

这是我们第一次拍摄该恒星系中的系外行星照片，因此我们可以很好地观察它。

▶ And that's really exciting.

这非常令人兴奋。

bilibili 00:19:16

▶ So we think it's a way that we're going to be able to explore it better.

所以我们认为这是一种更好地探索它的方式。

▶ There's even the emissions proposed to go there.

甚至有人提议发射探测器前往那里。

▶ So that potentially makes it really, really exciting.

因此这可能会让它变得非常非常令人兴奋。

▶ The potential planet is a tantalising discovery.

这颗潜在行星是一个诱人的发现。

▶ Alpha Centauri A, the star at orbit, is similar in size and brightness to our own Sun.

它围绕的恒星半人马座αA在大小和亮度上与我们的太阳相似。

bilibili 00:19:36

▶ The possible planet is about twice as far from its star as the Earth is from the Sun.

这颗可能的行星距离其恒星的距离大约是地球到太阳的两倍。

▶ This means it's in the so-called Goldilocks Zone, like Earth, where conditions might be just right, not too hot and not too cold for life.

这意味着它位于所谓的"宜居带"，就像地球一样，那里的条件可能刚刚好，不太热也不太冷，适合生命存在。

▶ But this is a planet made of gas, so it's highly unlikely to be habitable.

但这是一颗由气体组成的行星，因此不太可能适合居住。

▶ However, the potential planet could have moons, like our own gas giant Jupiter whose moons are covered in ice and underneath there are hints of liquid oceans where scientists think there could be life.

然而，这颗潜在行星可能有卫星，就像我们的气态巨行星木星一样，其卫星被冰覆盖，冰下可能有液态海洋，科学家认为那里可能存在生命。

bilibili 00:20:06

▶ It's possible that this planet might have moons.

这颗行星可能有卫星。

▶ And for example, if the tide's between the planet and the moon actually heated it up to the temperature where liquid is water is liquid, maybe it's something we could look at and see whether it has an atmosphere, for example.

例如，如果行星和卫星之间的潮汐力将其加热到液态水存在的温度，也许我们可以观察它是否有大气层。

▶ Maybe that would be a place where life could get a foothold.

也许那会是生命可以立足的地方。

bilibili 00:20:27

▶ The powerful James Webb Space Telescope has only spotted the planet's candidate once so far during two other searches it couldn't be detected.

强大的詹姆斯·韦伯太空望远镜迄今为止只发现这颗候选行星一次，在另外两次搜索中未能检测到它。

▶ But astronomers will keep searching the skies.

但天文学家将继续搜索天空。

▶ It's orbit means there's another chance to see it a year from now.

它的轨道意味着一年后还有机会看到它。

▶ Hi Sophie yes along with that heat some really uncomfortable nights to come as well as the humidity rises as well.

你好Sophie，随着高温和湿度上升，接下来会有一些非常不舒服的夜晚。

 00:29:42

▶ We'll have some warmth and some sunshine this weekend but first of all we have some showers to clear out of the way.

周末会有温暖和阳光，但首先我们要清除一些阵雨。

▶ I think Sunday on balance looking like the drier and brighter day for many but that heat is already with us to the south it's across France it's been building in Iberia.

我觉得周日对很多人来说是更干燥和明亮的一天，但高温已经在南方，穿过法国，在伊比利亚积聚。

▶ Red heat warning is out and for Portugal tomorrow but by the time we get to Tuesday we've got that heat heading further south whilst in the 40s further south we're expecting the low 30s here in the UK but some really rather warm nights to go with it.

葡萄牙明天发布红色高温警报，但到周二高温会进一步向南移动，南部气温超过40度，英国预计30度出头，但夜晚会非常温暖。

 00:30:10

▶ So in contrast a fairly comfortable night to come for most of us we've had rain as well on this weather front to the north another weather front just waiting in the wings out of the west will bring some heavier rain in through the night particularly to Scotland slipping into the central belt by the end of the night and across Northern Ireland with squally winds and usually windy really for the time of year with gusts of 45-50 miles an hour further south that could be the odd light shower for some increasing cloud but that should melt away first thing tomorrow.

相比之下，大多数人今晚会比较舒适，北部有雨，另一个天气锋面从西部带来更强降雨，特别是苏格兰夜间进入中部地带和北爱尔兰，伴有狂风，这个季节通常多风，南部阵风45-50英里/小时，可能有零星小雨，云量增加，但明天早上会消散。

▶ We're watching that weather front as it moves southwards, clear is Scotland and Northern Ireland through the morning into Northern England and north Wales and just breaking up into a band of showers heavy showers follow on behind and for all parts not just the north for all parts it'll be a windier today tomorrow quite fresh breezes at times in the south so temperatures probably sort of around about today's values because they'll be tempered a little by the wind.

我们观察天气锋面向南移动，苏格兰和北爱尔兰早上晴朗，进入英格兰北部和北威尔士，变成一阵阵大雨，所有地区不仅仅是北部都会更风大，南部有时有清新微风，所以气温大概和今天差不多，因为风会稍微调节。

▶ By Sunday though and through Saturday night it's that high pressure builds the eases those winds away and so therefore there'll be more sunshine on Sunday not as much wind of

fewer showers we might have some mist and fog first thing and still showers for the far west of Scotland and later some more rain coming into Northern Ireland and western Scotland as well but ahead of that 25 to 27 degrees and a little warmer as well across Scotland and Northern Ireland but quite wet weather Sunday night in the north and then like you hinted as well as the heat there could be some thundery showers as well as we head through Monday and Tuesday as ever.

到周日和周六晚上，高压建立，风减弱，所以周日阳光更多，风小阵雨少，早上可能有雾，苏格兰最西部仍有阵雨，之后北爱尔兰和苏格兰西部会有更多降雨，但之前气温25到27度，苏格兰和北爱尔兰稍暖，但周日晚上北部多雨，正如你提到的，周一和周二可能有雷阵雨。
