🎧 He wants to have a good relationship with the United States.

他希望与美国保持良好的关系。

🎧 But he also wants the capitulation of Ukraine.

但他也希望乌克兰投降。

🎧 It is possible, though by no means certain, that offers of economic cooperation from America may persuade the Kremlin to offer concessions on Ukraine.

有可能——尽管并非确定——美国的经济合作提议可能会说服克里姆林宫在乌克兰问题上做出让步。

🎧 Whether or not that happens, Vladimir Putin has already got one thing he wanted, a high profile summit, and the chance to negotiate one-on-one with an American president.

无论是否发生这种情况，弗拉基米尔·普京已经得到了一件他想要的东西：一场高调的峰会，以及与美国总统一对一谈判的机会。

 00:04:06

🎧 Zelensky didn't get an invite to Alaska, but he did to Downing Street, a show of support for Ukraine's president from the Prime Minister, and a tour of No. 10, which called on Vladimir Putin to prove that he is serious about peace.

泽连斯基没有收到阿拉斯加的邀请，但他去了唐宁街，这是首相支持乌克兰总统的表现，并参观了10号，呼吁弗拉基米尔·普京证明他认真对待和平。

▶ But Russia's still advancing.

但俄罗斯仍在推进。

▶ E-Haw, they're instructors worried they may soon be asked to surrender more land.

“呃，”他们的教官担心他们可能很快会被要求放弃更多领土。

 00:05:58

▶ The mean or my comrades are prepared to accept this.

“我的战友们准备接受这一点。”

▶ We will carry on fighting until we liberate our land, until we are free.

“我们将继续战斗，直到解放我们的土地，直到我们自由。”

▶ It must be stopped in one or another way, but it must stop and we must win.

“必须以某种方式停止，但必须停止，我们必须胜利。”

▶ But if you give away territory, or if President Trump makes Ukraine give away territory, will that be a will?

“但如果你放弃领土，或者如果特朗普总统让乌克兰放弃领土，那会是一种意愿吗？”

 00:06:20

▶ It will be not my solution, but I don't like this idea.

“这不是我的解决方案，但我不喜欢这个想法。”

▶ It's already sacrificed much.

“已经牺牲了很多。”

▶ President Trump says eventually, Ukraine will have to sign something.

特朗普总统表示，最终乌克兰将不得不签署某些协议。

▶ But even the scale of its losses hasn't broken its resolve.

但即使损失如此之大，也没有动摇其决心。

▶ Ukraine has proved many times that you cannot impose anything on our people.

“乌克兰已经多次证明，你不能强加任何东西给我们的人民。”

▶ That's why I don't believe that the deal or any agreement which leads to our destruction can be imposed on Ukraine.

“这就是为什么我不相信会导致我们毁灭的协议或任何协议可以强加给乌克兰。”

▶ Many have already lost everything.

许多人已经失去了一切。

▶ Their old homes and belongings in Russian occupied territory.

▶ For more insight into this, I spoke earlier with Alex Vindman, the former director for European Affairs for the U.S. National Security Council.

为了更深入地了解这一点，我之前与美国国家安全委员会欧洲事务前主任亚历克斯·文德曼进行了交谈。

bilibili 00:07:55

▶ Start things off, your thoughts on what we might see tomorrow, please.

首先，请谈谈你对明天可能看到的情况的看法。

▶ Well, I'm pretty pessimistic and skeptical that there'll be anything, any substantial results.

“嗯，我非常悲观和怀疑是否会有任何实质性结果。”

▶ The reason that this meeting is occurring is because the rhetoric from Donald Trump is sharpened on Russia, the threat of sanctions and breaking with this kind of bromance between Trump and Putin and assassinated Putin making arrangements or encouraging a summit in the first place.

“这次会议之所以举行，是因为唐纳德·特朗普对俄罗斯的言辞变得尖锐，制裁的威胁以及打破特朗普和普京之间的这种兄弟情谊，以及普京最初安排或鼓励峰会。”

bilibili 00:08:23

▶ And one set of parameters were offered to the U.S. envoy Steve Whitkopf and very quickly after the agreement to hold a summit was made, those conditions changed again.

“一组参数被提供给美国特使史蒂夫·惠特科普夫，在同意举行峰会后，这些条件很快又发生了变化。”

▶ A typical Russian bargaining tactic, you make an agreement, but that's only a starting point to advance your position.

“典型的俄罗斯讨价还价策略，你达成协议，但这只是推进你立场的起点。”

▶ So now even the U.S. President is somewhat skeptical.

“所以现在连美国总统也有些怀疑。”

 00:08:46

🎧 He's now talking about this as a sensing session or brainstorming to see what could happen.

“他现在将这次会议称为感知会议或头脑风暴，看看会发生什么。”

🎧 And the Russians are pivoting to not necessarily much in the way of delivering on Ukraine, which is the principle reason for this summit in the first place, but maybe some other ways to normalize relationships, economic deals, and they're bringing a delegation that could maybe make those kinds of offers.

“俄罗斯人正在转向不一定在乌克兰问题上做出太多让步——这本来是这次峰会的主要原因——但可能是其他一些方式来使关系正常化，经济交易，他们带来了一个可能提出这类提议的代表团。”

🎧 And one of the other areas that they're looking at is arms control.

“他们关注的另一个领域是军备控制。”

 00:09:14

🎧 President Trump is keen on arms control and the threat of nuclear weapons has kind of loomed in his mind for a long, long time.

“特朗普总统热衷于军备控制，核武器的威胁在他脑海中已经存在很长时间。”

🎧 So I think right now the prospects for peace in Ukraine look slim.

“所以我认为现在乌克兰和平的前景看起来很渺茫。”

🎧 A lot of the mistakes of the past are being repeated.

“过去的许多错误正在重演。”

🎧 Limited prep, the Russians are kind of set in the condition, hard to see how this kind of develops into something positive, which I think a lot of folks do want to see this war start to wind down.

“准备有限，俄罗斯人已经设定好了条件，很难看出这种情况如何发展成积极的结果，尽管我认为很多人都希望看到这场战争开始缓和。”

bilibili 00:09:42

⌂ And Trump has floated the idea of Europeans potentially joining a second meeting with both Russia and Ukraine at the table.

“特朗普提出了欧洲人可能参加第二次会议的想法，俄罗斯和乌克兰都在场。”

⌂ Do you think we would be likely to see something like that?

“你认为我们可能会看到这样的事情吗？”

⌂ As far as the president has really kind of discounted, he likes this idea of senior cross and being the decision maker, deal maker across from the principle world leaders, whether that's Xi or Putin.

“就总统而言，他确实有点喜欢这种高级别交叉的想法，成为与世界主要领导人——无论是习近平还是普京——对面的决策者、交易撮合者。”

bilibili 00:10:09

⌂ I think it would have to be under the right conditions that he could be encouraged to believe that maybe a deal can be delivered if all these other parties are brought in that usually complicates negotiations.

“我认为必须在适当的条件下，他才会被鼓励相信，如果所有这些通常使谈判复杂化的其他各方都参与进来，也许可以达成协议。”

⌂ I think even having a tri-party negotiation between Russia and Ukraine and the U.S. would be challenging mainly because Putin has been reluctant to have a meeting directly with Vladimir Volodymyr Zelensky.

“我认为即使是俄罗斯、乌克兰和美国之间的三方谈判也将具有挑战性，主要是因为普京一直不愿意直接与弗拉基米尔·泽连斯基会面。”

⌂ So I could see a potential scenario in which something unfolds if he thinks it's beneficial to advance the cause of a ceasefire, but that's not his starting point.

“所以我们可以看到一个潜在的场景，如果他认为这有利于推进停火事业，事情可能会展开，但这不是他的出发点。”

bilibili 00:10:45

▶ He wants to be the person that achieves the deal in his own right.

“他希望成为靠自己达成协议的人。”

▶ And we're quite far away from that with little prep done to get us anywhere near the conditions to settle this three and a half year war.

“我们离这一点还很远，几乎没有做任何准备来让我们接近解决这场三年半战争的条件。”

▶ And drawing on your experience, I'd love to hear a little bit about what you think this summit will mean for Europe.

“根据你的经验，我很想听听你认为这次峰会对欧洲意味着什么。”

 00:11:04

▶ I mean, this is about more than just Ukraine, right?

“我的意思是，这不仅仅是关于乌克兰，对吧？”

▶ Is it fair to say that the fate of the continent is at stake?

“可以说大陆的命运岌岌可危吗？”

▶ Absolutely.

“绝对。”

▶ I think it's actually maybe even bigger than that.

“我认为实际上可能比这更大。”

▶ This is one of those pivotal moments that's going to determine outcomes in far-flung corners of the world, including the Pacific.

“这是那些将决定世界遥远角落——包括太平洋——结果的关键时刻之一。”

▶ The Chinese will be reading the signals from this and what kind of giveaways maybe occur with regards to business transactions rather than peace.

“中国人将从中解读信号，以及可能在商业交易而非和平方面出现什么样的让步。”

 00:11:33

🎧 I think for the European plane, of course, much, much closer to home, this is likely to be a scenario in which if Putin is adept and manipulative and says all these things are broadcast by Trump's predecessors, let's say, he couldn't make something up about Obama making an ex-agreement or Biden making wide agreement.

“我认为对欧洲来说，当然更贴近本土，这很可能是一个场景，如果普京熟练且善于操纵，并说所有这些事情都是特朗普的前任播出的，比如说，他无法编造奥巴马达成前任协议或拜登达成广泛协议的事情。”

🎧 He does this pretty often with regards to airing for grievances.

“他在发泄不满时经常这样做。”

🎧 He could convince Trump that he's in the right and that Trump should side with him and that pressure should shift to Ukraine.

“他可以说服特朗普他是对的，特朗普应该站在他一边，压力应该转移到乌克兰。”

 00:12:08

🎧 Under those conditions, Ukraine is not going to necessarily throw its hands in the air, it won't, it will continue to defend itself, but it will be more weakened without US support.

“在这种情况下，乌克兰不一定会举手投降，它不会，它会继续自卫，但没有美国的支持，它会更加削弱。”

🎧 Europeans will be on the hook to provide that kind of support.

欧洲人将不得不提供那种支持。

🎧 And also, frankly, incentivizes Putin to muck around more in the European backyard, whether it's hybrid warfare, the mean these tools that he's been using for in almost 20 years since he honed him after the aftermath of the armed revolution in 2004.

而且，坦率地说，这会鼓励普京在欧洲后院进一步捣乱，无论是混合战争还是这些他自2004年武装革命后磨练了近20年的手段。

 00:12:39

🎧 So I think it does make things quite complicated.

所以我认为这确实让事情变得相当复杂。

🎧 And if it looks too hard, Donald Trump really doesn't have a stomach for long, drawn-out negotiations.

而如果看起来太难，唐纳德·特朗普确实没有耐心进行漫长而持久的谈判。

🎧 He might just shift off to the Europeans or have some other stakeholder take lead if he doesn't think there's a relatively quick deliverable here.

如果他觉得这里没有相对快速的成果，他可能会推给欧洲人，或者让其他利益相关者牵头。

🎧 Well, Israel's far right finance minister, Bezalil Smotrich, has said that plans to build more than 3,000 homes in a settlement project in the occupied West Bank will bury the idea of a Palestinian state.

以色列极右翼财政部长贝扎莱尔·斯莫特里赫表示，在被占领的西岸建造3000多套住房的定居点计划将埋葬巴勒斯坦国的想法。

 00:13:12

🎧 About 700,000 settlers live in approximately 160 settlements in the occupied West Bank and occupied East Jerusalem, that according to the Israeli group Peace now.

根据以色列组织“和平现在”的数据，约70万定居者生活在被占领的西岸和被占领的东耶路撒冷的大约160个定居点中。

🎧 And these settlements are illegal under international law.

而这些定居点根据国际法是非法的。

🎧 The planned new settlement would cut the West Bank off from East Jerusalem.

计划中的新定居点将把西岸与东耶路撒冷隔开。

🎧 The EU's urging Israel not to move forward with the settlements while Britain's foreign secretary said the plans must be stopped now.

欧盟敦促以色列不要推进定居点建设，而英国外交大臣表示这些计划必须立即停止。

 00:13:37

🎧 The Palestinian foreign ministry for its part called the settlement project, quote, an extension of crimes of genocide, displacement, and annexation.

巴勒斯坦外交部则称该定居点项目是“种族灭绝、流离失所和吞并罪行的延伸”。

▶ The UN warned that building Israeli homes in the area would put an end to hope for a two-state solution to the Israeli-Palestinian conflict.

联合国警告称，在该地区建造以色列房屋将终结以巴冲突两国解决方案的希望。

▶ Smotrich told reporters that the scheme has the backing of Israel's prime minister Benjamin Netanyahu.

斯莫特里赫告诉记者，该计划得到了以色列总理本杰明·内塔尼亚胡的支持。

bilibili 00:14:02

▶ The project has been frozen for decades amid fierce international opposition.

该项目因激烈的国际反对而被冻结了数十年。

▶ Our correspondent John Donasant reports from the occupied West Bank.

我们的记者约翰·多纳桑特从被占领的西岸报道。

▶ This E1 plan has been controversial for decades.

这个E1计划几十年来一直存在争议。

▶ Effectively to settle all the area between Jerusalem there, up on the hill, with the big Jewish settlement there of Marl Ademim.

实际上是要在耶路撒冷和山上的大型犹太人定居点马尔·阿杜明之间定居整个地区。

bilibili 00:14:24

▶ Now Palestinians have long said that if that were to happen, it would effectively cut the West Bank, the occupied West Bank in two, and make achieving a Palestinian state effectively impossible.

巴勒斯坦人长期以来表示，如果发生这种情况，实际上会将西岸、被占领的西岸一分为二，并使实现巴勒斯坦国变得实际上不可能。

▶ Now the difference we've got here today is in the past.

今天我们在这里的不同之处在于过去。

▶ It's been the Palestinians who said that.

是巴勒斯坦人这么说的。

▶ Today we've basically got the finance minister, Beza al-Smotrich, saying, look, that's his intention.

今天我们基本上听到财政部长贝扎尔·斯莫特里赫说，看，这就是他的意图。

 00:14:50

▶ That is the whole point a Palestinian state is never going to happen.

这就是重点，巴勒斯坦国永远不会实现。

▶ Now I asked him what message would that send to the likes of Britain and France who intend later in the year to recognize a Palestinian state?

我问他，这对英国和法国等打算在今年早些时候承认巴勒斯坦国的国家传递了什么信息？

▶ And he said the message would be, there's nothing to recognize.

他说，传递的信息将是，没有什么可承认的。

▶ It's not going to happen.

这不会发生。

▶ Now final approval for this plan is expected to be given next week.

该计划的最终批准预计将在下周获得。

▶ We were brought to Pakistan.

我们被带到巴基斯坦。

▶ They have given us this information that we will very quickly re-locate our, we are family to the UK.

他们告诉我们，我们将很快把我们的家庭重新安置到英国。

▶ In six days they have completed all the documentation that were needed, included the biometrics, everything.

六天内他们完成了所有需要的文件，包括生物识别等一切。

 00:19:44

▶ But after that since ten months we are waiting in here without any clear explanation and we are stuck in Pakistan, we have tried many times to seek out what can be the reason.

但之后十个月我们在这里等待，没有任何明确的解释，我们被困在巴基斯坦，我们多次试图找出原因。

▶ Why do we have the light in here in Pakistan for a month?

为什么我们会在巴基斯坦滞留十个月？

▶ Ten months is a long time for us but unfortunately nobody tells us anything.

十个月对我们来说很长，但不幸的是没有人告诉我们任何事。

▶ So just to confirm, you have not heard anything official from the British authorities to say you cannot come to the UK anymore, that your status has changed.

只是为了确认，你还没有收到英国官方的任何消息说你不能再进入英国，或者你的身份发生了变化。

 00:20:16

▶ Do you still are under the impression that you are meant to be coming to Britain?

你是否仍然认为自己应该来英国？

▶ Still we are under the protection of UK government, yes, still we didn't receive any email or any official notification that is giving telling us that we are not eligible anymore to come to UK.

我们仍然受到英国政府的保护，是的，我们还没有收到任何电子邮件或官方通知告诉我们不再有资格来英国。

▶ Still, when every time we are asking them, they are telling us that still you are families and that process and we didn't have any final decision about your case.

然而，每次我们询问他们时，他们都说你们仍然是家庭，程序仍在进行中，我们还没有对你们的案件做出最终决定。

 00:20:45

▶ How quickly do you think British officials need to act to stop your father being deported back to Afghanistan?

你认为英国官员需要多快采取行动来阻止你父亲被驱逐回阿富汗？

▶ How long have they gone?

他们已经拖了多久？

▶ The time is truly met as my family informed me that they are going to deport them tonight.

时间非常紧迫，因为我的家人告诉我他们今晚就要被驱逐。

▶ And what is your message to the British government, to anyone from the government who is watching this interview tonight?

你对英国政府、对今晚观看这次采访的任何政府官员有什么话要说？

 00:21:07

▶ Please help my family and I will be there by the telephones.

请帮助我的家人，我会守在电话旁。

▶ Thanks for speaking to us tonight.

感谢你今晚接受我们的采访。

▶ Well, a UK government spokesperson told BBC News Night we do not comment on individual cases.

英国政府发言人告诉BBC News Night，我们不对个别案件发表评论。

▶ We remain fully committed to honoring our commitments to all eligible people who pass their relevant checks for relocation.

我们仍然完全致力于履行我们对所有通过相关审查的合格人员的承诺。

 00:21:27

▶ Let's turn now to some other news.

现在让我们转向其他新闻。

▶ Scientists here in the United States have used artificial intelligence to invent two new potential antibiotics that can kill super bugs.

美国的科学家利用人工智能发明了两种可以杀死超级细菌的新型潜在抗生素。

▶ The drugs were designed, Adam by Adam, using the technology and managed to kill drug-resistant MRSA and gonorrhea in laboratory and animal tests.

这些药物是通过这项技术设计的，并在实验室和动物测试中成功杀死了耐药的MRSA和淋病。

 00:21:50

▶ Human trials are years away what researchers say the findings show the power of AI to create ground-breaking drugs and that it could spark a second golden age of antibiotic discovery.

人体试验还需要几年时间，但研究人员表示，这些发现展示了人工智能创造突破性药物的能力，并可能引发抗生素发现的第二个黄金时代。

▶ And joining me now to discuss this is James Collins, a professor of medical engineering and science at the Massachusetts Institute of Technology who is working on this study.

现在加入我们讨论的是麻省理工学院医学工程与科学教授詹姆斯·柯林斯，他正在参与这项研究。

▶ Thank you so much for taking the time to speak with us.

非常感谢你抽出时间与我们交谈。

 00:22:13

▶ Perhaps you could just walk us through this study and what it could mean for treating diseases that are resistant to antibiotics.

也许你可以带我们了解一下这项研究，以及它对治疗抗生素耐药性疾病的意义。

▶ Yeah, so we're really excited about what we're able to do.

是的，我们对我们的成果感到非常兴奋。

▶ So in this study we use Gen.A.I. to design completely new antibiotics and antibiotics we've never seen before.

在这项研究中，我们使用生成式人工智能设计了全新的抗生素，这些是我们从未见过的抗生素。

▶ And many of your listeners, your viewers will have used Gen.A.I. to create images, to create text.

你们的许多听众和观众可能已经使用生成式人工智能来创建图像或文本。

 00:22:36

▶ Here we're using it to create chemical structures.

在这里，我们用它来创建化学结构。

▶ And what we did was we trained the model initially with screening data that we'd collected on about 40,000 chemical compounds that we'd applied to different bacterial pathogens, looking to see which of those exhibited antibacterial activity as evidenced by growth and eviction.

我们最初用我们收集的约4万种化合物的筛选数据训练模型，这些化合物被应用于不同的细菌病原体，观察哪些表现出抗菌活性，通过生长和抑制来证明。

▶ Using both positive and negative data we can now train the models to recognize what could make for a good antibiotic.

利用正反两方面的数据，我们现在可以训练模型识别什么可以成为好的抗生素。

 00:23:00

▶ We then challenged the model to see if it could design completely new antibiotics that would act differently from what we have in our current arsenal.

然后我们挑战模型，看它是否能设计出与我们现有药物作用方式完全不同的新型抗生素。

▶ And it turned out to be the case.

结果确实如此。

▶ We identified and designed several hundred such antibiotics.

我们识别并设计了几百种这样的抗生素。

▶ We were able to synthesize two dozen of these, seven of which exhibited really powerful antibacterial activity, two of which were now advancing towards the clinic for being able to treat multi-drug resistant bacterial pathogens.

我们成功合成了其中的24种，其中7种表现出非常强大的抗菌活性，其中2种目前正在向临床应用推进，用于治疗多重耐药细菌病原体。

bilibili 00:23:27

▶ I mean, this sounds really promising.

这听起来非常有希望。

▶ Do you see this as opening the door to a new age of antibiotic discovery?

你认为这是否开启了抗生素发现的新时代？

▶ And perhaps you could just tell us why it's so important to be discovering new antibiotics these days.

也许你可以告诉我们为什么现在发现新抗生素如此重要。

▶ Yeah, I do think this opens the door right now to the new age about discovery and drug design.

是的，我认为这确实开启了发现和药物设计的新时代。

▶ I think it's important also specifically in the case of antibiotics for two big reasons.

我认为这在抗生素领域尤其重要，主要有两个原因。

bilibili 00:23:49

▶ One is that the number of bacterial strains, bacterial pathogens that are developing resistance is growing.

一是产生耐药性的细菌菌株和病原体的数量正在增加。

▶ And it's been growing deck to the point that we have a crisis.

这种增长已经到了危机的程度。

▶ Due to the overuse and misuse of antibiotics, that situation is of course, coupled with a dire situation of the number of new antibiotics being developed and approved has been dropping deck to the economic challenges of the market.

由于抗生素的过度使用和滥用，这种情况再加上新抗生素开发和批准数量的急剧下降，这是由于市场的经济挑战。

bilibili 00:24:12

▶ I think our work and other work of using AI to discover design antibiotics is giving new hope in the sense that we can use these tools to develop these antibiotics more cheaply.

我认为我们和其他利用人工智能发现和设计抗生素的工作带来了新的希望，因为我们可以利用这些工具更廉价地开发这些抗生素。

▶ And that's reduced the time needed to get these much needed antibiotics to expand on our cell.

这缩短了将这些急需的抗生素推向市场的时间。

▶ I mean, it sounds like a really fantastic development.

这听起来确实是一个了不起的进展。

 00:24:31

▶ But I'm wondering if you think there could also be dangers of having AI that's able to come up with these molecules so cheaply, so quickly, is it something that could be misused by bad actors such as in bioterrorism?

但我想知道你是否认为人工智能能够如此廉价、快速地设计出这些分子也可能带来危险，比如被不良分子用于生物恐怖主义？

▶ Unfortunately, that is the case.

不幸的是，确实如此。

▶ And I think with any technology, there's always do we use risks.

我认为任何技术都存在使用风险。

▶ For example, in the case of antibiotics, we developed models to predict whether a compound would be toxic against human cells.

例如，在抗生素方面，我们开发了模型来预测一种化合物是否对人类细胞有毒。

 00:24:56

▶ And we specifically use it in the case of antibiotics to ensure that the compounds are developing are toxic against bacterial cells, but not against human cells.

我们特别在抗生素领域使用它，以确保我们开发的化合物对细菌细胞有毒，但对人类细胞无毒。

▶ But as you note, it's feasible that a bad actor could use the same models to try to identify and or design molecules that are particularly toxic to human cells without the appropriate countermeasures to counter that.

但正如你所指出的，不良分子有可能利用相同的模型来识别或设计对人类细胞特别有毒的分子，而没有适当的对策来应对。

▶ It's certainly a concern, but it nonetheless does not diminish the strong positive potential of these for the good actors out there, for which luckily there are more good actors than bad actors.

这确实是一个担忧，但它并不会削弱这些技术对善良使用者的强大积极潜力，幸运的是，善良的使用者比不良分子多得多。
