

Bloomberg Business Week Daily: Tech Turmoil, Market Moves, and CEO Diplomacy

【彭博社商业周刊 20250926 特斯拉因欧洲销售数据疲软而遭受重创 | 英特尔已就潜在投资事宜接洽苹果 | TikTok新投资者浮出水面】

Summary: U.S. stocks fell broadly, with major indices like the S&P 500, Dow Jones, and Nasdaq all finishing in the red, led by significant declines in tech giants, particularly Tesla, which was hit by weak European sales data. In a major exclusive, Bloomberg reported that Intel has approached Apple about a potential investment, a move analysts suggest is more about fostering good relations with the Trump administration than technological synergy. Separately, a deal for TikTok emerged, with Oracle, Silver Lake, and MGX poised to become main investors, taking a combined 45% stake. Despite market worries, Affirm's CFO reported a healthy consumer with strong repayment rates. The episode also explored the growing integration of AI into personal computers and how AI and data science are being leveraged to improve women's health outcomes globally.

摘要：美国股市普遍下跌，标普500、道琼斯指数和纳斯达克指数全线收跌，科技巨头领跌，尤其是特斯拉因欧洲销售数据疲软而遭受重创。据彭博社独家报道，英特尔已就潜在投资事宜接洽苹果，分析人士指出，此举更多是为了与特朗普政府建立良好关系，而非技术上的协同效应。此外，TikTok的交易浮出水面，甲骨文、银湖资本和MGX即将成为主要投资者，合计持有45%的股份。尽管市场存在担忧，Affirm的CFO报告称消费者状况健康，还款率强劲。本期节目还探讨了AI在个人电脑中日益深入的应用，以及如何利用AI和数据科学改善全球女性健康成果。

▶ This is Bloomberg Business Week Daily, reporting from the magazine that helps global leaders stay ahead.

这里是彭博商业周刊每日播报，为您带来这本助力全球领袖保持领先地位的杂志的深度报道。

▶ With insight on the people, companies, and trends shaping today's complex economy.

以#洞察#剖析影响当今复杂经济格局的人物、企业与趋势。

▶ Plus, global business, finance, and tech news as it happens.

同时实时追踪全球商业、金融与科技动态。

▶ Bloomberg Business Week Daily, with Carol Masser and Tim Stenevek live on Bloomberg Radio, television, YouTube, and Bloomberg originals.

彭博商业周刊每日播报，由卡罗尔·马瑟和蒂姆·斯特内维克在彭博电台、电视、YouTube及彭博原创平台为您直播。

 00:00:27

▶ And a very good afternoon, everyone live across Bloomberg platforms.

各位彭博平台的听众朋友们，下午好。

▶ This is Bloomberg Business Week Daily for yes, it is Friday's Eve, Thursday, September 25th, 2025.

这里是彭博商业周刊每日播报，没错，今天是周五#前夜#，2025年9月25日星期四。

▶ Carol Masser, Tim Stenevek, and we are seeing stocks definitely off their best levels.

卡罗尔·马瑟、蒂姆·斯特内维克与您共同关注股市——目前已明显脱离日内高点。

▶ They're in the red across the board.

各大板块全线飘绿。

▶ Those max seven names really weighing on the trade today.

那七家巨头公司今日确实拖累了交易。

 00:00:44

▶ Yeah, Charlie Pellets, you can have the details, but seeing red across the screen as you mentioned, Carol, the Nasdaq can pause the down a full percentage point right now, the S&P 500, down 9.10 of 1% the Dow down, 6 cents of 1% Tesla taking a real beating today as a result of what we heard from Europe.

是的，查理·佩莱茨将带来详情。正如卡罗尔所言，屏幕上一片惨淡：纳斯达克现跌整整1个百分点，标普500跌0.91%，道指跌0.06%。特斯拉因欧洲传来的消息今日遭受重创。

▶ And car sales happening in Europe, Tesla, a very small portion, less than 2% of car sales there.

而在欧洲汽车销量中，特斯拉占比极小，不足2%。

▶ You know who isn't taking a beating is Intel.

您知道谁没遭殃吗？是英特尔。

bilibili 00:01:07

▶ This stock is one of your top performers in the S&P and the Nasdaq 100.

该股是标普和纳斯达克100指数中的领涨股之一。

▶ It's up for a third day.

已连续三日上涨。

▶ We're going to get into why oh why might Apple actually want to invest in the company?

我们将深入探讨：苹果究竟为何可能投资这家公司？

▶ We'll get to that in just a moment.

稍后为您解析。

▶ Plus, a view from the C-suite on that and more with Cristiano Amman, the CEO and president of Qualcomm.

此外，还将带来高通CEO兼总裁克里斯蒂亚诺·阿蒙从#高管#视角对此事及其他议题的见解。

bilibili 00:01:23

▶ He's going to be joining us in just a few minutes.

他将在几分钟后加入我们。

▶ We've got the CFO of a firm.

我们还将连线一位公司的CFO。

▶ Robo Harris going to be in the house.

罗伯·哈里斯即将到场。

▶ We'll get a view of consumers, what they are up to.

我们将了解消费者的最新动向。

▶ And then leveraging AI to transform women's health.

以及如何利用人工智能变革女性健康领域。

▶ That's all coming your way in just a moment.

所有这些内容稍后即将为您呈现。

▶ First up though, a check of the day's trade and top business stories.

但首先，来关注今日交易情况及重要商业新闻。

 00:01:38

▶ Here he is.

有请。

▶ Charlie Pellets.

查理·佩莱茨。

▶ Thank you very much.

非常感谢。

▶ Lower across the board right now on the equity market.

股市目前全面走低。

▶ Do you want to begin with a developing story involving TikTok?

是否先从一则涉及TikTok的最新动态开始？

▶ We had the headline moments ago here on the Bloomberg professional service.

我们刚刚在彭博专业服务上看到这则#头条#。

▶ Oracle, Silver Lake and MGX will be the main investors in TikTok.

#甲骨文#、银湖资本和MGX将成为TikTok的主要投资者。

 00:01:55

▶ That's according to CNBC citing sources.

这是CNBC援引消息人士的说法。

▶ The three will have a combined 45% ownership of tech TikTok again.

三方将合计持有TikTok全球业务45%的#所有权#。

▶ Developing story right now headline on the Bloomberg stocks in the red right now.

最新动态正作为#头条#在彭博终端推送，股市目前一片飘绿。

▶ Stocks are falling as valuation worries overshadowing data this morning showing that the economy is holding up those numbers.

股市下跌，因估值担忧盖过了今早显示经济持稳的数据。

 00:02:14

▶ The economic numbers not having much of an impact on Fed bets, but bond yields kept rising after a week treasury sale.

经济数据对美联储政策预期影响不大，但国债发行后债券收益率持续上升。

▶ We've got the S&P down 59 at 65 78.

标普指数下跌59点至6578点。

▶ Trump there are nine tenths of 1% down industrials now down 290 a decline of 6 tenths of 1%.

道指现跌0.9%，工业股跌290点，跌幅0.6%。

▶ Tech selling off Nesdaq down 1% Nesdaq 100 index also down 1% that are a mag 7 indexes carol mentioned down now by just about 1.5%.

科技股遭抛售，纳斯达克跌1%，纳斯达克100指数亦跌1%，卡罗尔提到的七大巨头指数现跌约1.5%。

 00:02:43

▶ The 10 year at 4.17% with a 2 year 3.65% gold up \$9.00 the ounce up by about 2 tenths of 1% and West Texas, in the media crew oil WTI 64 78 a barrel down now by 3 tenths of 1%.

10年期国债收益率4.17%，2年期3.65%；黄金上涨9美元/盎司，涨幅约0.2%；西德克萨斯中质原油报每桶64.78美元，跌0.3%。

▶ Amazon has agreed to pay 2.5 billion dollars in penalties and refunds and change its process for how to cancel its prime subscriptions to settle a lawsuit by the Federal Trade Commission Amazon down by 1.1%.

亚马逊已同意支付25亿美元罚款和退款，并修改取消Prime会员的流程，以和解联邦贸易委员会的诉讼，亚马逊股价跌1.1%。

▶ Starbucks plans to close stores and eliminate 900 jobs again recapping stocks lower S&P down 62 drop there of 9 tenths of 1%.

星巴克计划关店并#裁撤#900个岗位。再次总结股市下跌：标普跌62点，跌幅0.9%。

 00:03:24

▶ For on demand news 24 hours a day subscribe to Bloomberg News now wherever you get your podcasts.

如需24小时按需新闻，请立即#订阅#彭博新闻，无论您通过何种平台收听播客。

▶ I'm Charlie Palatin that is a Bloomberg Business Flash.

我是查理·帕拉廷，以上是彭博商业快讯。

▶ All right Charlie thank you so much so shares of Apple little changed in fact they're just up about 3 tenths of a percent as we speak.

好的查理，非常感谢。苹果股价变动不大，目前仅微涨约0.3%。

▶ This nearly 24 hours after the Bloomberg exclusive that Intel has approached Apple about securing an investment in the company is according to people familiar with the matter.

约24小时前，彭博独家报道称英特尔已接洽苹果寻求投资，据知情人士透露。

 00:03:48

▶ It's all a part of efforts to really bolster a business that's now partially owned by the US government.

这均是为提振这家目前#部分#归美国政府所有的企业所做的努力。

▶ So Apple little change today not the case over Intel rallying another almost 6% in today's session and we saw the stock rally yesterday as that news hit late in the Wednesday trade.

因此苹果今日波动不大，但英特尔不同——今日交易中再度大涨近6%，且昨日该消息在周三尾盘传出后股价已应声上涨。

▶ Okay so the story got many we think it's to say to say including us asking why or why would Apple make an investment such as this remember it's just reporting that Intel has approached Apple about this at this point.

此事引发诸多疑问，包括我们也在探讨苹果为何会进行此类投资。需注意目前仅是报道英特尔已就此接洽苹果。

 00:04:18

▶ That's that's what we have so we wanted to bring in Mark Gurman because we're really curious about what he's hearing he's Bloomberg News managing editor for global consumer tech.

基于现有信息，我们想邀请马克·古尔曼加入讨论，我们非常好奇他的听闻，他是彭博新闻全球消费科技板块的总编辑。

▶ He is the Apple guy he covers this company so closely.

他是苹果领域的专家，长期紧密跟踪该公司。

▶ He joins us from the Bloomberg Los Angeles Bureau Mark what are you hearing about this.

他从彭博洛杉矶#分社#连线我们。马克，您对此有何听闻？

 00:04:36

▶ From a technology perspective you guys are right there is no reason for Apple to want to invest in Intel but from a play nice with the Trump administration and it's.

从技术角度你们说得对，苹果没有理由投资英特尔，但若从与特朗普政府搞好关系、

▶ Do more manufacturing in America standpoint and investments there it's a great idea Apple obviously wants to be on the good side of the Trump administration of the White House.

以及加强在美制造和投资的角度看，这倒是个好主意。苹果显然希望与特朗普政府、与白宫保持良好关系。

⏮ There are several things that they want from Trump they want Trump to help them push back against the EU's digital markets act.

他们希望特朗普能提供几项帮助：抵制欧盟的数字市场法案、

bilibili 00:05:05

⏮ They want Trump to help them reduce their tariff payments right so they need all sorts of things for him not to mention the DOJ law suit that's supposed to go to trial in 2027 they want his help getting that thrown out.

协助降低关税支付等，他们需要他多方面支持，更不用说希望他帮忙驳回定于2027年开庭的司法部反垄断诉讼。

⏮ And so they can make Trump look good by investing in Intel obviously the US government now owns a tenth of the of the chip maker obviously the US government wants to show of its constituents that it has Tim Cook and Apple the poster child of American innovation they think playing nicely with them and partnering with them so from that perspective it's just about looking good from a technology perspective Apple very likely to never use chips from the US government.

因此通过投资英特尔可为特朗普增光——毕竟美国政府现持有该芯片制造商十分之一股份，政府显然想向选民展示其与美国创新典范蒂姆·库克及苹果的合作关系。故从此角度看这仅是形象工程。技术层面，苹果极可能永不采用美国政府关联芯片。

⏮ And so they want to never use chips from Intel again the chip has sailed the the ship has sailed I should say there the chip has sailed to if I'm being honest they're all in on TSMC based production they're all in on processors based on that arm architecture not the X86 architecture that Intel uses obviously Apple dropped Intel from its computers half a decade ago but there are some.

坦白说，他们已彻底转向台积电生产，全面押注ARM架构处理器而非英特尔使用的X86架构——苹果五年前就已在其电脑中弃用英特尔，但存在一些、

bilibili 00:06:14

▶ And so the US advanced chips low end nodes as they call them not the advanced processors that you think of as SOCs or chips and iPhones and next today that Intel could theoretically you know produce for Apple Apple already sources billions and billions of types of chips and components inside devices that no one's ever heard over cares about that Intel could theoretically manufacture it some their facilities for them.

所谓美国先进芯片的低端节点（非指iPhone等设备中的SOC或先进处理器），英特尔理论上可为苹果生产这些。苹果设备内部已使用无数无人知晓的芯片组件，英特尔理论上可为其部分代工。

▶ And so it's like chip packaging that is not a high tech process that they could work with Apple on so there are angles there but you know for all the sense of purposes if they do this it would be a lip service to make things even nicer between Apple and the US government rather than improve technology for the company.

例如芯片封装这类非高技术流程可合作。故存在合作空间，但本质上若成行，更多是苹果向美国政府示好的表面文章，而非真正提升技术。

▶ So we'll call it CEO presidential diplomacy if you will but having said that mark at the same time doesn't Tim Cook kind of have a fiduciary responsibility to do anything in this environment where if you get negative attention from the White House it can be problematic for your company and certainly for your share price so does it also kind of makes sense to play nice in this environment and probably CEOs do it to different degrees with all presidents.

不妨称之为CEO的总统外交。但话说回来，蒂姆·库克难道没有受托责任在此环境下采取行动吗？若遭白宫负面关注，对公司及股价均不利。因此在此环境下示好也有其道理，可能所有CEO对不同总统都会不同程度地这样做。

 00:07:28

▶ You have to thread the needle if you're Tim Cook right on on you know the Trump administration Donald Trump is obviously very divisive right I think that is the most obvious thing that anyone has said on your radio show in a year.

若您是蒂姆·库克，必须精准拿捏分寸。特朗普政府、唐纳德·特朗普显然极具争议性——这可能是您电台节目一年来最显而易见的评论了。

▶ And you know Tim Cook has to do what he can do from a fiduciary standpoint to make sure that they're paying less tariffs to make sure Apple is safe as a business.

而且你知道，#蒂姆·库克#必须从受托责任的角度出发，确保公司支付更少的关税，以保障#苹果#作为一家企业的安全。

▶ but there's also the element of employees who are not pro Trump and customers who are not pro Trump and the legions of people who find it I would say gross or disgusting that Tim Cook is as close to Donald Trump as he appears to be.

但还有不支持#特朗普#的员工和客户因素，以及大批认为#蒂姆·库克#与#唐纳德·特朗普#如此亲近令人反感或厌恶的群体。

bilibili 00:08:15

▶ I think that I know and I think that a lot of people know that a lot of this is just diplomacy or a game to some extent trying to make the company as effective as possible trying to save as much money as possible and just doing his fiduciary duties as a CEO.

我认为很多人都明白，这很大程度上只是外交手段或某种程度的博弈，旨在让公司尽可能高效运转、节省开支，也是他作为CEO履行的受托责任。

▶ but there are a lot of people who don't recognize that.

但很多人并未意识到这一点。

▶ and so this goes well beyond the potential intel investment.

因此这远不止潜在的对#英特尔#投资。

bilibili 00:08:38

▶ but it's certainly a balancing act that Tim Cook has been having to try to strike the money.

但这无疑是#蒂姆·库克#一直在努力达成的平衡之举。

▶ For a while now you know Ryan Gould who was part of the deals team I know you worked on the story to yesterday Mark he was part of the deals team that worked on the story as well.

有段时间你知道#瑞安·古尔德#曾是交易团队成员，马克我知道你昨天也在跟进这个报道，他当时也是参与该报道的交易团队成员。

▶ he came on our program and he referenced Tim Cook at the White House just a few months ago in the multi hundred billion dollar commitment to invest in the US that Tim Cook

made there.

他做客我们节目时提到几个月前#蒂姆·库克#在白宫作出的数千亿美元对美投资承诺。

 00:09:04

⏮ how does this fit into that number in the hundreds of billions of dollars to think up to 600 billion dollars at this point or how would it not.

这如何融入目前高达6000亿美元的投资规模，又或者为何不纳入其中。

⏮ how does it how would it.

这究竟如何关联。

⏮ I mean within that six hundred billion dollars that they they've earmarked a lot of those are chip making companies and so any investment they would make an intel just go into that pool.

我的意思是在这6000亿美元中，他们已指定大部分资金用于芯片制造公司，因此对#英特尔#的任何投资都会归入该资金池。

 00:09:26

⏮ you know the most interesting thing about that six hundred billion dollar number is that it's an eye watering number because it is eye watering right there it's it's.

你知道这个6000亿美元数字最有趣之处在于它令人瞠目，因为确实如此。

⏮ A lot of it is reality and some of it are probably things like stock buybacks and dividends in what have you two people in the US and buying back shares in a US based company right.

其中大部分是真实投资，部分可能涉及股票回购、股息等，比如在美国的两人及回购美企股票。

⏮ so it's not like the writing six hundred billion dollars worth of checks to different ship makers and investments and such so.

所以这并非直接开立6000亿美元支票给不同芯片制造商进行投资之类。

 00:09:55

▶ It is pretty interesting and I think it goes back to what Carol said about this being CEO and presidential diplomacy and you know Apple did some of this with prior administrations there were.

这相当有趣，我认为这回到#卡罗尔#提到的CEO与总统级外交，你知道苹果与往届政府也有过类似互动。

▶ Similar analysis related to American manufacturing and American innovation with with President Biden.

类似关于美国制造和美国#创新#的分析也出现在与#拜登#总统的互动中。

▶ Steve jobs was was close to some extent with president Obama.

#史蒂夫·乔布斯#在某种程度上与#奥巴马#总统关系密切。

bilibili 00:10:17

▶ They sort of they overlapped it in their 10 years there so certainly this is not abnormal.

他们在十年任期中有过交集，因此这当然并非#异常#现象。

▶ I just think this is getting more attention because of the device of this to some folks about the Trump administration.

我只是认为由于部分人对特朗普政府的看法，此事获得了更多关注。

▶ So I know you you focus is on Apple but from an intel perspective does this money you know and shares of intel this year have absolutely surged up 64 and a half percent a lot of that has to do with the investment that the US government made or.

我知道你专注苹果，但从英特尔角度看，这笔资金是否——你知道英特尔股价今年已暴涨64.5%，这很大程度上与美国政府的投资有关。

bilibili 00:10:47

▶ The ownership of the US government of course the in video.

或是美国政府通过#英伟达#的#持股#。

▶ Investment to the news there but I'm wondering if if this changes fundamentally intel at all and if Apple were to make this investment if this would help.

虽然投资消息已出，但我想知道这是否会根本性改变英特尔，若苹果进行投资是否会助其。

▶ Intel take on some of its rivals and and actually move into the AI era.

对抗部分对手并真正迈入AI时代。

▶ You know it's funny in some cases.

你知道有趣的是。

 00:11:12

▶ Apple store you go in Apple store mall or in a particular city and they get really big tax breaks in some cases to put their their store in that mall they have to get discounts for putting their store in the mall because the mall sees it as a driver to bring people into the mall and get them to shop.

苹果门店——无论是商场还是特定城市的苹果店，他们有时能获得大幅税收减免入驻商场，甚至因入驻而获得折扣，因为商场视其为吸引客流的引擎。

▶ At at the particular store right and so.

正是基于特定门店的效应。

▶ By point being that a partnership with Apple could make Intel look really strong and good and as an innovator and potentially get them customers right from other companies as well.

我的观点是，与苹果的合作能让英特尔显得强大可靠、具有创新力，甚至可能直接为其带来其他公司客户。

 00:11:54

▶ and so the Apple brand is so strong that it can have a positive you know layering effect for Intel.

苹果品牌如此强大，能对英特尔产生积极的叠加效应。

▶ and I think that is the play there in addition to the funding.

我认为除了资金之外，这才是背后的策略。

▶ I have a silly question for you but you know here we go.

我有个傻问题，但请听好。

🎧 Is it possible Intel could have called up Apple Mark and they're like yeah you we don't want to talk to you I mean would they do that or is there kind of a Silicon Valley.

有没有可能英特尔给苹果打电话说“我们不想跟你谈”？马克，他们会这样做吗？还是硅谷有种。

 00:12:19

🎧 Hey yeah we are all always talking to each other.

“嘿，我们一直保持沟通”的氛围？

🎧 They're always talking to each other I mean they show that they have an enemy like relationship with met up maybe with Google on one hand and Amazon but all these CEOs and all these executives.

他们始终在相互沟通——虽然表面显示与Meta、谷歌或亚马逊存在敌对关系，但所有CEO和高管。

🎧 All these companies are interlinked socially business wise spouses know each other their kids go to the same schools with each other they're all linked together right there's no getting away from that.

这些公司在社交和商业上盘根错节，配偶相互认识，孩子上同一所学校，彼此紧密相连无法分割。

 00:12:47

🎧 so like on the surface they may show these bad relationships.

所以表面可能展现对立关系。

🎧 but there's no declining a call from another CEO and another company they all know each other they all text.

但绝不会拒接另一家公司CEO的电话，他们都相识且互发短信。

🎧 All right okay that makes sense hey listen so on that I'm just thinking about the H1B visa visa and what President Trump has talked about in regards to this and we've been talking a lot about the impact on the tech sector I am curious what you are hearing what's Apple's exposure on this you know this is terrible honestly this is terrible.

好的有道理。说到这个，我正在想H1B签证问题以及特朗普总统的相关言论，我们讨论了很多对科技界的影响，我好奇你听到什么，苹果在这方面面临多大风险？说实话这很糟糕。

bilibili 00:13:18

⌂ Well it's not like so let me take a step back here the reality is is that other countries are are producing great talent countries like India and I think it's a it's a good thing for America to have the best talent no matter where they come from and I think Apple agrees with that specifically.

其实——让我退一步说，现实是印度等国家正在培养优秀人才，我认为美国吸纳全球顶尖人才是好事，苹果尤其认同这点。

⌂ And you know the other thing to note is that the Indian community at Apple from what I've heard is up in arms about this there are a lot of people on H1B is a lot of people trying to get green cards Apple spends a lot of money to help that make that happen and the engineering talent coming from places like India.

另外值得注意的是，我听说苹果内部的印度社群对此强烈不满，很多持H1B签证的员工努力获取绿卡，苹果投入大量资金协助达成，而来自印度等地的工程人才。

⌂ And I think that the other thing is that the CIO is just you know supreme there are many executives at Apple the COO is from from from India the CEO the COO's deputy his eventual successor is from India some of their top software engineering executives are from India so they have a lot of talent from from outside the US.

还有关键是苹果众多高管来自印度——COO是印度人，CEO的副手即潜在继任者来自印度，一些顶尖软件工程高管也来自印度，所以他们拥有大量海外人才。

bilibili 00:14:22

⌂ and Apple is only Apple to some extent because of the talent they have been able to bring in from across the world.

苹果之所以成为苹果，某种程度上正因他们能从全球招揽人才。

⌂ So for Apple this is a is a terrible thing I would say for American innovation right.

因此对苹果这是糟糕的事，我认为对美国#创新#也是如此。

🎧 American innovation is not only made by Americans it's made by people who chose to move to America from other countries for a better opportunity and to have an impact.

美国创新不仅由美国人创造，也由那些为更好机遇和影响力而移居美国的人共同成就。

 00:14:47

🎧 so I don't I don't think this is a good thing at all for Apple Amazon Google Meta or any of the tech companies are quite frankly the country.

所以这对苹果、亚马逊、谷歌、Meta或任何科技公司乃至国家都绝非好事。

🎧 And we do have a story in the Bloomberg I just want to point out that a bipartisan Senate duo is pressing Amazon Microsoft other companies on their use of H1B visas to hire foreign workers with specialized skills so all of that going on in the background hey we're speaking with Mark Gurman is Bloomberg News managing editor for global consumer tech he joins us from Los Angeles mark more on the H1B story you know we saw so many tech CEOs just a couple of weeks ago at the White House at that dinner I was surprised to see a decision such as this from the president given that it would affect.

彭博社有报道指出，两党参议员正就使用H1B签证雇佣外籍专业人才向亚马逊、微软等公司施压，这些都在背景中发酵。我们正与彭博新闻社全球消费科技执行主编马克·古尔曼连线，他从洛杉矶加入。马克关于H1B议题：几周前白宫晚宴聚集众多科技CEO，鉴于这会严重影响这些公司，总统作出此类决定令我惊讶。

🎧 The companies that these individuals run so negatively what why don't you think we've heard a collective message from the tech community on the H1B visa issue yet.

为何科技界尚未就H1B签证问题发出集体声音？

 00:15:37

🎧 Oh I mean Tim you know the answer to that it's because they're scared of Donald Trump and they don't want to push back on this H1B visa issue only for Trump to hit back at them with tariffs or starting to charge Apple more tariffs than they're already paying today right I think they.

哦，蒂姆，你知道答案的——因为他们害怕#唐纳德·特朗普#，不想在#H1B签证#问题上公开对抗，结果反而招致特朗普用关税反击，或者开始对#苹果#征收比现在更高的关税，对吧？我觉得他们——

▶ They are worried if they fight on this issue they'll come back and be hit harder on other issues maybe issues that they consider more fundamental to their lobbying efforts you're not going to see Apple push back publicly against this H1B issue they would have done so already instead they're going to work with lobbyists and other groups behind the scenes to have them do their bidding for them but you're not going to see them push back publicly that's not going to happen.

他们担心若在此事上强硬表态，会招致其他更核心游说议题的报复。你绝不会看到苹果公开反对#H1B签证#政策，要反对早行动了。相反，他们会幕后联合说客组织代为发声，但公开对抗绝无可能。

▶ All right we're going to leave it there I'm so glad we are so glad Mark that you could lay that out for us both on the H1B visas but also Apple and Intel possible link up Mark Irman he's Bloomberg News managing editor for global consumer technology we're going to stay on the tech world because we did have some headlines involving TikTok.

好的就此打住。马克，非常感谢你清晰剖析了#H1B签证#和苹果与英特尔潜在合作。马克·厄尔曼是#彭博新闻社#全球消费科技总编辑。我们将继续关注科技领域，因为确实出现了涉及TikTok的重磅新闻。

 00:16:41

▶ Yeah Oracle Silver Lake and MGX will be the main investors in TikTok this according to CNBC's David Fabre who reported this on air he said if people familiar with the matter Oracle Silver Lake and MGX will have a combined 45% ownership of TikTok that's according to Fabre look at it shares Oracle right now Carol down about 5.8%.

是的，#甲骨文#、#银湖资本#和MGX将成为TikTok主要投资者——这是根据CNBC大卫·法伯的现场报道。他称知情人士透露这三方将合计持有TikTok45%股权。看看甲骨文股价，卡罗尔，目前下跌约5.8%。

▶ All right we're talking TikTok we just talked about a possible Intel Apple kind of tie up there with our Mark Irman we want to stay again on really the tech world and even that we're going to talk about the tech world.

我们刚讨论了TikTok和英特尔苹果的潜在合作，现在要继续深挖科技领域——甚至可以说我们要聚焦科技界。

▶ And even that tie up or possible tie up we've got the head of a company that's one of the world's biggest sellers of the chips at the heart of mobile phones including Apple which is its

second biggest customer at least according to Bloomberg data great to have with us.

关于这项潜在合作，我们请来了全球最大手机核心芯片供应商的掌门人，其第二大客户正是苹果（至少彭博数据显示如此）。非常荣幸请到——

 00:17:22

⏮ Cristiano Amon he is CEO and president of Qualcomm he joins us from the snap dragon summit in Maui Hawaii along with our BTEC co host Ed Lede Lowe which you can find on BTV every day 11 a.m. Wall Street time.

#克里斯蒂亚诺·阿蒙#——#高通#公司首席执行官兼总裁，他从夏威夷毛伊岛的#骁龙#峰会连线我们。同场的还有BTV科技栏目联合主持人埃德·莱德·洛（华尔街时间每日上午11点播出）。

⏮ Ed out there in our San Francisco Bureau gentleman great to have you both here on Bloomberg Business Week daily Cristiano I want to start with you I got to ask you Apple is you know according to our data your second biggest customer what would a possible Apple Intel tie up mean to you guys.

埃德在我们旧金山分社。两位先生欢迎做客《彭博商业周刊每日播客》。克里斯蒂亚诺，首先请问：苹果是贵司第二大客户，若其与英特尔联手对高通意味着什么？

⏮ Look there there's no relationship and actually it has been widely reported for years now that over the next few years I think Apple will stop you know getting chips from Qualcomm and the company has really moved on on not only what we're doing within the Android ecosystem but we're now in PCs and automotive and industrial and robots we even into the data center so Qualcomm is going to be able to get a lot of money.

实际上双方已无关联。多年来一直有报道称苹果未来将停止采用高通芯片。我们早已转型——不仅深耕#安卓#生态，还进军PC、汽车、工业、机器人乃至数据中心领域，因此高通营收来源非常多元。

 00:18:20

⏮ So Qualcomm is a different company right now we continue to execute on this strategy and there's really no relationship.

如今的高通已脱胎换骨，我们持续#执行#这一战略，与苹果确实不存在关联。

⏮ But in terms of a tie up do you think that's even something likely that there is some deeper relationship between those two companies.

但您认为这两家公司真有可能建立更深层合作吗？

▶ The way I think about it and like I don't know details but I can I can only see two possible angles one possible angle is Intel continue to invest to become a foundry in that case you know as we are a fabulous company we welcome more foundry today we we manufacture our chips with TSMC with Samsung and if Intel has the capability to become a competitive foundry in America we're very happy and we and we will look at them.

我虽不了解细节，但认为有两种可能：一是英特尔持续投资转型为代工厂。作为芯片设计公司，我们乐见更多代工选择（目前与#台积电#、#三星#合作）。若英特尔能成为美国有竞争力的代工厂，我们会考虑合作。

 00:19:05

▶ As a manufacturer as far from a product standpoint I can't really see a connection because Apple have their own processor.

但从产品#立场#看，我看不出关联性，毕竟苹果自研处理器。

▶ And we want to get on to other stuff one more question though how are you feeling about the government investing in Intel do I don't know would it be fair for other companies even a Qualcomm to say wait you know what about us.

再问一个：您如何看待政府资助英特尔？其他公司（比如高通）是否该质疑公平性？

▶ Look my understanding of this is there is there is an overarching strategic topic which is manufacturing of semiconductors and I think we know and it's been widely reported that you know Intel had a struggle to compete with companies like TSMC and Samsung.

我认为这关乎半导体制造的战略大局。众所周知英特尔与台积电、三星竞争艰难——

 00:19:51

▶ So anything that is driven towards enhancing the industry manufacturing capability especially in the United States or even other places so we have a more geographically diversified manufacturing that's actually good news we're looking at the big picture.

任何提升产业制造能力（尤其在美国）的措施，实现制造地域多元化，都是利好。我们着眼全局。

▶ Cristiano like the thing definitively that's changed is the landscape in both PC and mobile but I really want to start on the PC bit I look at what's come out Maui.

克里斯蒂亚诺，PC与移动领域格局确实巨变。我想先从PC切入——毛伊岛发布的新品令人瞩目。

▶ Generations generation from a year ago and what's really clear is you want to push even deeper into windows based PC could you just explain like how the generation updates on the tech help you do that and why it's important.

相比一年前，你们显然要深耕WindowsPC市场。请说明技术迭代如何助推这一战略及其重要性。

bilibili 00:20:37

▶ Yes and I wish you all here with us this is actually not really we wish we were there also yes this has been this has been day three of a lot of announcements all chip announcements and one thing that we're actually very proud I think as as I said you know earlier to Carol I think the company is is diversifying we're building products for many different industries and PCs are is one of the growth of actors of the company.

真希望你们也在现场！这已是发布会的第三天，全是芯片新品。正如我对卡罗尔所言，最自豪的是公司多元化战略——为多行业打造产品，PC正是增长引擎之一。

▶ So we announced our second generation PC is just we just enter this market and in our second generation I think people are seeing one of the biggest leaps in performance from generation to generation we have 40% improvement in the CPU 80% improvement in the GPU and we actually have the very first processor in a thin and light laptop and running a five gigahertz of clock frequency and I and but the real need.

我们刚推出第二代PC芯片（入门该市场仅两代），但已实现最大代际性能飞跃：CPU提升40%，GPU提升80%，更是首款在轻薄本上达到5GHz主频的处理器。但真正的核心——

▶ The real news is the amount of AI performance I think the transition of phones and PCs to AI is happening and those are those chips are designed to do.

真正的突破是AI性能——手机与PC正向AI转型，而这些芯片正是为此而生。

bilibili 00:21:46

🎤 I don't want to make statements because I'm the journalist and as you know I love to ask questions but I go very deep on what's happening and so like there's an acceptance that this is.

我作为记者偏爱提问而非断言，但深入研究后发现业界已形成共识：

🎤 Edge technology that's deployed in the real world but I kind of want to hold you to how it's going you know in February you basically said that in really specific category you know windows PC priced eight hundred dollars above I think you said.

这是落地实装的边缘计算技术。但我想追问进展：您二月曾提到在800美元以上WindowsPC细分市场——

🎤 You had 10% market share in that and I'm looking at the specifics of what came out of Maui in the last three days do you have an update on the ownership you have in that market or what this latest gen of chipsets will do to push you deeper into it.

当时市占率10%。结合毛伊岛三天发布的新品，能否更新该市场占有率？新一代芯片如何助力深入拓展？

 00:22:28

🎤 Yes this is a great question we are you know as we knew in this market and it has been you know it's it's actually we can leverage a lot of technology exactly a creative I think to welcome.

这个问题很棒。我们进入该市场时就知道，实际上能借助大量技术创新——

🎤 And we're tracking to what we said we actually only launched this you know you see PCs with our chips in the United States in the top five European markets and we're tracking about 9% right now I think our projection was by 2029 to get to about 12% very reasonable but what is exciting right now and and that's I think in your question is the edge AI transition is happening.

目前进展符合预期：搭载我们芯片的PC刚进入美国和欧洲五大市场，当前市占率约9%。预计到2029年达12%很合理。但当前最激动人心的（也是您问题的核心）是边缘AI转型正在发生。

🎤 Actually the foundational models now are being designed so they have cloud and edge working side by side and that is actually creating an opportunity for us to accelerate and it is reflected in a number of designs we actually you know why will go just a couple quarters ago

we talk about having a hundred designs across all the major PC OEMs HP Delanovo Acer Sue Sansung now that number is significantly higher and we're seeing the excitement.

现在基础模型设计已转向云边协同，这给我们带来加速机遇。具体体现在设计数量上：几季度前才宣布与#惠普#、#戴尔#、#联想#、#宏碁#、#华硕#、#三星#等主流PC厂商有百款设计，如今数量大幅增长，市场热情高涨。

 00:23:37

 To to Carol's question I think it's fair like that the Nvidia Intel product collaboration puts this emphasis back on eight x86 against arm based.

对于卡罗尔的问题，我认为英伟达与英特尔的产品合作将重点重新放回x86架构对抗基于ARM的架构是公平的。

 How are you tracking the penetration of both in the market you know if you're going to react to that in Nvidia and Intel.

您如何追踪两者在市场的#渗透率#，以及英伟达和英特尔是否会对此作出反应。

 Deal and how it changes the market you must also be tracking it in that context you know how you are pushing yes to that territory.

这项交易如何改变市场，您必然也在该背景下追踪动态，了解如何向该领域推进。

 00:24:07

 Yes when you actually and I'm going to I'm going to quote you when you just said when you actually dig deeper on it and it was interesting actually when that announcement happened it was interesting we were slightly up it was kind of neutral to positive to Qualcomm and and we saw I think the market stock reaction on on arm on AMD on and and Intel was up and the way we actually look at this we're incredibly excited because what he basically means.

是的，当您真正深入分析时——请允许我引用您刚才的话——公告发布时确实很有趣：我们股价微涨，对高通算是中性偏正面，而ARM、AMD和英特尔股价上涨。我们对此感到极其兴奋，因为这本质上意味着：

 Is I think it's in tell sending a message that they're integrated GPU and their AI products are they're not going to likely not to continue with that because that's what the market is seeing it's going to be Nvidia.

我认为英特尔传递的信息是：其集成GPU和AI产品线很可能不会延续，因为市场认为未来将是英伟达的天下。

🎤 So then as Nvidia comes in to the integrated GPU market combining their GPU with Intel x86 you started to bring AI into the PC market and that is the moment we've been waiting for and I think that's what we do and I think the Qualcomm DNA is anything that is battery power is high performance low battery life and a lot of AI that's that's where we want the market to be.

随着英伟达携其GPU与英特尔x86结合进入集成GPU市场，AI开始涌入PC领域——这正是我们期待的时刻。高通的基因在于：任何电池供电设备都需高性能、低功耗与强大AI能力，这正是我们期待的市场方向。

 00:25:17

🎤 So Christiano sell sell sell us on this moment because I think a lot of people's experience with AI so far has been LLM's and LLM's that you can use on your phone LLM's that you can use in a browser so if that's the way they are experiencing AI why will they think that they need to buy a computer that is specialized for AI.

克里斯蒂亚诺，请说服我们把握这一时刻。目前大众对AI的体验多限于手机和浏览器上的大语言模型，若仅是如此，他们为何需要专门购买AI电脑？

🎤 Okay so this is a little different and I wish I you know I have time to walk you to all the details maybe that's an invitation for you all to come here I think next year.

这确实有所不同，真希望有时间详解所有细节——或许这算是邀请各位明年亲临现场的伏笔。

🎤 We'll come.

我们一定到访。

 00:25:51

🎤 Yes but but here's I'll give you some simple I'll give you some very simple data points the first thing is we used to learn how to interact we have to learn how to interact with your phone interact with PC but now with AI whether is what we say what we write what we see the computer knows how to interact with us so the user interface is changing and the user interface actually runs where the human is.

我先提供几个简单数据点：过去是人学习与手机、电脑交互，如今AI让计算机能通过我们的言语、文字、视觉主动交互。用户界面正发生变革，且界面就运行在用户所在的设备上。

🎤 You runs on your phone you runs on your PC so we're starting to see right now you see Microsoft doing that with the agents you see the Google doing that with the agents.

无论是手机还是PC，我们已看到微软和谷歌通过智能代理实现这一愿景。

🎤 They now the computer has this agent ready to interact with you as as your assistant as you do things that's the first thing that has happened the second thing that is happening is there is incredible and on a processing power that is available and as company starting to see AI getting scale because now it's about not just creating AI in the data center I need to deploy I need to make money they realize that you can leverage all of this computer it's transparent.

计算机配备的智能助手可随时交互，这是第一重变革；第二重是处理能力的飞跃。企业意识到AI需规模化落地——不再局限于数据中心创造AI，更要部署变现。关键在于利用所有计算设备，且过程是透明的。

 00:26:56

🎤 It's transparent to you is the wrong thing to talk about AI is cloud or is edge that it doesn't work like that just think of for example if you're office 365 customer you have cloud and you have a client and AI is going to be deployed like that and I and companies are saying if I bring this to the edge my cost goes down my latency improves and I have privacy and that's what we demonstrated many ISVs starting to deploy AI on PCs and Infants.

争论AI属于云端还是边缘是误区。以Office 365用户为例，您同时拥有云端和客户端，AI也将如此部署。企业发现边缘部署能降本增效、保障隐私，这正是我们展示的——众多独立软件开发商正将AI部署到PC和终端设备。

🎤 All right going to leave it there I'm glad we could get that time with you and really cover a lot of ground.

好的，讨论到此为止。很高兴能有机会与您深入交流这么多议题。

🎤 Cristiano thank you so much enjoy Maui we certainly wish we were there it's a pretty great day here in New York City Cristiano among he is CEO and president of Qualcomm from the snapdragon summit in Hawaii along with B.

克里斯蒂亚诺，非常感谢，祝您在毛伊岛愉快！我们真希望也在现场。纽约今天天气极佳。高通CEO兼总裁克里斯蒂亚诺在夏威夷骁龙峰会与B科技联合主持人Ed Lado连线。

 00:27:43

▶ Tech co host Ed Lado in San Francisco check him out every day with Caroline Hyde there on.

旧金山的科技联合主持人Ed Lado，您可每日与Caroline Hyde在彭博电视收看他的节目。

▶ Bloomberg television at 11 a.m.

彭博电视上午11点（华尔街时间）播出。

▶ Wall Street time and be sure to check out as reporting out on this story hey we are just a little over 90 minutes from the close of US equity trading stocks well in the red but off their worst levels of the session Charlie pellet watching this closely let's get a business flash with them.

请关注相关报道。现在距美股收盘仅剩90多分钟，股指全面下跌但已脱离盘中低点。查理·佩莱特正紧密关注，接下来是财经快讯。

 00:28:07

▶ Thank you very much Tim centavix sums it up nicely after the bell of course going to be hearing from Costco just talking with the folks from Qualcomm Qualcomm shares down now by 2.4% the Dow the S&P NASDAQ all in the red right now text being hit is especially hard S&P down 43 now it's 65 95 down 6 tenths of 1% and trading below the big round number of 6600 we've got the Dow down 208 right now.

非常感谢蒂姆。收盘后我们将关注好市多财报。刚与高通团队交流过，高通股价现跌2.4%。道指、标普、纳斯达克全线下跌，科技股受重创。标普跌43点至6595点，跌幅0.6%，跌破6600点整数关口；道指跌208点。

▶ There are 4 tenths of 1% while the NASDAQ composite index down 7 tenths NASDAQ 100 index also down 7 tenths of 1% and our mag 7 index so that's so lot of text stock stumbling today with the mag 7 down by 1.2%.

跌幅0.4%；纳斯达克综合指数跌0.7%，纳斯达克100指数跌0.7%，我们的七巨头指数跌1.2%，科技股今日普遍受挫。

▶ You're 10 year now at 4.17% the 2 year 3.66% gold up 3 tenths of 1% 37 47 the ounce and West Texas intermediate crude flat on the day 65 dollars a barrel.

十年期国债收益率现报4.17%，两年期3.66%；金价涨0.3%至每盎司3747美元；西德克萨斯中质原油价格持平于每桶65美元。

 00:29:04

▶ Carmax lower after the company reported a surprise drop in comparable sales as buyers had rushed by vehicles in the previous quarter ahead of a tariff on imported cars.

CarMax因可比销售额意外下滑而走低，因消费者在上季度进口车关税生效前抢购车辆。

▶ We've got car mac car mac shares today they are trading lower car max down now by 19.2% plunging there also carvana it is up 3 tenths of 1% after earlier losses and the Penske automotive group down by 1.9% for on demand news 24 hours a day.

CarMax股价今日下挫19.2%；Carvana早盘下跌后现微涨0.3%；Penske汽车集团跌1.9%。欲获取24小时即时新闻。

▶ Subscribe to Bloomberg news now wherever you get your podcast I'm Charlie Palatin that is a Bloomberg business flash.

#订阅#彭博新闻，无论您通过何种平台收听播客。我是查理·帕拉廷，以上是彭博财经快讯。

 00:29:42

▶ All right Charlie thank you so much will buy now pay later is everywhere every day is it feels like you got companies like a firm after pay and Clarna they've all brought.

好的查理，非常感谢。"先买后付"如今已无处不在，像Afterpay和Klarna这类公司已将。

▶ Installment payments into everyday life while big banks and tech firms are also now racing to him into the space.

#分期#支付带入#日常生活#，而大型银行和科技公司也正竞相涌入这一领域。

▶ We talked about the growth and growing competition recently with the founder and CEO of a firm max levch and he joined us just a couple of weeks ago.

我们近期与某公司创始人兼CEO马克斯·列夫琴讨论了增长与竞争，他几周前刚做客过节目。

🎵 She has a firm by the way they're on a tear up 30% year to date the company provides a window into the consumer and health of our financial system so when we were given the opportunity to talk with another key member of the C suite we certainly jumped on that we got Robo here with us he's CFO of a firm.

顺便提下，该公司今年迄今涨幅达30%，其数据能反映消费者状况和金融系统健康度。因此当有机会与另一位C级高管对话时，我们立即把握住了——现在请到公司CFO罗布。

🎵 He was featured in a recent edition of the Bloomberg CFO briefing newsletter he joins us from San Francisco by the way sign up for that newsletter Bloomberg dot com slash CFO dash briefing also with us is Nina Trentman she is Bloomberg new senior editor she was.

他近期入选了彭博CFO简报专栏，从旧金山加入我们。订阅该简报请访问**bloomburg.com/cfo-briefing**。同场的还有彭博新闻资深编辑妮娜·特伦特曼。

🎵 She writes the Bloomberg CFO briefing newsletter she's here in the studio Rob that's exactly where I want to start with you how the consumer is doing it's a question we post a max a few weeks ago but you guys have real time data you're seeing at every moment how people not just are spending money but how they are with paying it back how's the consumer in the US doing.

她负责撰写该简报。罗布，我想首先请教消费者状况——几周前我们问过马克斯相同问题，但你们拥有实时数据，能时刻洞察人们的消费和还款行为。当前美国消费者境况如何？

🎵 Well first of all thanks for having me in terms of the consumer data that we see we see a consumer that's strong and healthy you know we are we're originating over a hundred million dollars of loans every day and right now all of the repayment data that we see in our daily loan cohorts it's all really strong and it's exactly in line with our expectations so that that tells us that that the consumers healthy and that tells us that we're setting the right underwriting posture in our business.

首先感谢邀请。从我们看到的消费者数据来看，消费者表现强劲且健康。我们每日发放超1亿美元贷款，目前所有每日贷款组合的还款数据都非常稳健，完全符合预期。这表明消费者健康状况良好，也说明我们的业务设定了正确的风险审核标准。

🎧 Rob how about delinquencies in the business those ticking up what are you seeing there in the data.

罗布，业务中的逾期情况如何？是否在上升？数据反映了什么？

🎧 No I mean we we we manage credit that really is job one internally for us and we stare at delinquency data that's that's part of the repayment data that I was alluding to and we're seeing outcomes that are exactly in line with what we would expect.

不，我的意思是我们内部确实将信贷管理作为首要任务，我们紧盯#逾期数据#——那正是我之前提到的还款数据的一部分——而目前我们看到的结果完全符合预期。

 00:31:43

🎧 Just wondering with the Fed cutting interest rates last week and indicating that there more might be more cuts to come how important do you think that is for your consumers and also how important is it is it for your business.

只是好奇，随着美联储上周降息并暗示未来可能进一步降息，您认为这对您的消费者有多重要，同时对您的业务又有多重要？

🎧 It may be helpful for consumers right it may reduce the consumers total cost of credit which I think is beneficial for them.

这对消费者可能是有利的，对吧？它可能会降低消费者的总信贷成本，我认为这对他们是#有益的#。

🎧 For us though you know we we actually like the rate environment that we're in today we're we're very profitable as a business when we look at loans on a unit level we're sort of at or above our long term ranges so we feel good about this rate environment if rates were to go down from here it might be a modest benefit for us not all of our funding that we utilize is floating rate in nature so there could be a lag effect to see any sort of real material benefit but.

但对我们而言，您知道，我们实际上喜欢当前的利率环境。从单笔贷款层面看，我们的盈利能力非常强，处于或高于长期区间水平，因此我们对这个利率环境感到满意。如果利率从此处下降，可能会给我们带来适度好处，不过我们使用的并非全部是浮动利率资金，因此看到任何实质性好处可能存在滞后效应。

 00:32:36

▶ I think one of the great things about a firm is that we can be adaptable and we can.

我认为公司的一大优势在于我们能够#适应性强#，并且我们可以

▶ Excel and any macro environment one thing we want to ask you about is that blueberg intelligence our own research team Rob has put out of report this morning and they're projecting that a firm will surpass 30% growth this year to head of consensus so.

在任何宏观环境中表现出色。我们想请教您的是，我们自己的研究团队Blueberg Intelligence的Rob今早发布报告，预测公司今年增长将超过30%，超出市场普遍预期。

▶ Just talk to us if you will about some of the drivers here when it comes to volume drivers.

请您谈谈在交易量驱动因素方面的一些主要推动力。

bilibili 00:33:02

▶ I think it's important to remember that our outlook for fiscal 26 we have a June fiscal year we've established a minimum gmv for the for the year so we don't have a range out there there's no high end to that to that estimate so.

我认为需要明确的是，我们对26财年（我们采用六月财年制）的展望是设定了全年GMV的最低目标，因此我们没有给出区间范围，这个预估没有上限。

▶ You know certainly we put out a minimum number for gmv and we would we would hope to achieve that just given that it is what we think a floor for the business.

您知道，我们确实公布了一个GMV的最低数字，我们希望能实现它，毕竟这是我们为业务设定的底线。

▶ Closer to home you know for q one we're guiding that we see about 37% growth in the gmv line in the September quarter and and that that would be down from the 43% that we had in the June quarter so.

就近而言，对于第一季度，我们指引预计九月季度的GMV增长约为37%，这将低于六月季度实现的43%增速。

bilibili 00:33:41

▶ Both metrics I think are quite healthy and quite strong and.

我认为这两个指标都相当健康和强劲。

▶ We really like what we're seeing in the business today a very briefly can you just tell us a little bit about the firm card 10% of your users are on the card tell us exactly how it works and the profitability on the cards portfolio is it better than conventional buy now pay later.

我们非常满意目前业务的进展。能否简要介绍一下公司卡？10%的用户在使用该卡。请具体说明其运作方式，以及卡组合的盈利能力是否优于传统的先买后付。

▶ Our card is slightly better profitability than our business at large that really stems from the fact that the firm card is a repeat usage product most of our consumers come to us through one of our merchant integrations and then.

我们的卡盈利能力略高于整体业务，这主要源于公司卡是一个重复使用产品。大多数消费者最初通过我们的商户整合渠道接触我们，然后

 00:34:18

▶ Look to deepen the relationship with the firm through some of our direct to consumer products like a firm card so there's a lot to like about a firm card both for us but for consumers to.

寻求通过我们的直接面向消费者产品（如公司卡）来深化与公司的关系。因此，公司卡有很多值得喜爱之处，无论对我们还是对消费者都是如此。

▶ It puts all of the utility all the financing and flexibility that we offer through a firm it puts it on a card and it allows consumers to transact in places that today a firm doesn't have.

它将我们通过公司提供的所有功能、融资和灵活性都集成到一张卡上，使消费者能够在目前公司尚未覆盖的场所进行交易。

▶ Quite the level of coverage that we have on ecommerce so we see a lot of usage for a firm card in store in brick and mortar situations and you can also utilize a firm card quickly and easily at merchants where they don't have an affirm integration yet.

相比我们在电子商务领域的覆盖水平，我们看到公司卡在实体店场景中有大量使用，并且您也可以在尚未集成Affirm的商户处快速便捷地使用公司卡。

 00:34:56

▶ Rob, I'm for to be running out of time maybe just 30 seconds just about the growth in your space we've seen cloner recently go public like and how far is that potentially boosting even attention to the to the space.

Rob, 我时间快不够了, 也许只剩30秒。谈谈您所在领域的增长, 我们看到Cloner最近上市了, 这在多大程度上可能提升对该领域的关注度?

▶ You know we think it's good for investors to have multiple providers in the space so that they can compare and contrast across us in cloner.

您知道, 我们认为领域内有多个提供商对投资者是好事, 这样他们可以在我们和Cloner之间进行比较。

▶ I would say our our space has been competitive for several years now we really haven't seen a change in competitive intensity so.

我想说, 我们的领域竞争已经持续数年, 我们确实没有看到竞争#强度#发生变化。

 00:35:27

▶ You know we're focused on on driving our objectives and right now the business looks incredibly strong from our perspective.

您知道, 我们专注于实现我们的目标, 而且目前从我们的角度看, 业务看起来非常强劲。

▶ All right can only with their Rob thank you so much Rob O'Hare chief financial officer of a firm featured in a recent Bloomberg CFO briefing newsletter a new one by the way out on Sunday finding out Bloomberg dot com slash CFO briefing and of course always our thanks to name Trentman she's Bloomberg new senior editor when we come back AI in data science and global health philanthropy one view when we come back on Bloomberg Business Week daily.

好的, 只能到此为止了。非常感谢Rob, Rob O'Hare, 一家公司的首席财务官, 近期出现在彭博CFO简报通讯中(顺便说一下, 新一期周日发布, 请查看**bloomborg.com/CFObriefing**)。当然, 一如既往感谢Name Trentman, 她是彭博社新任高级编辑。稍后回来, 我们将探讨数据科学和全球健康慈善事业中的人工智能: 一种观点。稍后请继续收听彭博商业周刊每日版。

▶ It's 240 on Wall Street we do check markets all day long here at Bloomberg but now the S&P knows that they're all in the red with the S&P down now at 6600 even lower by 37 points there.

现在是华尔街时间2点40分, 我们在彭博社全天监测市场。但目前标普指数悉数下跌, 标普指数现报6600点, 又下跌了37点。

 00:36:13

🎧 Drop there of just about 510 to 1% back above 6600 barely but indicative of moving off session lows we got the down down 176 now down 410 to 1% now stack the composite index down 129 for now to stack a drop of 610 to 1% our max 7 index down 1% today we are seeing tech stocks selling off 10 year 4.17% with a 2 year 3.66% gold is up 6.11% 37.57 the ounce west Texas intermediate crude up to 10.11% 65.13 barrel on WTI and Bitcoin right now at 109,607 on Bitcoin it is down by 3.5%.

下跌约510点至1%，勉强回到6600点上方，但表明已脱离盘中低点。道指下跌176点，现跌410点至1%。纳斯达克综合指数现跌129点，跌幅610点至1%。我们的Max 7指数今日下跌1%。我们看到科技股遭抛售。10年期国债收益率4.17%，2年期3.66%。黄金上涨6.11%，报每盎司37.57美元。西德克萨斯中质原油上涨10.11%，报每桶65.13美元。比特币现报109,607美元，下跌3.5%。

🎧 Jami's billionaire co-founders unveiled a 630 dollar smartphone that's designed to take on the just released iPhone 17 underscoring the Chinese companies broader ambitions to take on American rivals from Apple to Tesla the Jami 17 will be offered in pro and pro max models 80 Rs of Jami they're up now by 4.1%.

Jami的亿万富翁联合创始人发布了一款630美元的智能手机，旨在与刚刚发布的iPhone 17竞争，这凸显了这家中国公司挑战从苹果到特斯拉等美国竞争对手的更广泛雄心。Jami 17将提供Pro和Pro Max型号。Jami股价现在上涨了4.1%。

🎧 For on the menu 24 hours a day subscribe to Bloomberg news now wherever you get your podcast I'm Charlie Paloton that is a Bloomberg business flash.

菜单上24小时为您服务。立即订阅彭博新闻，无论您在哪里收听播客。我是Charlie Paloton，这是彭博商业快讯。

 00:37:31

🎧 All right Charlie thank you so much it is time now for the Bloomberg business week women's health segment where we focus on key issues developing technologies impacting the present and future of women's health around the world.

好的，Charlie，非常感谢。现在是彭博商业周刊女性健康板块时间，我们在此关注影响全球女性健康现状和未来的关键问题及发展中的技术。

🎧 And I kind of say the world of women's health was rocked a little bit this past week.

我想说，过去一周女性健康领域受到了一些震动。

▶ President Trump created a potentially existential crisis for Ken view the maker of Tylenol with just three words about the company's most recognized product.

特朗普总统仅用三个词就为泰诺制造商Kenview制造了一场潜在的#生存#危机，这话是针对该公司最知名的产品。

bilibili 00:37:54

▶ He said don't take it.

他说：不要服用它。

▶ The Trump administration is linking Tylenol's active ingredient acetaminophen to autism and urging pregnant women Carol to largely avoid the medication although decades of scientific research.

特朗普政府将泰诺的有效成分对乙酰氨基酚与自闭症联系起来，并敦促孕妇Carol尽量避免使用该药物，尽管数十年的科学研究

▶ Have yet to identify a single case cause excuse me for autism.

尚未能确定一例自闭症的病因（请原谅我的用词）。

▶ All right let's get more though into the bigger broader picture of women's health.

好的，让我们更深入地探讨女性健康的更广阔图景。

bilibili 00:38:13

▶ Dr. Joan LaRouvert is with us interim chief medical officer at Boston Children's Hospital director of innovation and outcomes.

Joan LaRouvert博士与我们连线，她是波士顿儿童医院的#临时#首席医疗官，#创新#与成果部主任。

▶ She's also co founder and president of the NGO virtue foundation which is delivering health care in over 25 countries.

她同时也是非政府组织Virtue基金会的联合创始人兼主席，该基金会在超过25个国家提供医疗保健服务。

▶ So she has a big global perspective here she joins us here in studio.

因此她拥有广阔的全球视野。她在演播室加入我们。

 00:38:31

 Dr. LaRouvert so nice to have you here with us.

LaRouvert博士，非常高兴您能来。

 How are you?

您好吗？

 I'm great Carol thank you so much for having me today.

我很好，Carol，非常感谢您今天的邀请。

 There's a lot we want to talk to your in town with everything that's going on.

鉴于目前发生的所有事情，我们有很多话题想和您探讨。

 We're looking at global health with global leaders.

我们正与全球领袖们一起审视全球健康问题。

 I do need to ask you though about what we got from the administration this week.

但我确实需要问问您关于本周从政府那里得到的消息。

 00:38:48

 The Trump administration the president on pregnant women taking Tylenol.

特朗普政府，总统关于孕妇服用泰诺的言论。

 I'm just curious what it's been like and I know you've been in New York but what you've been hearing from your team.

我只是好奇情况如何，我知道您一直在纽约，但您从您的团队那里听到了什么。

 I know you've been hearing from your team back at Boston Children's when it comes to this news and what the guidance is that you're giving them.

我知道您也收到了波士顿儿童医院团队关于这个消息的反馈，以及您给予他们的指导是什么。

▶ Absolutely Carol.

当然，Carol。

▶ Well firstly at Boston Children's.

嗯，首先在波士顿儿童医院。

▶ We don't take care of pregnant women.

我们不负责照顾孕妇。

▶ It's a children's hospital but this obviously encompasses.

这是一家儿童医院，但这显然涉及到.....

▶ Women and children and I myself don't take care of autism patients.

妇女、儿童以及我本人并不负责照护#自闭症#患者。

▶ I'm a pediatric cardiac intensive care specialist but I am hearing from my clinical colleagues that they are getting calls from families and creating confusion around this is really a challenge.

我是一名儿科心脏重症监护专家，但听临床同事说他们接到家属来电，澄清相关误解确实很有挑战性。

▶ And we're really sort of taking that head on in terms of addressing the questions of families as they're coming to us.

我们正在直面这个问题，及时回应家属向我们提出的疑问。

▶ One thing that we've noticed about this moment in time is and we spoke to a doctor from the American College about stetricians and gynecologists earlier this week.

我们注意到当下一个现象是——本周早些时候我们刚与美国妇产科学院的一位医生交流过。

▶ And there's this tension between what we're hearing from professional organizations as far as recommendations go and what we're hearing from the American government and the

HHS and it doesn't seem like that's happened in the past where you don't necessarily have the government aligned with these professional organizations.

专业机构的建议与美国政府及卫生与公众服务部的表态存在分歧，这种政府与专业组织立场不一致的情况在过去似乎很少见。

 00:40:05

▶ Because I'm just wondering how you're thinking about this moment when it comes to healthcare.

因为我很好奇您如何看待当前医疗领域的这种局面。

▶ It's a challenging time for healthcare and I think we just stick to our mission that we are trying to provide the best safest most effective care to children that we can.

这是医疗行业的艰难时期，但我们会坚守使命，尽力为儿童提供最优质、最安全、最有效的护理。

▶ I am also curious like we said you're in town and we've had the benefit of talking to global leaders about some of the big issues that are out there whether it's climate change.

另外正如所说，您正在本地访问，我们也有幸与全球领袖探讨了气候变化等重大议题。

 00:40:27

▶ I've talked a lot about AI this week but looking at healthcare from a global perspective.

本周我多次谈及人工智能，但这次想从全球视角审视医疗健康。

▶ I want to bring you into this because you're very involved when it comes to the applications of AI in medicine.

邀请您参与讨论是因为您在#人工智能#医疗应用领域涉足颇深。

▶ Talk to us about kind of where we are today with it and kind of where it can go.

请谈谈目前的发展阶段以及未来前景。

▶ Absolutely.

当然。

🎧 I think we're at one of the most exciting times in healthcare and I've been involved with AI with Virtue Foundation for 15 years.

我认为我们正处在医疗领域最令人振奋的时代，我参与Virtue基金会的AI项目已有15年。

 00:40:54

🎧 And never has it been like this moment in time because I think that the tools that are now unlocked, particularly now with the Gen AI Cloud Computing big data, we're seeing use cases that are much more actionable than before and at enterprise scale.

此刻前所未见，因为当前解锁的技术工具——特别是生成式AI、云计算和大数据——正催生出比以往更具可操作性且达到企业级规模的应用场景。

🎧 What does that mean?

这意味着什么？

🎧 Break it down.

请具体说明。

🎧 Well, I can break it down in the context of what we've done with Virtue Foundation.

我可以结合Virtue基金会的实践来阐述。

 00:41:20

🎧 I'm happy to talk about some of the hospital use cases too but in terms of Virtue Foundation.

也乐意探讨医院用例，但重点说说Virtue基金会。

🎧 15 years ago, Dr. Ebi Allahi, my colleague was in Burundi and he was there caring for patients and had this reek of moment where he's like we should have more granular data on the ground to understand what my I see.

15年前，我的同事埃比·阿拉希博士在布隆迪救治患者时灵光一现：我们需要更#精细化#的实地数据来解读所见现象。

🎧 And I should be able to see it here in New York to be able to action on it.

而我在纽约也应该能同步查看并采取行动。

▶ And at that time, people are like, what are you talking about?

当时人们都觉得这想法匪夷所思。

▶ Right?

对吧?

▶ It was very early days and we started that journey of trying to first get the granular data, visualize it geospatially.

那是萌芽期，我们开启了先获取#精细化#数据，再通过地理空间#可视化#的探索之路。

▶ But I think we've grown up as the technologies grown up.

随着技术成熟，我们也在成长。

▶ And I think key leverage points for us have been partnerships with Databricks, Data Robot, Carto.

关键#杠杆#点在于与Databricks、Data Robot和Carto建立的合作。

▶ And I can break down one now if it's helpful.

如果需要，我可以具体分析一个案例。

▶ Well, and talk to us about data because you know, especially when it comes to developing world, if you have data and information, you can assess a situation and figure out what to do.

那就谈谈数据吧，毕竟在发展中国家，掌握数据信息就能评估现状并制定对策。

▶ Yes.

是的。

▶ So talk to us a little bit about that.

请具体说说。

▶ You do have partnerships with Data Bricks as you said, Data Robot, Carto.

如您所说，你们与Data Bricks、Data Robot和Carto建立了合作。

 00:42:28

 What are you guys building together?

你们共同构建了什么？

 We are building the marketplace for global health philanthropy.

我们正在打造全球健康慈善平台。

 What does that mean?

这具体指什么？

 So you can actually see what is happening in healthcare facilities and what is the work of healthcare NGOs on the ground in low and middle income countries.

这样就能实时查看中低收入国家医疗机构的运行状况及非政府组织的实地工作。

 And we've used AI in particular, we've built an enterprise grade pipeline with Databricks where we're extracting all the data that exists and co-locating it to a geospatial location.

我们特别运用AI，与Databricks构建了企业级数据管道，提取所有现有数据并关联至地理空间位置。

 00:42:59

 So you're a hospital, a Corlebu hospital in Ghana.

以加纳的科尔布医院为例。

 Everything that's out there information wise is co-located a geospatially to that organization.

所有相关信息都通过地理空间定位与该机构关联。

 And you create this vector graph, this knowledge graph, with all these many knowledge graphs that tell you what's happening in each of those facilities.

通过构建向量图谱——这种由众多子图谱组成的知识图谱——就能掌握每家机构的实时动态。

▶ At the end of the day, this is all about improving outcomes and it's helping people live longer, healthier, happier lives.

归根结底，这一切都是为了改善健康结果，助力人们更长寿、更健康、更幸福。

 00:43:26

▶ Do we have the data yet that shows that this moment in technology is leading to better outcomes?

目前是否有数据表明当前技术正在带来更好的成果？

▶ I think that's what we're on the cusp of.

我认为我们正处在这一转折点。

▶ Would I say that we're there and it's all completely functional and moving?

但若说已完全实现#功能性#运转？

▶ No.

尚未。

▶ But that is the direction of travel and those are the tools that are enabling us to do so.

但这是发展方向，而现有工具正推动我们前进。

▶ For now, I can see this data in ways I couldn't see before.

目前我已能以前所未有的方式查看数据。

 00:43:50

▶ I can send the right teams to the right locations.

可以精准派遣团队到所需地点。

▶ What are the better outcomes that you envision?

您设想的具体成果是什么？

▶ Are we talking about longer life expectancy and the developing and the developed world?

是指提高发展中国家和发达国家的#预期#寿命吗？

▶ Are we talking about lower infant mortality?

还是降低#婴儿#死亡#率#?

▶ Like what are we talking about here?

具体指哪些方面?

▶ I think we're talking about all of it.

我认为涵盖所有维度。

▶ I think eventually economic development will solve some of our problems.

虽然经济发展最终会解决部分问题。

 00:44:14

▶ But in that window and time, how can we shorten the time it takes till we get really more developed health care in these markets?

但在过渡期内，如何加速这些市场实现更完善的医疗保健?

▶ We feel that this VFMatch platform, this actionable data initiative will allow you to be able to use this information, whether you're a health care NGO, whether you're a government in a country, whether you're even a corporation to determine what you can build to accelerate progress.

我们相信VFMatch平台这一可操作数据计划，能帮助医疗非政府组织、各国政府甚至企业有效利用信息，规划建设方案以加速进展。

▶ We personally are using it to send medical and surgical teams to locations where the medical deserts are, the large populations of patients who need that ophthalmologist or that neurosurgeon or that gynecologist.

我们正借此向医疗荒漠地区派遣内外科团队，为需要眼科、神经外科或妇科医生的大批患者提供服务。

 00:45:00

▶ And so that the people who are doing it like myself, there are many in global health who are doing this work, know the place they can go to be most useful to the patient and most

useful in passing on scale.

这样像我一样的全球健康工作者都能明确何处能最大化服务患者、实现规模效应。

▶ And just 10 seconds, so we didn't really, it wasn't so easy to do that before.

简言之，过去实现这些并不容易。

▶ No, no.

确实不易。

▶ And it was probably not unless somebody brought your attention to it.

往往需要他人提醒才能注意到需求。

 00:45:19

▶ Yes.

是的。

▶ Or you got wind of it.

或是偶然获悉。

▶ But that's not the most productive way of doing it.

但这并非最#高效#的方式。

▶ Exactly.

确实。

▶ This is to create efficiency and scale.

现在的方法旨在提升#效率#和规模。

▶ All right, gotta leave it there.

好的，讨论到此为止。

▶ Dr. Lou Rivera, thank you so much.

卢·里维拉博士，非常感谢您。

 Thank you.

谢谢。

 00:45:29

 Really appreciate it.

衷心感谢。

 Interim chief medical officer at Boston Children's Hospital, director of innovation and outcomes.

波士顿儿童医院#临时#首席医疗官，#创新#与成果部主任。

 And as we said, co founder and president of the Virtue Foundation.

同时也是Virtue基金会联合创始人兼主席，如前所述。

 They take you know, like it markets off the worst levels.

如您所知，市场已脱离最低点。

 The day, but still right across the screen and Aztec down six cents of 1% the S&P 500 down half a percentage pointed down, down four tenths of 1%.

今日盘中，Aztec下跌0.06%，标普500指数下跌0.5%，目前跌幅收窄至0.4%。

 00:45:48

 All right, when we come back, we'll get a check on some of the specific stocks on the move on this Thursday.

稍后回来，我们将查看周四部分异动个股的表现。

 Don't go anywhere.

请不要走开。

 This is Blueberg Business Weekday.

这里是彭博商业#周刊#工作日版。

▶ You're listening to Bloomberg Business Week daily with Carol Maser and Tim Steneveck on Bloomberg Radio and Television.

您正在收听/收看彭博电台和电视台的《彭博商业周刊每日播报》，主持人是卡罗尔·马瑟和蒂姆·斯泰内韦克。

▶ All right, everybody.

各位听众。

▶ We've got just about coming up on an hour to go until we wrap up trading.

距离今日交易结束还有约一小时。

 00:46:10

▶ I'm just going to do our markets live blog and it's a stock hit by Algo Sales to weaken more into the month quarter end.

根据我们的市场实时博客，算法抛盘加剧了月末季末的股市疲软。

▶ So computer generated accounts helping fuel a sell off in stocks today.

计算机生成账户今日助推了抛售潮。

▶ So we're bouncing around.

目前股指震荡。

▶ We're off our best and worst levels, but down about 120 points of the Nasdaq 100 Tim and 35 to the downside on the S&P 500.

虽脱离日内高低点，但纳斯达克100指数下跌约120点，蒂姆，标普500指数下跌35点。

 00:46:31

▶ I'm Tim Steneveck along with Carol Maser.

我是蒂姆·斯泰内韦克，与卡罗尔·马瑟共同主持。

▶ Let's take a look at some stocks on the move today with us is Bloomberg News Cross Asset reporter Emily Grafayow.

现在连线彭博新闻跨#资产#记者艾米丽·格拉法约一起查看今日异动股。

🎧 Emily the mag seven taking a bit of a hit today among the worst movers when it comes to the mag seven.

艾米丽, "七巨头"今日表现不佳, 是跌幅最大的板块之一。

🎧 An EV company.

一家电动汽车公司。

🎧 What do we call it an EV company anymore?

我们现在还称它为电动汽车公司吗?

 00:46:49

🎧 Yeah, an EV company and robotics and AI technology.

是的, 一家涉足机器人技术和人工智能的电动汽车公司。

🎧 Have you not seen like all that they do the standing rope?

您没看过他们走钢丝的表演吗?

🎧 I see what they sell it's mostly cars.

我知道他们主要销售汽车。

🎧 We're talking about Tesla, right?

我们在讨论特斯拉对吧?

🎧 We're talking about Tesla.

是的, 特斯拉。

🎧 Yes, ticker T S L A biggest intraday drop since July.

股票代码TSLA, 创下自7月以来最大日内跌幅。

🎧 It was down over 5%.

跌幅超过5%。

🎧 It's regained a little bit, but it's still down about 4%.

它已经恢复了一点点，但仍下跌约4%。

 00:47:16

▶ After data showing that European sales of the carmaker fell 22% in August.

此前数据显示，该汽车制造商8月份在欧洲的销量下降了22%。

▶ So that gives the company a market share in Europe of just 1.9%.

这使得该公司在欧洲的市场份额仅为1.9%。

▶ This is a report from the European automobile manufacturers association.

这是来自欧洲#汽车#制造商协会的报告。

▶ We get this report every month.

我们每月都会收到这份报告。

▶ It actually often tends to move Tesla's stock price.

它实际上经常会影响特斯拉的股价。

▶ And Europeans are still buying other EVs, but just not Tesla's as much.

欧洲人仍在购买其他电动汽车，只是不再像以前那样青睐特斯拉。

 00:47:44

▶ We did see EV sales rise in the region in August, but the Tesla sales dropping.

我们确实看到8月份该地区电动汽车销量上升，但特斯拉的销量却在下降。

▶ That's so good.

这真是太棒了。

▶ That's so good.

这真是太棒了。

▶ On the flip side, Intel continuing to have another good day.

另一方面，英特尔继续迎来又一个好日子。

▶ Yeah, Intel extending gains for a third day.

是的，英特尔连续第三天上涨。

▶ It's up 7%.

它上涨了7%。

▶ And it's extending again after Bloomberg reported yesterday that the chipmaker had approached Apple to ask for an investment.

而在彭博社昨天报道这家芯片制造商已接触苹果寻求投资后，股价再次上涨。

bilibili 00:48:08

▶ And this is just the latest of a series of Intel headlines that we've gotten in the last couple of weeks.

而这只是过去几周我们收到的一系列英特尔头条新闻中的最新一则。

▶ The stock is up 36% over the last month.

该股在过去一个月上涨了36%。

▶ And this is ticker I and T C Intel.

股票代码是INTC，英特尔。

▶ Our reporting is citing people familiar with the matter.

我们的报道引用了知情人士的话。

▶ The latest that we know now is that Apple and Intel have also discussed how to work more closely together and that the talks are early stage and they not lead to an agreement.

目前我们了解到的最新情况是，苹果和英特尔也讨论了如何更紧密地合作，但谈判处于早期阶段，尚未达成协议。

bilibili 00:48:35

▶ But the headline here is that Intel approach Apple for an investment.

但这里的#头条#新闻是英特尔接触苹果寻求投资。

🎧 Well, and it's our more german said because we were talking to him like why would Apple do it?

嗯，我们更直接地问了他，因为我们在和他讨论苹果为什么会这样做？

🎧 We really talked about kind of political cloud.

我们确实谈到了某种政治影响力。

🎧 I was calling it the presidential diplomacy or CEO presidential diplomacy, but it's kind of interesting.

我曾称之为总统级#外交#或CEO的总统级#外交#，但这有点意思。

 00:48:51

🎧 But he says, you know, tech CEOs, they kind of talk to each other all the time.

但他说，你知道，科技公司的CEO们，他们几乎一直在互相交流。

🎧 Yeah, this would be, you know, like like we said, the string in the latest of different investments.

是的，这就像是，正如我们所说，最近一系列不同投资中的又一桩。

🎧 Obviously last week we saw \$5 billion investment by Nvidia.

显然，上周我们看到了英伟达50亿美元的投资。

🎧 Intel, Intel, we've seen the actual US government investing and just first context here.

英特尔，英特尔，我们已经看到美国政府实际进行了投资，这只是背景信息。

 00:49:09

🎧 I'm sure you guys know because you talked a lot of tech analysts.

我相信你们都知道，因为你们和很多科技分析师谈过。

🎧 But Apple was a long time Intel customer, but then switched to in house processors in the past five years.

但苹果曾是英特尔长期的客户，然后在过去五年转向了自研处理器。

▶ So maybe they're going back who knows.

所以也许他们又要回头了，谁知道呢。

▶ Yeah, Mark had a really interesting point when we spoke to him about this, which was, you know, Apple is smart about making US investments right now.

是的，我们和马克谈论此事时，他提出了一个非常有趣的观点，即苹果现在在美国投资方面很精明。

bilibili 00:49:33

▶ Right.

对。

▶ And I was trying to look for any other reason why Apple would do this and look, the reporting says there's been discussions about it at this point.

我试图寻找苹果这样做的任何其他原因，但看，报道说目前已经有相关讨论。

▶ Yeah, and there was really no other reason that Mark gave us.

是的，马克确实没有给我们其他理由。

▶ Maybe they could help with some of the many other less intricate chips that go into some of these devices he did say, but yeah, he did most part.

也许他们可以在一些设备中使用的许多其他不太复杂的芯片方面提供帮助，他确实这么说过，但大体上就是这样。

bilibili 00:49:54

▶ Yeah, politics, presidential diplomacy.

是的，政治，总统级#外交#。

▶ But like you know, and we talked about this fiduciary responsibilities that CEOs of big publicly or all publicly held companies, right.

但就像你知道的，我们谈到了大型上市公司或所有上市公司的CEO所肩负的受托责任。

▶ We talked about like having a relationship.

我们谈到了建立关系。

▶ It's not just this administration, but it is good to have a good relationship with the White House, right.

不仅仅是这届政府，与白宫保持良好的关系总是有益的。

 00:50:12

▶ Because whether it's a Democrat or a Republican or whatever.

因为无论是#民主党#还是共和党或其他什么党派。

▶ Yeah, even laws are made and then it affects the company and it affects the shareholders.

是的，甚至法律的制定也会影响公司，影响股东。

▶ So exactly, exactly.

所以确实如此，确实如此。

▶ Where do you want to go?

你想谈哪家公司？

▶ Car Max?

CarMax?

▶ Car Max.

CarMax。

▶ So Intel was the best performer in that S&P 500 today.

所以英特尔是今天标普500指数中表现最好的股票。

▶ The worst performer is Car Max, the used car retailer plunging down 20% to five year lows.

表现最差的是CarMax，这家二手车#零售商#暴跌20%，跌至五年低点。

 00:50:34

🎧 Bad earnings.

糟糕的#财报#。

🎧 They missed EPS net sales and operating revenue and the street was pretty vocal about this earnings report.

他们未达到每股收益、净销售额和营业收入预期，市场对这份#财报#报告反应相当#强烈#。

🎧 So, the truest financial services said this was a quote, miss across the board with quote, really nothing good to see for Car Max.

所以，Truist Financial Services表示，这是"全面不及预期"，CarMax"实在乏善可陈"。

🎧 Use vehicle sales coming in at \$5.27 billion, but that was down 7.2% year over year and also missed estimates.

二手车销售额为52.7亿美元，但同比下降7.2%，也未达到预期。

 00:50:58

🎧 The auto retailer actually pointed to a fallout from Trump's tariffs and rising to stress among consumers as it reported these earnings.

这家汽车#零售商#在报告这些#盈利#时，实际上指出了特朗普关税的负面影响以及消费者压力上升。

🎧 You know, I don't understand the environment here because I saw that that's I saw that too.

你知道，我不理解这里的环境，因为我也看到了那个。

🎧 Emily and just in our program Bloomberg Business Week daily earlier on Thursday, we spoke with the CFO of a firm, Rob O'Hare, who said the consumer is great right now.

艾米丽，就在我们周四早些的彭博商业周刊每日节目中，我们与一家公司的首席财务官罗伯·奥黑尔进行了交谈，他说消费者目前状况很好。

 00:51:28

🎧 Everything we are seeing is fine.

我们看到的一切都很好。

🎧 I am so confused.

我太困惑了。

🎧 So if Car Max is out saying that the tariffs have caused this distress and people are pulling back.

所以如果CarMax出来说关税造成了这种#困境#，人们正在退缩。

🎧 What are these little cars?

这些小车是怎么回事？

🎧 A big purchase, but yeah, if they're not seeing that at a firm, then I don't know what gives.

这是一笔大额购买，但是，如果他们在公司层面没有看到这种情况，那我就不知道是怎么回事了。

🎧 I don't know it right.

我现在也不知道。

 00:51:45

🎧 These are the crosshairs that we can't like are guilty.

这些是我们无法喜欢的十字准线，感觉有罪。

🎧 Even our very own Fed chair Jerome Powell was talking recently about just how much uncertainty there is for business leaders.

就连我们自己的美联储主席杰罗姆·鲍威尔最近也谈到商业领袖面临的不确定性有多大。

🎧 So yeah, Car Max, ticker K m X down now almost 20%.

所以，是的，CarMax，股票代码KMX，现在下跌了近20%。

🎧 Emily Grafeo, thank you so much.

艾米丽·格拉菲奥，非常感谢。

🎧 Be sure to check out our stock movers podcast five minute episodes because winners and losers in the market find it on Apple Spotify or anywhere you get your podcast.

请务必收听我们的"股票动向"播客，每集五分钟，了解市场赢家和输家，可在Apple Podcasts、Spotify或您获取播客的任何地方找到。

 00:52:08

 If you're watching on TV, the closest coming away in just a moment, Tim and I continue on Bloomberg Business Week.

如果您在电视上观看，节目即将结束，蒂姆和我将继续在彭博商业周刊上讨论。
