▶ Justin is this link to climate change.

贾斯汀，这与气候变化有关吗？

🎧 Well, Rita the story is not straightforward in terms of climate change.

丽塔，就气候变化而言，情况并不简单。

🎧 We've always had big storms even in summer and it's very hard to find a pattern in terms of the frequency and intensity of those storms because it's always varied a lot year to year and decade to decade.

即使在夏天，我们也一直有大风暴，而且很难在风暴的频率和强度上找到规律，因为每年和每十年都有很大差异。

 00:07:10

🎧 The Met Office says there's no compelling evidence of storminess in terms of the maximum gust speed of storms over the last few decades.

英国气象局表示，过去几十年来，没有确凿证据表明风暴的最大阵风速度有所增加。

🎧 Why do studies in North Atlantic say the same thing?

为什么北大西洋的研究也这么说？

🎧 So climate change doesn't certainly at the moment appear to be playing a role.

所以目前气候变化似乎确实没有发挥作用。

🎧 Now that said most climate models suggest there will be a slight rise both in the number and the intensity of particularly winter wind storms.

话虽如此，大多数气候模型表明，特别是冬季风暴的数量和强度将略有上升。

 00:07:33

🎧 It's easy to understand why the hotter it is the warmer it is the warmer the sea and air is the more energy there is to drive the wind the warmer the air temperature is the more moisture it can hold so you tend to get more rainfall as well.

很容易理解为什么温度越高，海温和气温越高，驱动风的能量就越多，气温越高，空气中能容纳的水分就越多，因此降雨量也会增加。

🎧 There's also a link with big cyclones warmer sea temperatures means they can track across the UK more easily but the bottom line is this at the moment no strong link between

climate change and storminess here in the UK.

与大型气旋也有联系，海温升高意味着它们更容易穿过英国，但底线是目前在英国气候变化与风暴之间没有强烈联系。
