bilibili 00:03:37

▶ Talking about the UK, how we need to be drilling in the North Sea, the strategy to reduce fossil fuels is completely the wrong one.

谈到英国，他说我们需要在北海钻井，减少化石燃料的战略是完全错误的。

🎧 So he's just completely got it wrong when it comes to viable strategy for navigating the realities of the 21st century.

因此在应对21世纪现实所需的#可行#战略方面，他完全搞错了。

🎧 When we talk about these climate plans that are being discussed that you and today, we often talk about them as something to prevent, to prevent going over, for example, 1.5 degrees of global heating.

当我们谈论今天正在讨论的这些气候计划时，我们通常将其视为预防性措施，例如防止全球升温超过1.5度。

 00:04:04

🎧 That's not been prevented anymore.

这已经无法避免了。

🎧 We are now going over it, we're going to experience that world and it's going to be a much less stable world, even than the one we're in now.

我们现在正在越过这个界限，我们将经历那样的世界，那将是一个比我们现在所处的世界更加不稳定的世界。

🎧 But the climate plan still matter because they move economies in the direction of what will make them more resilient to that world.

但气候计划仍然重要，因为它们将经济推向能使其对那个世界更具韧性的方向。

🎧 Let me give an example.

让我举个例子。

 00:04:22

🎧 Pakistan right now is in the throes of a bottom-up solar revolution.

巴基斯坦目前正处于一场自下而上的太阳能革命之中。

🎧 That is partly driven by concern about climate.

这在一定程度上是出于对气候的担忧。

⌂ But to be honest, it's mainly about people, businesses and so on, becoming more resilient to a world that is marked at the moment by very volatile fossil fuel prices.

但老实说，这主要是关于民众、企业等对一个目前以化石燃料价格剧烈波动为特征的世界变得更具韧性。

⌂ As we go over 1.5 that will only get worse and so one mechanism to make us more resilient is to move to a much more distributed, more renewable economy and society.

随着我们超过1.5度，情况只会更糟，因此增强韧性的一个机制是转向一个更分布式、更可再生化的经济和社会。

⌂ 00:04:50

⌂ So we got to just think of these things not necessarily as preventing climate change, but actually helping it to navigate what's coming and then of course preventing worse down the line.

所以我们必须将这些事不仅仅视为预防气候变化，而是实际上帮助应对即将发生的情况，进而当然地防止未来出现更糟的局面。

⌂ So which countries, which governments are really doing well in this whole area because they are going to present their plans today in New York, what their intentions are, where they're at in terms of mitigating climate change by 2035, where are people on the list in terms of how they are succeeding in this area?

那么哪些国家、哪些政府在整个领域做得真正出色？因为他们今天将在纽约提交计划，说明他们的意图、到2035年在减缓气候变化方面的进展，就他们在这个领域的成功程度而言，哪些国家名列前茅？

⌂ I'm going to be honest with you, no one is on the the good list really because those plans, at least as they are stated, are inadequate to make the goals that countries agreed on 10 years ago in Paris to stay below this 1.5 degree limit.

实话告诉您，没有哪个国家真正在优秀名单上，因为这些计划，至少就其陈述而言，不足以实现各国10年前在巴黎同意的将升温控制在1.5度以内的目标。

⌂ 00:05:35

⌂ I think what is interesting to consider now is how countries could update those plans in recognition that they're basically signals to business to say, look, this is how quickly we want

to transition to this more renewable to this greener economy.

我认为现在值得思考的是，各国如何能更新这些计划，认识到它们本质上是向企业发出的信号，表明我们希望以多快的速度转向这种更可再生、更绿色的经济。

▶ And in doing so, a road plan for how we can make our economy's farm was ill into what's coming.

这样做，就是为我们经济的各个部门如何适应未来制定路线图。

▶ And it's very important that countries think of it in that additional way because as time goes on and climate impacts on the geopolitical and trade convulsions they bring start to tick up, it could start to hold back our ability to act, it could derail us from being able to act further into the future.

各国以这种额外的方式思考非常重要，因为随着时间的推移，气候对地缘政治和贸易造成的动荡及其影响开始加剧，这可能会开始阻碍我们的行动能力，可能使我们无法在未来采取进一步行动。

 00:06:13

▶ So the quicker we go now, the more resilient our economies can become so that in a future in which we get even more severe climate change we're still able to navigate those chaotic conditions without getting distracted and ultimately move our way towards the future in which we calm this climate storm.

因此，我们现在行动越快，我们的经济就越有韧性，以便在未来即使面临更严重的气候变化时，我们仍能驾驭那些混乱局面而不分心，并最终迈向那个平息这场气候风暴的未来。

▶ Okay, Laurie Leiborne, thank you for talking to us about what is at stake.

不到六个月前，美国财政部的斯科特·贝森特还祝贺阿根廷总统哈维尔#米莱#将阿根廷从悬崖边拉回。

 00:07:28

🎧 This was just after the libertarian leader, well known for his economic shock therapy, had secured more than \$40 billion in loans from the International Monetary Fund as well as other lenders, told bolster his economy.

此前不久，这位以经济休克疗法闻名的自由意志主义领导人刚从国际货币基金组织及其他贷方获得了超过400亿美元的贷款，以支撑其经济。

⏮ Millet also received wider praise for re-reducing, soaring annual inflation and stabilizing Argentina's spiraling economy.

#米莱#还因再度降低飙升的年#通胀率#并稳定阿根廷螺旋式下滑的经济而受到广泛赞誉。

⏮ But now political and economic mistakes have really sparked fear in Argentina's markets, rattling them and the currency the peso has plummeted in value.

⏮ This surprise result alongside a corruption scandal and congressional defeats has fueled concern among investors about maintaining support for Millet's free market reforms.

这一意外结果连同#腐败##丑闻#及国会失利加剧了投资者对维持#米莱#自由市场改革支持的担忧。

⏮ But now the Trump administration has said it will help its ideological ally, offering an economic lifeline to President Millet.

▶ So does Argentina need a bailout or not?

那么阿根廷究竟是否需要救助？

▶ Because as far as President Trump is concerned and Scott Bessent, maybe not.

因为就特朗普总统和斯科特·贝森特而言，或许不必。

▶ Good morning, Sally.

早上好，莎莉。

 00:09:17

▶ Well, I think what Argentina needs is stability, particularly Millet as he heads into the midterm elections as we were seeing in the piece just now.

我认为阿根廷需要的是稳定，尤其是米莱正面临中期选举——正如刚才报道中所见。

▶ So from an optics perspective, this place really well for Millet home, from in the sense that he has challenges from the opposition, political challenges, but he has strong backing and alliances outside of Argentina.

从舆论角度看，这对米莱非常有利：尽管他面临国内反对派的政治挑战，但在阿根廷外部有强大支持联盟。

▶ And also from the perspective of the United States, more broadly, if the, you know, the stabilization of Argentina comes through, then it can show that aligning with Washington pays off.

从更广泛的美国视角看，若阿根廷能实现稳定，就能证明与华盛顿结盟确有回报。

 00:09:53

▶ So Argentina in a way can be a test case for other emerging markets, particularly across Latin America.

因此阿根廷某种程度上可成为其他新兴市场（尤其是拉美地区）的试验案例。

▶ Is this taking the fear out of financial markets?

这是否消除了金融市场的恐惧？

▶ Because of course, it's been very, very volatile recently impacting Argentina, its currency value, etc.

因为近期阿根廷及其#货币#价值确实极度#动荡#。

▶ Well, the immediate reaction was positive, right?

即时市场反应是积极的吧？

▶ The pests have stabilized.

比索已趋稳定。

 00:10:15

▶ It gained on some of the losses it had in the previous days.

收复了前几日的部分失地。

▶ But of course, you know, the proof is in the pudding.

但众所周知，关键还看#实际效果#。

▶ We don't have much more detail beyond the announcement.

目前除声明外我们掌握细节有限。

▶ And, you know, for the Argentine opposition and the challenges that Millet faces at home, you know, taking funds from the IMF or the World Bank is already political ammunition, taking funding from the White House will be another kettle of fish.

对阿根廷反对派和米莱的国内挑战而言，接受IMF或世行资金已是政治弹药，而接受白宫资助更是性质不同。

 00:10:43

⌂ So I think, you know, politically at home, this might be more challenging to sell, particularly in a country where people are, you know, tired of inflation, sorry, austerity.

因此在国内政治层面，这或许更难推销，尤其在一个民众已厌倦紧缩（抱歉应是通胀）的国度。

⌂ But inflation is clearly Millet's biggest electoral asset bringing it down.

但降低#通胀#显然是#米莱#最大的选举#资产#。

⌂ So having the funds from the the Treasury would help him maintain that big accomplishment.

获得财政部资金将助他维持这一重大政绩。

 00:11:07

⌂ And overall, Jimena, how has his policies been in terms of their effectiveness?

总体而言，希梅娜，他的政策实效如何？

⌂ You know, the chainsaw economics that he promised he would implement?

就是他承诺要#推行#的链锯式#经济#改革？

⌂ Well, I think the top policy, which has to do with inflation, and we have to, you know, put it in context.

我认为首要政策关乎#通胀#，需结合背景来看。

⌂ We're talking inflation in August was 1.9 percent just for the month.

八月单月#通胀#率为1.9%。

⌂ That gives you an annualized 33.6 percent.

年化率达33.6%。

 00:11:32

▶ But when we think about the level of inflation when he took over, which was over three figures, it's incredible improvement.

但考虑到他接手时三位数的#通胀#水平，这已是巨大进步。

▶ And people are seeing that on prices.

民众从物价中能感受到。

▶ In fact, if we think about the volatility of the peso recently, the past through rate.

实际上，若考虑近期比索的#波动性#及传导速率。

▶ So what we mean by that is when the peso loses value, how much more are goods, you know, worth it on the shelf?

即比索贬值时商品零售价上涨幅度？

 00:11:58

▶ So how does that go into the actual price of goods?

这对实际商品价格的影响？

▶ It hasn't been as direct as we have seen historically in the country.

其直接程度不及该国历史表现。

▶ So formulae concentrating on inflation.

因此当前重心在#通胀#治理。

▶ This is, you know, his big piece of homework.

这是他的核心课题。

H1B签证费用暴涨后，英国如何把握此机遇立即成为话题。

bilibili 00:14:43

▶ Yes, I mean, the UK should definitely try and capitalize on the opportunity, but it's not just about attracting the right talent with those sort of visa incentives.

英国当然应努力把握机遇，但仅靠签证激励吸引人才远远不够。

▶ Yeah, there is a whole load more, which needs to be put in place, particularly in terms of the implications for data centers, the demands on the power grid.
