

Federal Reserve Cuts Interest Rates Amid Shifting Economic Risks

【美联储降息25基点 | 鲍威尔演讲全文】

Summary: The Federal Reserve, led by Chair Jerome Powell, announced a quarter-percentage-point rate cut, citing increased downside risks to employment despite elevated inflation. The labor market shows clear signs of cooling, with job gains slowing significantly and the unemployment rate edging up to 4.3%. While inflation remains above the 2% target, the Fed believes the balance of risks has shifted, warranting a move toward a more neutral policy stance. The updated economic projections indicate a slightly stronger growth outlook but a slower return to target inflation. Policymakers emphasized data dependence and there was a wide dispersion of views on the appropriate future path of rates.

摘要： 美联储主席鲍威尔宣布降息25个基点，这是在经济风险平衡发生变化之际采取的举措。尽管通胀仍高于2%的目标，但就业下行风险显著增加，劳动力市场明显降温，近三个月月均就业增长仅2.9万人。美联储认为关税对商品价格的影响可能是短暂的，但需要警惕其可能变得更加持久。政策制定者强调决策将取决于数据，并对未来利率路径存在广泛分歧。委员会仍致力于实现最大就业和价格稳定的双重目标。

bilibili 00:00:12

▶ Good afternoon.

下午好。

▶ My colleagues and I remain squarely focused on achieving our dual mandate goals of maximum employment and stable prices for the benefit of the American people.

我和同事们始终专注于实现我们的#双重使命#目标，即为美国人民实现最大就业和稳定物价。

▶ While the unemployment rate remains low, it has edged up.

尽管失业率仍处于低位，但已略有上升。

▶ The above gains have slowed and downside risks to employment have risen.

上述增长已放缓，就业的下行风险也有所增加。

▶ At the same time, inflation has risen recently and remains somewhat elevated.

与此同时，#通货膨胀#近期有所上升，且仍处于较高水平。

 00:00:38

▶ In support of our goals and in light of the shift in the balance of risks, today the OFEDER Open Market Committee decided to lower our policy interest rate by a quarter percentage point.

为支持我们的目标并鉴于风险平衡的变化，今天联邦公开市场委员会决定将政策利率下调25个基点。

▶ We also decided to continue to reduce our securities holdings.

我们还决定继续缩减证券持有规模。

▶ I'll have more to say about monetary policy after briefly reviewing economic developments.

在简要回顾经济发展后，我将进一步阐述#货币#政策。

 00:00:59

▶ Recent indicators suggest that growth of economic activity has moderated.

近期指标显示经济活动增长已放缓。

▶ GDP growth, GDP rose at a pace of around 1.5 percent in the first half of the year, down from 2.5 percent last year.

GDP增长方面，上半年GDP以约1.5%的#速度#增长，低于去年2.5%的增速。

▶ The moderation and growth largely reflects a slowdown in consumer spending.

增长放缓主要反映了消费者支出减速。

▶ In contrast, business investment in equipment and intangibles has picked up from last year's pace.

相比之下，企业对设备和无形资产的投资已较去年#速度#有所回升。

bilibili 00:01:25

▶ Activity in the housing sector remains weak.

住房市场活动仍然疲软。

▶ In our summary of economic projections, the median participant projects GDP to rise 1.6 percent this year and 1.8 percent next year, a touch stronger than projected in June.

在我们的经济预测摘要中，预测中值显示今年GDP将增长1.6%，明年增长1.8%，略高于6月预测。

▶ In the labor market, the unemployment rate edged up to 4.3 percent in August, but remains little changed over the past year at a relatively low level.

劳动力市场上，8月失业率微升至4.3%，但过去一年在相对低位保持稳定。

bilibili 00:01:51

▶ Payroll job gains have slowed significantly to a pace of just 29,000 per month over the past three months.

payroll #就业增长显著放缓，过去三个月月均增幅仅为2.9万人。

▶ A good part of the slowing likely reflects a decline in the growth of the labor force due to lower immigration and lower labor force participation.

放缓很大程度上可能反映了因移民减少和劳动力参与率下降导致的劳动力增长减速。

▶ Even so, labor demand has softened and the recent pace of job creation appears to be running below the break even rate needed to hold the unemployment rate constant.

即便如此，劳动力需求已经疲软，近期的就业创造速度似乎低于维持失业率稳定所需的平衡水平。

bilibili 00:02:19

▶ In addition, wage growth has continued to moderate while still outpacing inflation.

此外，工资增长持续#放缓#，但仍快于#通货膨胀#。

▶ Overall, the market slowing in both the supply of and demand for workers is unusual.

总体而言，劳动力供需双方同时放缓实属罕见。

▶ In this less dynamic and somewhat softer labor market, the downside risks to employment appear to have risen.

在这个缺乏#活力#且略显疲软的劳动力市场中，就业下行风险似乎有所增加。

▶ In the hour, the median projection for the unemployment rate is 4.5 percent at the end of this year and edges down thereafter.

当前失业率预测中值为今年年底达到4.5%，#此后#将逐步下降。

 00:02:50

▶ Inflation has eased significantly from its highs in mid-2022, but remains somewhat elevated relative to our 2 percent longer run goal.

#通货膨胀#较2022年中期的低点已显著缓解，但相对于我们2%的长期目标仍处于较高水平。

▶ Estimates based on the consumer price index and other data indicate that total PCE prices rose 2.7 percent over the 12 months ending in August, and that excluding the volatile food and energy categories, core PCE prices rose 2.9 percent.

基于消费者价格指数等数据的估算显示，截至8月的12个月内PCE总价格上涨2.7%，剔除波动较大的食品和能源类别后，核心PCE价格上涨2.9%。

▶ These readings are higher than earlier in the year as inflation for goods has picked up.

由于商品#通货膨胀#加速，这些读数高于年初水平。

 00:03:23

▶ In contrast, disinflation appears to be continuing for services.

相比之下，服务类通缩似乎仍在持续。

▶ Near term measures of inflation expectations have moved up on balance over the course of this year on news about tariffs, as reflected in both market and survey-based measures.

受关税消息影响，基于市场和调查数据的短期通胀预期指标今年总体呈上升趋势。

▶ Beyond the next year or so, however, most measures of longer term expectations remain consistent with our 2 percent inflation goal.

但在一年之后，大多数长期预期指标仍与我们2%的#通货膨胀#目标一致。

 00:03:49

▶ The median projection in the SEP for total PCE inflation is 3.0 percent this year and falls to 2.6 percent in 2026 and to 2.1 percent in 2027.

经济预测摘要中对PCE总通胀率的预测中值为今年3.0%，2026年降至2.6%，2027年降至2.1%。

▶ Our monetary policy actions are guided by our dual mandate to promote maximum employment and stable prices for the American people.

我们的#货币#政策行动始终遵循为美国人民促进最大就业和稳定物价的#双重##使命#。

▶ At today's meeting, the committee decided to lower the target range for the federal funds rate by a quarter percentage point to 4 to 4 and a quarter percent and to continue reducing the size of our balance sheet.

在今天会议上，委员会决定将联邦基金利率目标区间下调25个基点至4%至4.25%，并继续缩减资产负债表规模。

 00:04:26

▶ Changes to government policies continue to evolve and their effects on the economy remain uncertain.

政府政策调整持续#演变#，其对经济的影响仍不确定。

▶ Higher tariffs have begun to push up prices in some categories of goods, but their overall effects on economic activity and inflation remain to be seen.

提高关税已开始推高部分商品价格，但其对经济活动和通胀的整体影响尚待观察。

▶ A reasonable base case is that the effects on inflation will be relatively short-lived, a one-time shift in the price level.

合理的基本假设是对#通货膨胀#的影响相对短暂，属于价格水平的一次性调整。

bilibili 00:04:49

▶ But it is also possible that the inflationary effects could instead be more persistent and that is a risk to be assessed and managed.

但通胀影响也可能更#持久#，这是需要评估和管理风险。

▶ Our obligation is to ensure that a one-time increase in the price level does not become an ongoing inflation problem.

我们的#责任#是确保价格水平的一次性上涨不会演变为#持续#的#通货膨胀#问题。

▶ In the near term, risks to inflation are tilted to the upside and risks to employment to the downside, a challenging situation.

短期内，#通货膨胀#风险#倾向于#上行，就业风险倾向于下行，形势颇具挑战。

bilibili 00:05:14

▶ When our goals are in tension like this, our framework calls for us to balance both sides of our dual mandate.

当目标出现此类冲突时，我们的#框架#要求平衡#双重##使命#的两个方面。

▶ With downside risks to employment having increased, the balance of risks has shifted.

随着就业下行风险加剧，风险平衡已发生变化。

▶ Accordingly, we judged appropriate at this meeting to take another step toward more neutral policy stance.

#因此#，我们认为本次会议适宜采取进一步措施迈向更#中性#的政策#立场#。

▶ With today's decision, we remain well positioned to respond in a timely way to potential economic developments.

通过今日决策，我们仍处于有利位置，能够#及时#应对潜在的经济动态。

▶ We will continue to determine the appropriate stance of monetary policy based on the incoming data, the evolving outlook, and the balance of risks.

我们将继续根据#陆续发布#的数据、不断演变的#前景#和风险平衡来确定#货币#政策的适当#立场#。

▶ In our SEP, FOMC participants wrote down their individual assessments of an appropriate path for the federal funds rate based on what each participant judges to be the most likely scenario for the economy.

在经济预测摘要中，FOMC与会者根据各自对经济最可能前景的判断，写下对联邦基金利率合适路径的个人评估。

▶ The median participant projects at the appropriate level of the federal funds rate will be 3.6% at the end of this year, 3.4% at the end of 2006, and 3.1% at the end of 2007.

预测中值显示联邦基金利率合适水平为今年年底3.6%，2006年底3.4%，2007年底3.1%。

▶ This path is 1.25% lower than projected in June.

该路径较6月预测低1.25个百分点。

▶ As is always the case, these individual forecasts are subject to uncertainty and they are not a committee plan or decision.

与往常一样，这些个人预测存在不确定性，并非委员会计划或决议。

▶ Policy is not on a preset course.

政策并未遵循#预设#路径。

▶ The Fed has been assigned two goals for monetary policy, maximum employment and stable prices.

美联储被赋予#货币#政策的两大目标：最大就业和稳定物价。

▶ We remain committed to supporting maximum employment, bringing inflation sustainably to our 2% goal, and keeping longer term inflation expectations well anchored.

我们继续致力于支持最大就业，将#通货膨胀#持续降至2%目标，并保持长期通胀预期稳定锚定。

 00:06:48

 Our success in delivering on these goals matters to all Americans.

实现这些目标关乎所有美国人的利益。

 We understand that our actions affect communities, families, and businesses across the country.

我们深知决策影响着全国各地的社区、家庭和企业。

 Everything we do is in service to our public mission and we at the Fed will do everything we can to achieve our maximum employment and price stability goals.

我们的一切行动都是为了公共服务使命，美联储将竭尽全力实现最大就业和价格稳定目标。

 Thank you.

谢谢。

 00:07:07

 I look forward to our discussion.

期待接下来的讨论。

 Chris.

克里斯。

 Great.

好的。

 Thank you.

谢谢。

 Chris Regaver, the Associate of Press.

克里斯·雷加弗，美联社记者。

▶ As you know, Fed Governor Steven Myron has continued kept his position at the White House, even as he's joined the Fed Board.

如您所知，美联储理事史蒂文·迈伦在加入美联储理事会后仍保留白宫职位。

▶ This is the first time I believe the Fed's Board has had someone with executive branch ties in decades.

我相信这是几十年来美联储理事会首次出现与行政部门有关联的人士。

bilibili 00:07:31

▶ Does this compromise the Fed's independence from day to day politics and, relatedly, how can you maintain the public's perception the Fed is politically independent with this dynamic?

这是否会损害美联储独立于日常政治的地位？相关地，您如何在这种动态下维持公众对美联储政治独立性的认知？

▶ Thank you.

谢谢。

▶ So, we did welcome a new committee member today, as we always do, and the committee remains united in pursuing our dual mandate goals.

今天我们一如既往地欢迎新委员加入，委员会在追求#双重##使命#目标方面保持团结。

bilibili 00:07:53

▶ We're strongly committed to maintaining our independence and beyond that.

我们坚定维护独立性，除此之外。

▶ I really don't have anything to share.

我确实没有更多可分享的信息。

▶ I'm sorry.

抱歉。

▶ Can you and other Fed officials have spoken extensively about the impact of tariffs on inflation, although perhaps with many companies appearing to eat the tariffs may be impacting the labor market and other parts of the economy instead?

您和其他美联储官员曾广泛讨论过#关税#对通胀的影响，但尽管许多企业似乎自行消化了关税成本，这是否反而对劳动力市场和经济其他领域造成了冲击？

bilibili 00:08:16

▶ Do you see that as a possible outcome here that tariffs are the reason we're seeing some slowing particularly in the labor market, rather than in inflation?

您是否认为存在这种可能性——关税正是我们在劳动力市场（而非通胀领域）看到放缓迹象的原因？

▶ Thank you.

谢谢。

▶ You know, it's certainly possible.

确实存在这种可能性。

▶ We're beginning to see.

我们开始观察到。

▶ We have begun to see goods prices showing through into higher inflation and actually the increase in goods prices accounts for most of the increase in inflation or perhaps all of the increase in inflation over the course of this year.

我们已经看到商品价格上涨推高通胀，实际上今年以来的通胀上升主要（甚至完全）是由商品价格上涨驱动的。

bilibili 00:08:43

▶ Those are not very large effects at this point, and we do expect them to continue to build over the course of the rest of the year and in the next year.

目前这些影响还不显著，但我们预计其效应将在今年剩余时间和明年持续累积。

▶ And it's also possible that there may be effects on unemployment, but I would say if you're looking at why employment is doing what it's doing, that's much more about the changing immigration.

关税也可能对失业率产生影响，但若要探究就业形势变化的根源，主要因素在于移民政策的变化。

▶ So the supply of workers has obviously come way down.

劳动力供给已明显下降。

bilibili 00:09:07

▶ There's very little growth, if any, in the supply of workers.

劳动力供给几无增长（即便有也微乎其微）。

▶ And at the same time demand for workers has also come down quite sharply.

与此同时劳动力需求也急剧下降。

▶ And to the point where we see what I've called a curious balance, it's, you know, typically when we say things are in balance, that sounds good, but in this case the balance is because both supply and demand have come down quite sharply.

这种供需双降形成了某种奇特的平衡——通常平衡是好事，但这次的平衡源于供需两侧的急剧收缩。

bilibili 00:09:29

▶ Now demand coming down a little more sharply because we see, we now see the unemployment rate edging up.

目前需求下降更为明显，因为我们看到失业率正在小幅攀升。

▶ Nick.

尼克。

▶ Nick Timmeros at the Wall Street Journal.

《华尔街日报》的尼克·蒂梅罗斯。

🎧 Chair Powell do economic conditions and the balance of risks no longer warrant a restrictive policy setting?

鲍威尔主席，经济状况和风险平衡是否已不再#支持#限制性政策设定？

🎧 So I don't think we can say that.

我认为不能这么说。

🎧 What we can say is this, that over the course of this year we've kept our policy at a restrictive level and people have different views, but a clearly restrictive level I would say.

可以肯定的是，今年我们始终将政策维持在限制性水平（尽管存在不同观点），但我认为限制性明确的。

 00:10:03

🎧 So and we were able to do that over the course of this year because the labor market was in very solid condition with strong job creation and all those things.

我们今年能坚持限制性政策，是因为劳动力市场非常稳健，就业创造强劲等因素。

🎧 I think if you go back to April and now look at the revised job creation numbers for, for May, June, July and August, you can kind of, I can no longer say that.

但若对比四月数据与现在修订后的五、六、七、八月就业数据，我已无法再作出这样的判断。

🎧 So what that means is that the risks which, the risks were clearly tilted toward inflation, I would say they're moving toward, toward equality.

这意味着原本明显#倾向#于#通胀#的风险正在向#均衡#移动。

 00:10:30

🎧 Maybe they're not quite out of quality.

或许尚未完全达到均衡。

🎧 We don't need to know that.

我们无需精确判断。

▶ But we do know that they've moved meaningfully toward greater equality, the risks between the two goals and that suggests that we should be moving in the direction of neutral and that's what we did today.

但可以确定风险已显著趋向均衡，这表明政策应向中性调整——这正是我们今天所做的。

▶ Under what circumstances would a larger than 25 basis points rate cut be warranted and how seriously was that option entertained at your meeting this week?

在什么情况下可能需要进行超过25个基点的降息？本周会议上对此选项的讨论有多深入？

 00:10:55

▶ There wasn't widespread support at all for a 50 basis point cut today.

本次会议上完全没有对降息50个基点形成#广泛#支持。

▶ I think we've done very large rate hikes and very large rate cuts in the last five years.

过去五年我们实施过大幅加息和降息。

▶ And you tend to do those at a time when you feel that policy is out of place and needs to move quickly to a new place.

这类操作通常发生在政策明显失调、需要快速调整至新定位时。

▶ That's not at all what I feel certainly now.

当前显然不属于这种情况。

 00:11:16

▶ I feel like our policy has been doing the right thing so far this year.

我认为今年以来的政策方向是正确的。

▶ I think we were right to wait and see how tariffs and inflation and the labor market evolved.

等待观察#关税#、#通胀#和劳动力市场的演变是正确决策。

▶ I think we're now reacting to the much lower level of job creation and other evidence of softening in the labor market and saying well those risks are maybe not fully balanced but

moving in the direction of balance now.

现在我们对就业创造大幅放缓等劳动力市场疲软迹象作出反应，说明风险虽未完全平衡但正趋向平衡。

 00:11:38

 And so that warrants a change in policy.

因此政策调整是合理的。

 Colby Smith for the New York Times.

《纽约时报》的科尔比·史密斯。

 Should we be viewing today's cut as the committee taking out some insurance against the possibility that the labor market is at risk of weakening or is it the committee's view that the dynamics of a downturn are already in place.

本次降息应视为委员会为防范劳动力市场走弱风险采取的保险措施，还是说委员会认为经济下行趋势已经形成？

 I guess I'm just trying to square the shift in the rate forecast in the SEP towards more cuts than just three months ago with the fact that the forecast for unemployment didn't change.

我试图理解为何SEP中的利率预测显示降息幅度比三个月前更大，但失业率预测却未调整。

 00:12:08

 Yeah, I think you could think of this in a way as a risk management cut because if you look at the SEP actually the projections for growth this year and next to actually ticked up just a little bit and inflation and unemployment didn't really move on.

可以将其视为风险管理式降息——SEP中今明两年增长预测小幅上调，而通胀和失业率预测基本未变。

 So what's different now?

那么变化何在？

 What's different now is that you see a very different picture of the risks to the labor market.

变化在于劳动力市场风险图景已截然不同。

 00:12:29

🎧 You've seen, you know, we were looking at 150,000 jobs a month at the time of the last meeting and now we see the revisions and we see the new numbers.

上次会议时月均就业增长为15万，现在根据修订数据和新数据——

🎧 And I don't want to put too much emphasis on payroll job creation but it's just one of the things that suggests that the labor market is really cooling off and that tells you that it's time to take that into account in our policy.

虽然不必过度关注非农就业数据，但这确实是劳动力市场降温的迹象之一，提示我们需要在政策中予以考量。

🎧 So just looking at the SEP once again the median participant has inflation higher than previously expected by the end of next year and the Fed not getting back to the 2% target until 2028.

再看SEP：预测中值显示明年年底通胀将高于此前预期，美联储要到2028年才能回归2%目标。

 00:13:02

🎧 So I guess I'm just wondering how you characterize the risk to price pressures of kicking off a series of cuts at this point.

请问您如何#评估#此时开启系列降息对价格压力的风险？

🎧 Yeah, so I would look at it this way.

我的看法是：

🎧 We fully understand and appreciate that we need to remain fully committed to restoring 2% inflation on a sustained basis and we will do that.

我们完全理解并承诺将持续致力于恢复2%的通胀目标。

🎧 At the same time we've got to weigh the risks to the two goals and I would say since really since April to me the risks of higher and more persistent inflation have probably become a little less and that's partly because the labor market has softened GDP growth has slowed down.

同时需要权衡双重目标的风险——我认为自四月以来，通胀居高不下且持续更久的风险已有所降低，部分源于劳动力市场疲软和GDP增长放缓。

 00:13:43

▶ So I would just say that the risk there have been less than one might think.

因此这方面的风险可能低于人们想象。

▶ In terms of the labor market what we're seeing is unemployment is still low, it's still relatively low rate but we're seeing downside risks.

劳动力市场方面，失业率仍处于相对低位，但我们看到下行风险。

▶ Michael McKee from Bloomberg Radio and Television.

彭博广播与电视的迈克尔·麦基。

▶ A little confused by your explanation of the Fed cutting rates because of unemployment if you think that most of what's happening in the employment area is related to immigration which your rate cuts wouldn't address.

如果您认为就业领域的变化主要与#移民#相关（而降息无法解决该问题），却以失业为由解释降息，这令人有些困惑。

 00:14:24

▶ How do you see that as more important than inflation which has remained almost a full percentage point above your target?

为何认为这比仍高于目标近一个百分点的#通胀#更重要？

▶ I was saying that what's happening in the labor market has more to do with immigration than it has to do with tariffs.

我指的是劳动力市场变化与#移民#的关联度高于关税。

▶ That was the question I was answering.

这是对之前问题的回应。

▶ I wouldn't say that all of what's happening in the labor market is due to tariffs.

我并未说劳动力市场所有变化都源于关税。

 00:14:45

 You clearly have a slowing in immigration.

#移民#数量确实在放缓。

 You clearly have a slowing in demand which is now perhaps more than that in supply and we know that because the unemployment rate has ticked up.

需求放缓程度可能已超过供给——失业率上升正说明了这一点。

 That's what I meant by that.

这就是我的本意。

 I think I follow up.

追问一句。

 Every year since 2015 the SEP has forecast that you would hit your target two years later.

2015年以来，SEP每年都预测两年后能达到目标。

 00:15:08

 This year, this SEP says you're going to hit your target two years later.

今年SEP又预测两年后实现目标。

 2% does not seem to be in sight.

2%目标似乎遥遥无期。

 Does that suggest that the 2% target is not really achievable and does this present any credibility problems for you in telling people that that's what you're going to do if you can never reach it?

这是否意味着2%目标实际难以实现？始终无法达标会否影响美联储承诺的可信度？

 Well, you're right.

您说得对。

▶ It does say we're going to get to 2% inflation in 2028 at the end of 28.

SEP确实预测2028年底实现2%#通胀#。

bilibili 00:15:36

▶ That's literally how you put the projections together.

这只是预测数据的机械组合。

▶ You're writing down a rate path which is designed to create over the course of the SEP time frame, 2% inflation and maximum employment too.

我们设定利率路径旨在SEP时间框架内实现2%通胀和最大就业目标。

▶ That's all that is.

仅此而已。

▶ We don't know and really know where the economy will be in three years.

我们无法确知三年后的经济状况。

▶ The nature of the exercise is to write down policy that you believe would return to the 2% goal over the, at least by the end of the exercise.

本次演练的本质是制定您认为能够使通胀率回归2%目标的政策，至少要在演练结束前实现。

bilibili 00:16:06

▶ Thanks so much, Elizabeth Schullzly with ABC News.

非常感谢，ABC新闻的伊丽莎白·舒尔茨利。

▶ The latest inflation report shows that prices are still going up across key categories for many households including groceries.

最新#通胀#报告显示，包括食品杂货在内的多个关键消费类别价格仍在上涨。

▶ What will the Fed do if prices pick up more?

如果物价进一步上涨，美联储将采取什么措施？

▶ So our expectation, and you can see this consistently through the year, has been that inflation will move up this year but that the, basically because of the effects on goods prices from tariffs.

我们的预期（这一点全年都得到印证）是今年通胀会上升，但这主要源于关税对商品价格的影响。

 00:16:37

▶ But that, those will turn out to be a one time price increase as opposed to creating an inflationary process.

但这些影响将体现为一次性涨价，而非引发持续通胀过程。

▶ That's been our forecast pretty much every four, all the individual forecasts say that.

这是我们几乎每份预测都坚持的观点，所有委员的预测都表明这一点。

▶ We can't just assume that though, right?

但我们不能仅仅假设如此，对吗？

▶ We have to, our job is literally to make sure that that is what happens and we will do that job.

我们必须——我们的职责就是确保这种情况实现，我们将履行这一职责。

 00:16:57

▶ Right now, the situation we're in is that we see, we see inflation, we continue to expect it to move up, maybe not as high as we would have expected it to move up a few months ago.

当前我们看到通胀存在，仍预期其会上升，但升幅可能低于数月前的预期。

▶ The pass through into, of the tariffs into inflation has been slower and smaller.

关税向#通胀#的传导速度更慢、幅度更小。

▶ The labor market has softened.

劳动力市场已经疲软。

▶ So the case for there being a persistent inflation outbreak is less.

因此出现#持续性#通胀#爆发#的可能性降低。

 00:17:23

🎧 And so that's why we think it's time for us really to acknowledge that the risks to the other mandate have grown and that we should move in the direction of neutral.

这就是为何我们认为现在确实需要承认另一项法定目标面临的风险已增大，应该朝中性政策方向调整。

🎧 So what will we do?

那么我们将怎么做？

🎧 We'll do what we need to do, but we have two mandates and we try to balance them.

我们会采取必要行动，但我们有双重使命且需力求平衡。

🎧 For a long time, our framework says that when our two goals are intentioned, this is quite an unusual situation.

长期以来我们的#框架#表明，当两个目标出现冲突时（这是相当特殊的情况），

 00:17:44

🎧 How do we decide what to do?

我们如何决策？

🎧 Because our tools can't do two things at once.

因为我们的工具无法同时实现两个目标。

🎧 What we do is we ask which is farther from, how far is each from the goal and how long is it expected to get to the goal?

我们会评估哪个目标偏离更远、偏离程度如何以及预计需要多久才能实现目标？

🎧 So and then that's, we think about those things and we see, as I mentioned, our policy had been really skewed toward inflation for a long time really.

正如我所言，经过这些评估后可以看到，我们的政策长期来确实过于偏向通胀目标。

bilibili 00:18:04

⌂ Now we see that there's downside risk clearly in the labor market and so we're moving in direction of more neutral policy.

现在我们看到劳动力市场明显存在下行风险，因此正朝着更#中性#的政策方向调整。

⌂ How concerned are you about the slowdown in the jobs market for households at home, especially younger Americans struggling to land a job?

您对国内就业市场放缓有多担忧？尤其是难以找到工作的年轻美国人？

⌂ So it's an interesting labor market and obviously we think it's appropriate that we reduce our rates so that we become more neutral, which presumably will be better for the labor market.

当前劳动力市场很有趣，我们认为降息使政策更中性是合适的，这应该对劳动力市场更有利。

bilibili 00:18:31

⌂ You see people who are sort of more at the margins, so kids coming out of college and younger people, minorities are having a hard time finding jobs.

边缘群体——大学毕业生、年轻人、少数族裔——确实更难找工作。

⌂ The overall job finding rate is very, very low.

总体求职成功率非常非常低。

⌂ However, the layoff rate is also very low.

但#裁员#率也很低。

⌂ So you've got a low firing, low hiring environment and the concern is that if you start to see layoffs, the people who are laid off won't, there won't be a lot of hiring going on so that could very quickly flow into higher unemployment.

当前是低解雇低招聘环境，令人担忧的是：若开始出现裁员，被裁者将难以再就业（因为招聘活动稀少），这可能迅速推高失业率。

bilibili 00:19:05

⏮️ Healthier economy, healthier labor market, there would be jobs for those people but now the hiring rate is very, very low.

在经济更健康、劳动力市场更繁荣时本应有就业机会，但当前招聘率极低。

⏮️ So that's been a growing concern over the last few months and it's one of the reasons why we think it's appropriate that we begin to shift our policy focus toward a more balanced one.

这是过去几个月日益令人担忧的问题，也是我们认为应该将政策重点转向更均衡方向的原因之一。

⏮️ Steve.

史蒂夫。

⏮️ Steve Lee has been seeing you.

史蒂夫·李一直在关注您。

 00:19:28

⏮️ Steve, Mr. Chair, in the past during rate, could you use the word recalibration?

主席先生，过去讨论利率时您用过"重新校准"一词。

⏮️ And I wonder if you pointedly did not use it this time.

请问您这次是否刻意避免使用该表述？

⏮️ And in fact, when you said policy is not on a preset, or did you mean that is sort of the opposite of recalibration?

事实上当您说政策不是#预设#时，是否意味着这与重新校准相反？

⏮️ Are we meeting to meeting data point by data point?

我们是否在逐场会议根据数据决策？

⏮️ Are we in the process here of getting back to neutral?

我们是否正处于回归#中性#的过程中？

 00:19:52

▶ Thank you.

谢谢。

▶ So I think we are in a meeting by meeting situation.

我认为当前属于逐次会议决策的模式。

▶ We're going to be looking at the data.

我们将持续关注数据。

▶ You know, let me say a word about the SEP really here.

请允许我简要说明《经济预测摘要》(SEP)。

▶ So we often point this out.

我们经常强调：

▶ The SEP is an accumulation of the individual projections of 19 people showing what they believe at a particular moment in time to be the most likely path for the economy and thus the appropriate path for monetary policy as well.

SEP是19位委员个人预测的#汇总#，反映特定时点他们对经济最可能路径的判断及相应货币政策路径。

 00:20:21

▶ And as you know, we don't debate or try to agree on what that is.

如您所知，我们不会就此辩论或寻求共识。

▶ We just write them down and accumulate them.

我们只是记录并#汇总#这些预测。

▶ We do sometimes discuss them.

有时会进行讨论。

▶ And so we always say we're not on a preset path then we really mean that.

因此我们常说政策没有#预设#路径——这是实话。

▶ The actual decisions we make are going to be based on the incoming data, the evolving outlook and the balance of risks at the time the decisions are actually made.

实际决策将基于实时数据、变化中的前景以及决策时的风险平衡。

bilibili 00:20:40

▶ So you will have seen that we have 10 participants out of 19 who wrote down two or more cuts for the remainder of the year.

您已看到19位委员中，有10人预测今年剩余时间将降息两次或更多。

▶ And nine who wrote down fewer than in fact in a good number of cases no more cuts.

另有9人预测较少降息（其中多数认为不会进一步降息）。

▶ So rather than looking at this as certainty, I would encourage people as always to look at the SEP through the lens of probability.

因此我建议人们像往常一样，通过#概率#的#视角#看待SEP，而非将其视为#确定性#预测。

bilibili 00:21:05

▶ And so they're different possible outcomes and likelihoods rather than this one is certain and this one isn't happening.

这体现的是不同结果的可能性，而非确定性与非确定性。

▶ So that's what I would say.

这就是我的观点。

▶ Thank you for getting to my follow up question.

感谢允许追问。

▶ What is the dispersion in the outlook, a sign of uncertainty of policy in the in the meetings to come.

#展望#中的分歧是否预示未来会议政策的不确定性？

▶ Thank you.

谢谢。

▶ You know, it's it is such an unusual situation.

这确实是非常特殊的局面。

bilibili 00:21:29

▶ Ordinarily when the labor market is a weak inflation is low and when the labor market is really strong, that's when you die of a careful bad inflation.

通常劳动力市场疲软时通胀低迷，而劳动力市场过热时则需警惕恶性通胀。

▶ So we have a situation where we have two sided risk.

但现在我们面临双向风险。

▶ And that means there's no risk free path.

这意味着没有无风险路径。

▶ And so it's quite a different difficult situation for policymakers.

对政策制定者而言这是相当棘手的局面。

▶ And it's not at all surprising to me that you have a range of views.

出现多元观点完全在我意料之中。

bilibili 00:21:53

▶ It's not so much about having different views for the path of the economy, but it's partly that.

这不完全源于对经济路径的不同判断（虽然部分相关），

▶ But it's also partly about what's the right thing to do in light of this, of the tension between the two goals.

更涉及在双重目标冲突下如何正确决策。

▶ How do you weight them?

如何权衡两者？

▶ How worried are you about one versus the other?

对某一目标的担忧程度#相对于#另一目标如何？

▶ And so it's it's natural.

因此这种分歧是自然的。

▶ And I think it would actually be surprising if you didn't have a pretty wide range of views based on, you know, in this kind of highly unusual situation.

在这种极不寻常的形势下，若观点高度一致反而令人惊讶。

 00:22:17

▶ And we do.

而我们确实存在分歧。

▶ So, but you know, we get together, we discuss, we have a great discussion, and then we decide what to do and we act.

但我们通过会议讨论（有时是激烈讨论）后作出决策并行动。

▶ But you're right there that it is it's a wide dispersion of views.

您说得对，当前观点确实存在广泛分歧。

▶ And I think that's understandable and natural in the current situation.

我认为在当前形势下这是可理解且自然的。

▶ Sorry.

请讲。

▶ Hi, Victoria Guida with Politico.

您好，我是POLITICO的维多利亚·吉达。

 00:22:42

▶ You've talked a lot about Fed independence and the importance of it over the years.

您多年多次强调美联储独立性及其重要性。

▶ But as markets have questions about what exactly President Trump's intentions are with the Fed, what would you point to as the things they should be watching to determine that the Fed is still making decisions based on, you know, the economic outlook rather than political considerations?

但随着市场对特朗普总统对美联储意图的质疑，您认为应关注哪些迹象来确认美联储决策仍基于经济前景而非政治考量？

▶ Look, it's deeply in our culture to do to do our work based on the incoming data and and never considering anything else.

基于#实时#数据决策且绝不考虑其他因素已深入我们的文化骨髓。

 00:23:13

▶ That's just everybody who's at the Fed really feels strongly about that way.

美联储所有成员都对此抱有坚定信念。

▶ So, you know, you'll know it by the way we talk about what we're doing by the speeches that people give by the decisions that we make.

您可以通过我们的政策论述、公开演讲及最终决策看出这一点。

▶ You'll know that we're just still going to do that.

您会明白我们将始终坚持这一原则。

▶ That's all we do.

这就是我们的全部工作。

▶ And we don't we don't frame these questions at all or see them in terms of political outcomes.

我们完全不会从政治结果的角度构建或看待这些问题。

 00:23:34

▶ I think when you get to another part of Washington, everything is seen through the lens of does it help or hurt this political party, this politician, you know, that's the framework.

在华盛顿其他部门，一切都被置于"是否有利于/有害于某政党或政客"的框架下审视。

▶ And I think people find it hard to believe that that's just that is not at all the way we think about things at the Fed.

但人们难以相信这完全不是美联储的思维方式。

▶ We're taking a longer perspective.

我们着眼长期视角。

 00:23:51

▶ We're trying to serve the American people as best we can.

我们竭尽全力为美国人民服务。

▶ So I think you would be able to tell I don't believe we'll ever get to that place.

所以我认为你能看出我不相信我们最终会走到那一步。

▶ You know, I would say we're doing our work exactly as we always have now.

你知道，我会说我们正在像一直以来那样开展工作。

▶ And people are making their arguments and we're having really a great discussion around these challenging issues.

人们正在提出他们的论点，我们围绕这些具有挑战性的问题进行了非常深入的讨论。

 00:24:12

▶ So.

所以。

▶ Do you see the court case around Lisa Cook as being related to questions of Fed independence?

你认为围绕丽莎·库克的法庭案件与美联储独立性问题有关吗？

▶ You know, I see it as a court case that it would be inappropriate for me to come it on.

你知道，我认为这是一个法庭案件，我对此发表评论是#不合适的#。

▶ Thanks, Mr. Chairman, Edward Lawrence from Fox Business.

谢谢主席先生，我是福克斯商业的爱德华·劳伦斯。

▶ So we saw the preliminary benchmark revisions down 911,000.

所以我们看到#初步#的#基准#修订下调了91.1万。

bilibili 00:24:37

▶ The revisions for June were the first negative revisions we've seen since December of 2020.

六月份的修订是我们自2020年12月以来首次看到的负向修订。

▶ How can the Fed base important decisions on rate and what to do with the interest rates on data that seems to be, as you've called it in the past and noisy?

美联储如何能依据您过去称之为嘈杂的数据，来做出关于利率的重要决策以及如何处理利率？

▶ So on the QCEW, the revision that we saw was almost exactly what we expected.

关于QCEW（季度就业与工资普查），我们看到的修订几乎完全符合我们的预期。

bilibili 00:24:58

▶ It was amazing how close the expectation was.

预期如此接近，这令人惊讶。

▶ So and the reason for that is for the last bunch of quarters, there's been almost a predictable overcount.

其原因是，在过去几个季度里，一直存在一种几乎#可预测的#高估。

▶ And I think the Bureau of Labor Statistics really does understand this and they're working hard to fix it.

我认为劳工#统计局#确实理解这一点，并且他们正在努力修正它。

▶ It's got to do, of course, it has something to do with low response rates.

当然，这与低回复率有关。

bilibili 00:25:19

🎧 It's also got to do with what's called the birth death model because a good amount of job creation happens around new companies and how many go out of business, how many are founded.

这也与所谓的“生灭模型”有关，因为大量的就业创造发生在新公司周围，涉及多少公司倒闭，多少公司成立。

🎧 And it's just really hard.

而这真的很难。

🎧 You can't survey for that.

你无法通过调查来获取这些数据。

🎧 You've got to have a model that predicts that.

你必须有一个模型来预测它。

🎧 And it's quite difficult to do, especially when the economy is undergoing big changes.

这相当困难，尤其是在经济经历巨大变化时。

 00:25:37

🎧 So and they've been working on that and are making progress on it.

因此，他们一直在努力解决这个问题，并正在取得进展。

🎧 But the data we get is still well good enough for us to do our work.

但我们得到的数据仍然足够好，足以让我们完成工作。

🎧 To the extent we have the issues around data right now, it's about low response rates.

就目前我们在数据方面遇到的问题而言，主要是低回复率。

🎧 That's happened all over really.

这实际上到处都在发生。

🎧 Response rates are just lower to surveys now, both in and out of the government.

现在，无论是政府内部还是外部的调查，回复率都更低了。

 00:26:00

▶ And it's no great secret.

这已经不是秘密了。

▶ We want higher response rates and we need those to have less volatile data.

我们希望有更高的回复率，我们需要这些来获得更少#波动#的数据。

▶ And the way to get that is to make sure that the agencies that collect the data have sufficient resources to drive higher response rates.

实现这一目标的方法是确保收集数据的机构拥有足够的资源来提高回复率。

▶ It's not a complicated problem, but that's what it takes.

这不是一个复杂的问题，但这就是所需要的。

▶ It's not a mystery.

这并不神秘。

 00:26:18

▶ That's what it takes.

这就是所需要的。

▶ The other thing I'll say, Edward, is in the case of the job creation, the first, the response rate is quite low for the first month or lower for the first month.

爱德华，我要说的另一件事是，就就业创造数据而言，第一个月的回复率相当低。

▶ By the time you get to the second or third month, you're still collecting responses for that last month, for that prior month.

当你进入第二或第三个月时，你仍在收集上个月的数据回复。

▶ And you get to the place where the data are much more reliable by the second and certainly the third month.

到了第二个月，尤其是第三个月，数据就变得#可靠#得多。

bilibili 00:26:40

▶ So it's not that we don't get the data.

所以，并不是我们得不到数据。

▶ It's just that we get it a little later.

只是我们得到数据的时间稍晚一些。

▶ But if, well, for benchmarks, if that holds, it's 51% of the jobs that we thought were there weren't really there.

但是，对于基准修订来说，如果这个数字成立，那就意味着我们认为存在的职位中有51%实际上并不存在。

▶ It shows a weaker market, job market coming into this year.

这表明进入今年时市场、就业市场更为疲软。

▶ If you had had that information, would it have changed your mind related to where the interest rates should be?

如果你当时掌握了这个信息，它会改变你关于利率应该处于何处的想法吗？

bilibili 00:27:00

▶ Should there have been a cut earlier?

是否应该更早降息？

▶ You know, we have to live life looking for the windshield rather than the rear view mirror, as you know.

你知道，我们必须向前看，而不是向后看。

▶ And all I can tell you is we see where we are now and we take appropriate action.

我只能告诉你，我们看到了我们现在所处的位置，并采取了适当的行动。

▶ We took that appropriate action today.

我们今天采取了那个适当的行动。

🎵 Thanks.

谢谢。

🎵 Thanks, Howard Schneider with Reuters.

谢谢，我是路透社的霍华德·施耐德。

 00:27:18

🎵 So as you mentioned a minute ago, some margins of the job market would suggest that the slides already happening.

正如你刚才提到的，就业市场的一些边缘迹象表明下滑已经在发生。

🎵 A black unemployment rate in August was above 7%.

八月份黑人失业率超过了7%。

🎵 The Clinding Work Week difficulty among college graduates finding work, high rising youth unemployment.

(Clinding Work Week疑为误记，可能指特定指标) 大学毕业生找工作困难，青年失业率急剧上升。

🎵 Why do you think a quarter percentage point now is going to arrest that?

你为什么认为现在25个基点（0.25个百分点）的降息就能阻止这种情况？

 00:27:41

🎵 Well, I hadn't said that I thought a quarter point would make a huge difference to the economy, but you've got to look at the whole path of rates.

嗯，我并没有说过我认为25个基点会对经济产生巨大影响，但你必须看利率的整个路径。

🎵 And markets already, as already been baking in expectations, our market works through expectations.

市场已经在消化预期，我们的市场是通过预期来运作的。

🎵 So I think our policy路径 really does matter.

所以我认为我们的政策路径确实很重要。

▶ And I think it's important that we use our tools to support the labor market.

我认为我们使用我们的工具来支持劳动力市场是很重要的。

bilibili 00:28:01

▶ When we do see signs like that, I did mention that.

当我们确实看到这样的迹象时，我确实提到了这一点。

▶ You see minorities on a plumber going up, you see younger people.

你看到少数族裔的#失业率#在上升，你看到年轻人。

▶ People who are more vulnerable economically, more susceptible to economic cycles.

那些在经济上更#脆弱#、更容易#受到#经济周期影响的人。

▶ That's one of the reasons in addition to just overall lower payroll job creation that shows you that at the margin of the labor market is weakening.

这是除了整体薪资就业创造较低之外，显示劳动力市场边缘正在疲软的另一个原因。

bilibili 00:28:22

▶ I would also point to labor force participation.

我还要指出劳动力参与率。

▶ Some part of the significant decline in labor force participation over the last year has probably been cyclical in nature rather than just the usual aging process.

过去一年劳动力参与率显著下降的部分原因可能具有周期性，而不仅仅是通常的老龄化过程。

▶ So we put all this together and we see that the labor market is softening and we don't need it to soften anymore, don't want it to.

因此，我们把所有这些放在一起，看到劳动力市场正在软化，我们不需要它进一步软化，也不希望如此。

bilibili 00:28:41

▶ So we use our tools.

所以我们使用我们的工具。

▶ And it starts with a 25 basis point rate cut.

而这始于25个基点的降息。

▶ But the market's also pricing in a rate path.

但市场也在为利率路径定价。

▶ I'm not blessing what the market's doing at all.

我完全没有#认可#市场的做法。

▶ I'm just saying it's not just one action.

我只是说这不仅仅是一次行动。

▶ As a follow up to that, the growth mix right now seems very concentrated in investment.

作为后续问题，目前的增长组合似乎非常集中在投资上。

▶ And on the consumer spending side in the higher income groups.

而在消费者支出方面，则集中在高收入群体。

bilibili 00:29:08

▶ Do you feel that that's an unsustainable mix for the economy moving forward?

你是否认为这种组合对于经济向前发展是不可持续的？

▶ I wouldn't say that.

我不会这么说。

▶ I mean, you're right.

我的意思是，你是对的。

▶ Those are two.

这是两个方面。

▶ We're getting unusually large amounts of economic activity through the AI build out and corporate investment.

我们正通过人工智能的建设和企业投资获得异常大量的经济活动。

▶ I don't know how long that will go on.

我不知道这会持续多久。

▶ No one does.

没有人知道。

▶ In terms of spending, you saw that the consumer spending numbers were well above expectations and that may well be skewed toward higher earning consumers.

在支出方面，你看到消费者支出数字远高于预期，而这很可能偏向于高收入消费者。

 00:29:41

▶ There's a lot of anecdotal evidence to suggest that.

有很多轶事证据表明这一点。

▶ Nonetheless, it's spending.

#尽管如此#，这是支出。

▶ So I mean, I think the economy is moving along economic growth is going to be one and a half and one and a half percent or better this year.

所以我的意思是，我认为经济正在发展，今年的经济增长将达到1.5%或更好。

▶ Maybe a little better.

也许更好一点。

▶ Forecast has been coming up, as you can see.

正如你所见，预测一直在上调。

▶ So labor market is unemployment is low.

所以劳动力市场是失业率很低。

▶ But down, down side risks, but it's still low unemployment rate.

但是存在下行风险，但失业率仍然很低。

▶ So that's how we see it.

所以我们是这样看的。

▶ Hi, Stephanie Rule, MSNBC.

你好，我是MSNBC的斯蒂芬妮·鲁尔。

▶ Treasury Secretary Scott Besen has said that the Federal Reserve suffers from mission creep and institutional bloat.

财政部长斯科特·贝森曾表示，美联储饱受使命#蔓延#和机构臃肿之苦。

▶ He's now calling for an independent review.

他现在呼吁进行独立审查。

▶ Did you support an independent review or are you open to any sort of reform in any areas of the Fed?

你支持独立审查吗？或者你对美联储任何领域的任何改革持开放态度吗？

▶ I, of course, am not going to comment on anything the Secretary says there are really any other officer says.

当然，我不会对部长或任何其他官员所说的任何话发表评论。

▶ So in terms of reform at the Fed, you know, we just went through a lengthy and I think very successful process of updating our, our monetary policy framework.

因此，就美联储的改革而言，你知道，我们刚刚经历了一个漫长且我认为非常成功的更新我们货币政策框架的过程。

▶ I would say there's a lot of work going on behind the scenes around the assets we have in the Federal Reserve Bank system and at the board.

我想说，在幕后有很多工作正在进行，围绕我们在美联储银行系统和理事会的资产。

 00:31:07

▶ Are they the right size?

它们的规模合适吗？

▶ We're actually going through a 10% head, 10% head count reduction through the whole Fed, including the board and all the Reserve banks.

我们实际上正在整个美联储系统（包括理事会和所有储备银行）进行10%的裁员。

▶ The employment employment at the Fed at the end of that will be basically at the same level that was more than 10 years ago.

在此过程结束时，美联储的就业人数将基本与10多年前的水平相同。

▶ So we will have had zero job growth for more than a decade when we're finished with that.

所以当我们完成时，我们将实现超过十年的零就业增长。

 00:31:30

▶ And I think we'll probably do more than that.

而且我认为我们可能会做得更多。

▶ So I think we're certainly open to constructive criticism and ways to do our jobs better.

所以我认为我们当然对#建设性#的批评和更好地完成工作的方法持开放态度。

▶ Not an independent review.

不是指独立审查。

▶ We're certainly open to, you know, to always trying to do better.

我们当然对，你知道，始终努力做得更好持开放态度。

▶ Thank you.

谢谢。

▶ Mr. Chairman, Neil Erwin with Axios, there's been some debate lately on whether AI is already

主席先生，我是Axios的尼尔·欧文，最近#关于人工智能是否已经

bilibili 00:31:54

▶ Starting to affect the labor market in terms of lower labor demand, higher productivity by contrast.

开始影响劳动力市场，表现为劳动力需求降低，而#生产率#却相对提高。

▶ Do you buy that?

你认同这个观点吗？

▶ And if that is true, does that have implications for the monetary policy setting?

如果这是真的，这是否会对#货币#政策制定产生影响？

▶ So there's great uncertainty around that.

因此这方面存在很大不确定性。

▶ I think my view, which is also a bit of a guess, but widely shared, I think, is that you are seeing some effects, but it's not the main thing driving it.

我认为我的观点——虽然带点猜测但也是广泛共识——是你确实看到了一些影响，但这并非主要驱动因素。

bilibili 00:32:17

▶ And so particular focus on young people coming out of college.

因此特别关注大学毕业生群体。

▶ And yeah, there may be something there.

是的，这方面可能确实存在影响。

▶ It may be that companies or other institutions that have been hiring younger people right out of college are able to use AI more than they had in the past.

可能是那些一直招聘应届毕业生的公司或机构比过去更能运用人工智能。

▶ That may be part of the story.

这可能是部分原因。

▶ It's also part of the story, though, that job creation more broadly has slowed down the economy, has slowed down.

但更广泛的就业创造放缓也是部分原因，经济确实已经放缓。

 00:32:42

▶ And so it's probably a number of things.

所以很可能是多种因素共同作用。

▶ But yeah, it's probably a factor, hard to say how big it is.

但没错，这很可能是一个因素，只是难以衡量其影响程度。

▶ Thanks, Mr. Chairman.

谢谢主席先生。

▶ What evidence do you see tariffs showing up in inflation?

您看到哪些关税影响#通胀#的证据？

▶ Well, if you can take goods, just sort of a broad goods category.

如果我们观察商品领域，广义的商品类别。

▶ And last year, goods inflation was negative.

去年商品#通胀#为负值。

▶ If you go back 25 years, that was the typical thing.

回溯25年，这曾是常态。

 00:33:13

▶ Was it goods inflation?

是商品#通胀#吗？

🎧 Was goods prices generally went down, even adjusting for quality?

即使考虑质量因素，商品价格总体是否在下降？

🎧 So that was not the case during the pandemic, of course.

当然疫情期间并非如此。

🎧 Goods inflation went very high.

商品#通胀#曾大幅上升。

🎧 We essentially returned to zero or slightly negative inflation.

我们基本已回归零或轻微负#通胀#。

🎧 Now I think goods inflation over the course of the past year is 1.2%, which doesn't sound like a lot, but it's a big change.

过去一年商品通胀率为1.2%，虽然听起来不高，但已是重大变化。

 00:33:35

🎧 So we think analysts have different views, but we think it's contributing 0.3 or 0.4, something like that to the current core PCE inflation reading, which is 2.9%.

分析师观点各异，但我们认为关税对当前2.9%的核心PCE通胀率贡献了约0.3或0.4个百分点。

🎧 So it's contributing.

所以确实产生了影响。

🎧 What seems to be happening is that the tariffs are mostly not being paid by exporters, mostly being paid by really the companies that sit between the exporter and the consumer.

实际情况似乎是：关税主要由出口商和消费者之间的中间企业承担，而非出口商。

 00:34:06

🎧 So if you buy something and you sell it through retail or you use it to make a product, you're probably taking a lot of those costs on and not able to pass it fully along to the consumer yet.

如果你采购商品并通过零售销售，或用于生产产品，你可能正在承担大部分成本，且尚未能完全转嫁给消费者。

▶ That appears to be what we're seeing.

这似乎是我们观察到的现象。

▶ All of those companies and entities in the middle of they'll tell you that they have every intention of passing that through in time, but they're not doing that now.

所有中间企业都会表示他们有意最终转嫁成本，但目前尚未这样做。

bilibili 00:34:30

▶ To the consumer, the pass through has been pretty small.

对消费者而言，成本转嫁程度非常有限。

▶ It's been slower and later slower and smaller than we thought.

其速度更慢、时间更晚、幅度更小，超出我们预期。

▶ But the evidence is very clear that there's some pass through.

但证据明确显示存在一定程度的转嫁。

▶ I also wanted to ask if you could share with us the conditions under which you might consider leaving the Fed in May.

我还想请问，您在何种条件下可能考虑于五月离开美联储。

▶ I have nothing new on that for you today.

今天我没有新信息可以提供。

bilibili 00:34:58

▶ I had arena survival with Bloomberg news.

我接受了彭博新闻关于#竞技场# #生存#的采访。

▶ I just wanted to follow up on one of your answers just a couple minutes ago.

我想就您几分钟前的回答进行追问。

▶ We've often heard you talk about how you and your colleagues do not think about politics.

我们常听您说您和同事不考虑政治因素。

▶ This does not enter the room.

政治因素不会进入决策讨论。

▶ But one of your new colleagues does come from this world where everything is seen through this framework of politics and of what party is being helped.

但您的一位新同事确实来自政治世界，那里一切都通过政治框架和党派利益视角来审视。

 00:35:31

▶ That person is still employed by the White House.

此人仍受雇于白宫。

▶ How can markets and the public interpret some of his speeches, for example, and then some of the forecasts that we see today.

市场和公众应如何解读他的某些言论，以及我们今天看到的某些预测？

▶ The median for this year was moved because of the introduction of his forecast.

由于他的预测加入，今年预测中值发生了变动。

▶ I'm talking about the number of rate cuts seen this year.

我指的是今年预期的降息次数。

▶ What do you say to markets and the public that are trying to interpret what you guys are saying?

您对试图解读美联储言论的市场和公众有何说明？

 00:36:04

▶ There's 12 19 participants of whom 12 vote as you know on a rotating basis.

19位参与者中有12位按轮换机制投票。

▶ No one voter can really move things around to be incredibly persuasive.

没有任何一位投票者能真正改变局面，除非具有超强#说服力#。

▶ The only way to do that in the context in which we work is to make really strong arguments based on the data and the one's understanding of the economy.

在我们工作环境中，唯一方法是通过数据和个人经济理解提出极具说服力的论证。

▶ That's really all that matters.

这才是关键所在。

bilibili 00:36:33

▶ That's how it's going to work.

这就是运作方式。

▶ That is the way the institution, that's in the DNA of the institution, that's not going to change.

这是 institutional 的运作方式，已融入 institutional 的基因，不会改变。

▶ I wanted to ask about a Gallup poll that showed that Americans now have more confidence in the president than the Federal Reserve when it comes to doing what's right for the economy.

我想问盖洛普民调显示，在经济决策方面，美国民众对总统的信心现已超过对美联储的信心。

bilibili 00:36:53

▶ Why do you think that is and what's your response?

您认为原因何在？您作何回应？

▶ What's your message to the public?

您对公众有何表态？

▶ Our responses we're going to do everything we can to use our tools to achieve the goals that Congress has given us and we're not going to get distracted by anything.

我们的回应是：我们将竭尽所能运用政策工具实现国会赋予的目标，不会受任何因素干扰。

▶ I think that's what we're going to do.

这就是我们将采取的行动。

▶ We're just going to keep doing our jobs.

我们将继续恪尽职守。

 00:37:13

▶ Claire.

克莱尔。

▶ Claire Jones, financial times.

克莱尔·琼斯，金融时报。

▶ Given the range of use express prior to the meeting, I think there was a lot less descend today than a lot of people expected.

鉴于会前意见分歧较大，今日分歧程度远低于许多人预期。

▶ It'd be good to know just what you think the drivers were of coming to their very strong consensus in the meeting and also on the flip side to just explain why the dot plots are really so scattered between someone even expecting rates to end up higher by the end of the year to five cuts.

我想了解您认为会议达成强烈共识的驱动因素是什么？另一方面，为何点阵图如此分散——从有人预计年底利率上升至有人预测降息五次？

 00:37:45

▶ I mean, what were the range of use you heard about on one side, why there was so much support for a cut today and on the flip side?

您听到的意见范围如何？为何今日降息获得如此多支持，另一方面...

▶ Why there's so much divergence about what comes next?

为何对后续政策存在如此大分歧？

▶ So I think there's quite a wide assessment that the situation has changed with respect to the labor market.

我认为存在广泛#评估#认为劳动力市场形势已发生变化。

▶ Whereas we could still say and did say in July, at the time of the July meeting, the labor market was in solid condition and we could point to 150,000 jobs per month and many other things.

七月会议时我们仍能说也确实说过劳动力市场稳固，每月新增15万就业岗位等多项指标。

 00:38:19

▶ I think that the new data that we've had and it's not just payrolls, it's other things as well, suggests that there really is meaningful downside risk.

现有新数据（不仅是 payrolls 还包括其他指标）表明确实存在显著下行风险。

▶ I said there was a down-flight risk then, but I think that that downside risk is now a reality and there's clearly more downside risk.

我当时说过存在下行风险，但现在下行风险已成为现实，且明显存在更大下行风险。

▶ I think that's broadly accepted.

这已是广泛共识。

 00:38:41

▶ That meant different things for different people.

这对不同人意味着不同事情。

▶ Some wrote down, almost everyone wrote down, supported this cut and some supported more cuts and some didn't, as you will see from the dot plot.

有人写下——几乎所有人都写下——支持本次降息，有人支持更多降息，有人不支持，点阵图体现了这点。

▶ That's just the way it is.

现实就是如此。

⏮ People who take this work very seriously think about it all the time, do their work, discuss it with our colleagues, endlessly discuss this in between ourselves and then we have a meeting where we put it all out on the table and this is what you get.

与会者极其认真地对待工作，持续思考研究，与同事讨论，会间不断交流，最终在会议上将所有观点摆上台面，于是得出这样的结果。

🎵 00:39:13

⏮ You're right, there's a range of views in the dots and I think that's, like I said, very unsurprising given the quite unusual, historically unusual nature of the challenges that we face.

您说得对，点阵图存在观点差异。正如所说，鉴于我们面临 historically 罕见的挑战，这完全不足为奇。

⏮ But let's remember though, the unemployment rate is 4.3%, the economy is growing at 1.5%.

但请记住：失业率4.3%，经济增速1.5%。

⏮ It's not a bad economy or anything like that.

经济状况并不糟糕。

🎵 00:39:39

⏮ You've seen much more challenging economic times but from a policy standpoint, the standpoint of what we're trying to accomplish, it's challenging to know what to do.

你们见过更艰难的经济时期，但从政策立场、从我们试图实现的目标来看，现在难以确定该如何行动。

⏮ As I mentioned earlier, there are no risk-free paths now.

如我之前所说，现在没有无风险路径。

⏮ It's not incredibly obvious what to do.

该怎么做并不十分明确。

▶ We have to keep our eye on inflation at the same time we cannot ignore and must keep our eye on maximum employment which is, there are two equal goals and you will see that there are just a range of views on what to do.

我们必须关注通胀，同时也不能忽视且必须关注最大就业——这是两个同等重要的目标，你会看到对于具体措施存在多种观点。

 00:40:11

▶ Nonetheless, we came together today at the meeting and acted with a high degree of unity.

#尽管如此#，我们今天在会议上凝聚共识，并以高度#团结#的方式采取了行动。

▶ Thank you, Archie Holtzmi, economist.

谢谢，经济学家阿尔奇·霍兹米。

▶ You mentioned earlier that job creation was running below your guest at its breakeven rates.

您之前提到就业创造速度低于您预估的收支平衡水平。

▶ I'd be curious to hear more about that and where you think the breakeven rate is.

我想进一步了解这个问题，以及您认为收支平衡点具体在哪里。

 00:40:35

▶ There are many different ways to calculate it and none of them is perfect but it's clearly come way down.

计算方式多种多样且都不完美，但该数值显然已大幅下降。

▶ You could say it's somewhere between zero and 50,000 and you'd be right or wrong and there are just many different ways to do it.

你可以说在0到5万之间——这个说法既对又错，因为测算方法实在太多。

▶ Whatever it was, 150,000, 200,000 a few months ago, it's come down quite significantly and that's because very low or amount of people are joining the labor force.

无论是几个月前的15万还是20万，现在都已显著下降，这是因为新增劳动力数量极少。

▶ The labor force really not growing much at this point and that's a lot of where the supply of labor was coming from over the last two or three years.

当前劳动力增长确实乏力，而过去两三年劳动力供给主要正是来源于此。

▶ So we're not getting that now.

如今这个来源已经枯竭。

▶ We're also, we've got much lower demand.

同时我们的需求也大幅降低。

▶ It's interesting that supply and demand have really come down together so far except now we do have inflation, sorry unemployment ticking up outside just one tick outside of the range where it's been for a year.

有趣的是供需始终同步下降，但现在失业率确实超出了过去一年的波动范围——抱歉刚才口误说成了通胀。

▶ 4.3% is still a low level but I think this level of this speedy decline in both supply and demand has certainly gotten everyone's attention.

4.3%仍属低位，但供需双方的快速下滑确实引起了广泛关注。

▶ I'll follow up by May.

我将在五月进行跟进。

▶ You mentioned the downside risk to employment to further amount but it's striking that measures of activity and output for the third quarter.

您提到就业存在进一步的下行风险，但令人惊讶的是第三季度活动和产出指标。

▶ The risk that we have seemed pretty strong, the Atlanta Fed's GDP now is very strong, a much strong PC numbers as well.

当前风险看似强劲——亚特兰大联储的GDP预测值非常强劲，PC数据也表现良好。

 How do you square those things?

您如何解释这种矛盾？

 Is there a chance actually to be upside risk to the labor market if those activity measures are right?

如果这些活动指标准确，劳动力市场是否反而存在上行风险？

 That would be great.

那将再好不过。

 We'd love that to happen.

我们乐见其成。

 I don't know that you see a big tension there but it's gratifying to see that economic activity is holding in.

我不认为这里存在巨大矛盾，但经济活动保持稳定确实令人欣慰。

 It's a good bit from consumption.

这很大程度上得益于#消费#。

 It looks like consumption was stronger than expected.

#消费#表现似乎强于预期。

 We got earlier this week, I guess.

我们本周初就看到了相关数据。

 Also we're getting a fairly narrow sector is producing a lot of activity which is the AI build out and business investment.

同时人工智能建设和商业投资这两个相对狭窄的领域正在创造大量经济活动。

▶ We watch all of it and I would say we did move up the median for growth for this year, actually moved up in the SEP between the June and September SEP.

我们密切关注所有数据——应该说我们确实上调了今年经济增长中值预测，在6月到9月间的《经济预测摘要》中进行了上修。

bilibili 00:42:52

▶ Really the inflation and labor market didn't change much.

实际上#通胀#和劳动力市场预测变化不大。

▶ It's really the risks that we're seeing to the labor market that were the focus of today's decision.

今天决策的重点正是我们观察到的劳动力市场风险。

▶ Nicole.

妮科尔。

▶ Hi, Nicole.

你好，妮科尔。

▶ Good kind of.

挺好的。

▶ Baron, thank you for taking my question.

#鲍伦#，感谢回答我的问题。

▶ Given the cumulative impact of high interest rates on the housing sector, I'm wondering how concerned you are that current rate levels are exacerbating housing affordability issues and potentially hindering household formation and wealth accumulation for a segment of the population.

鉴于高利率对房地产行业的累积影响，您是否担忧当前利率水平正在加剧住房可负担性问题，并可能阻碍部分人群的家庭组建和财富积累？

bilibili 00:43:27

▶ Housing is an interest sensitive activity.

房地产是利率敏感型行业。

▶ It's at the very center of monetary policy when the pandemic hit and we cut rates to zero.

疫情爆发时它正是#货币#政策的核心——我们当时将利率降至零。

▶ The housing companies were incredibly grateful and they said that was the only thing they kept them going was that we cut so aggressively and provided credit and things like that.

房地产公司无比感激，称激进的降息和信贷支持等措施是他们维持经营的唯一支柱。

▶ They were able to finance because we did that.

正是这些措施使他们能够获得融资。

 00:43:53

▶ The other side of that is when inflation gets high and we raise rates and you're right, it does burden the housing industry.

另一方面当#通胀#高企我们加息时——你说得对——这确实会#拖累#房地产行业。

▶ Rates have come down a bit and as that happens we don't set mortgage rates but our policy rate changes do tend to affect mortgage rates and that has been happening and that'll of course raise demand.

政策利率变化确实会影响抵押贷款利率，这种情况正在发生，当然会提振需求。

▶ Lower borrowing rates for builders will help get builders will supply and so some of that should happen.

建筑商融资成本降低将促进住房供应，这部分效应应该会显现。

 00:44:25

▶ I think most analysts think that we have to be pretty big changes for it to matter a lot for the big changes in rates for the to matter a lot for the housing sector.

我认为多数分析师认为需要较大利率变动才能对房地产行业产生显著影响。

▶ The other thing is by achieving maximum employment and price stability that's a strong economy that's a good economy for housing.

另一方面，实现最大就业和价格#稳定#意味着经济强劲，这对房地产有利。

▶ The last thing I'll say is there's a deeper problem here.

最后我想指出一个更深层的问题。

 00:44:47

▶ There's not a cyclical problem that the Fed can address and that just is a pretty much nationwide housing shortage.

这不是美联储能解决的周期性问题，而是全国性的住房#短缺#。

▶ A lot of places in the country just don't have enough housing for people and all of the areas around metropolitan areas like Washington for example are very built up and so you are having to build farther and farther out and that's where it is.

全国很多地区住房供应不足，像华盛顿这样的大都市周边都已高度开发，不得不向越来越远的郊区扩展。

▶ And just a quick follow up.

请允许我快速追问。

 00:45:12

▶ During the last SEP or the press conference following the last SEP you seem to indicate that policymakers lack conviction about their projections and I'm wondering if you still feel that way.

在上次《经济预测摘要》或其后新闻发布会中，您似乎暗示政策制定者对其预测缺乏信心，请问您现在是否仍持这种看法？

▶ Forecasting is very difficult even in placid times and as I've mentioned before forecasters are a humble lot with much to be humble about.

即便在#平稳#时期预测也极为困难——如我之前所言，预测者都是#谦逊#的群体，有太多需要#保持谦逊#的理由。

🎤 So I think right now is a particularly challenging time even more uncertain than usual and so I don't know any forecaster anywhere really ask any of the forecasters whether they have great confidence in their forecast right now I think they'll honestly say no.

当前尤其充满挑战，比往常更不确定。若问任何预测者是否对当前预测充满信心，我想他们都会坦诚地说“不”。

 00:45:54

🎤 Jennifer.

詹妮弗。

🎤 Thank you Chair Powell Jennifer Sean burger with Yahoo Finance.

谢谢鲍威尔主席，我是#雅虎#财经的詹妮弗·肖恩·伯杰。

🎤 If your cutting rates why continue to reduce the size of your balance sheet then pause the unwinding?

既然正在降息，为何继续缩减资产负债表规模后又暂停缩表？

🎤 Well I think we're you know we're cutting the size of our balance sheet quite marginally now as you know with the balance sheet where we're still in abundant reserves condition and we've said that we would stop somewhat above a somewhat above an ample reserves level that's what we are and we're you know we're getting closer to that we're monitoring it very carefully we don't think that that has at all significant macroeconomic effects these are pretty small numbers moving around inside a giant economy you know the number the level of runoff is not not very large so I wouldn't attribute macroeconomic consequences to that at this point.

当前资产负债表缩减幅度非常小——我们仍处于准备金充裕状态，且已明确会在略高于充足准备金水平时停止缩表。我们正密切关注进展并逐步接近该目标，但这些微小变动对巨型经济体而言不具有显著宏观经济影响——缩表规模本身就不大，目前我不会将其与宏观经济后果相关联。

 00:46:49

🎤 And at his recent confirmation hearing Stephen Myron brought up that the Fed actually has three mandates from Congress not just jobs and stable crisis but also moderate long term interest rates.

斯蒂芬·米伦在近期确认听证会上指出，美联储实际上肩负国会赋予的三重使命——不仅是就业和稳定物价（口误），还包括维持适度长期利率。

▶ So what does Congress mean by moderate long term interest rates how should we understand that when we see the 10 year treasury moving and how do you think about this part of the mandate when policy choices like rate cuts or balance sheet reductions affect the long end of the yield curve.

国会所谓"适度长期利率"具体何指？当10年期国债利率波动时该如何理解？当降息或缩表等政策选择影响收益率曲线长端时，您如何考量这项使命？

▶ So we always think of it as the dual mandate maximum employment price stability for a long time because we think moderate long term interest rates are something that will result from stable inflation low and stable inflation and maximum employment.

我们长期将其视为双重使命——最大就业和价格稳定，因为适度的长期利率实际上是低而稳定的通胀与最大就业自然产生的结果。

 00:47:34

▶ So we don't we don't have we haven't thought about that as for a very long time as a third mandate that requires independent action so that's where that is and there's no there's no thought of as far as I'm concerned there's no thought of considering that you know considering that we somehow incorporate that in as something in a different way.

因此我们长期以来从未将其视为需要独立行动的第三项使命，这就是当前立场——至少在我看来，完全没有考虑过以其他方式将其纳入政策体系。

▶ Thanks Chair Powell.

谢谢鲍威尔主席。

▶ Maddiegan from CNN.

我是CNN的Maddiegan。

 00:48:05

▶ We recently learned that average FICO credit scores are down this year by two points the most since 2009 during the Great Recession and delinquencies are high for car loans, personal loans, credit cards.

近期数据显示今年平均FICO信用评级下降2分（2009年大衰退以来最大跌幅），同时汽车贷款、个人贷款和信用卡的#违约#率均处于高位。

▶ How concerned if at all are you about the health of consumer finances and do you expect today's cut will help?

您对消费者财务状况有何担忧？是否预期今日降息将产生助益？

▶ So you know we're aware of that I think this default rates have been kind of ticking up and we do watch that.

我们确实注意到#违约#率有所上升并持续关注。

 00:48:35

▶ They're not at a level I don't believe they're at a level or overall they're you know terribly concerning but it is something that we watch.

目前整体未达到令人严重忧虑的程度，但这仍是我们监控的指标。

▶ You know lower rates should support economic activity I don't know that one rate cut will have you know a visible effect on that but over time you know a strong economy with a strong labor market is what we're what we're aiming for and stable and stable prices so that should help.

降息应能支撑经济活动——单次降息未必立竿见影，但长期而言，我们追求的是强劲经济与劳动力市场以及物价稳定，这终将见效。

▶ Just a follow up of this rate cut is coming at a time when the stock market is at or near all time highs and some valuation metrics are elevated historically.

追问：此次降息正值股市处于或接近历史高点，部分估值指标处于历史高位。

 00:49:10

▶ Is there a risk that cutting rates could overheat financial markets potentially fueling a bubble?

降息会否导致金融市场过热甚至催生泡沫？

▶ You know we we're tightly focused on our goals right and our goals are maximum employment and price stability and so we take the actions that we take with an eye on on

those goals separately and that's why we did what we did today separately we monitor financial stability very very carefully and you know I would say it's it's a mixed picture but households are in good shape banks are in good shape overall households are still in good shape in the aggregate and I know that people to lower end of the income spectrum are under pressure obviously but from a financial stability perspective we monitor that picture we don't have a view that there's a right or wrong level of asset prices for any particular financial asset but we monitor the whole the whole picture really looking for structural vulnerabilities and I would say those are not elevated right now.

我们严格聚焦最大就业与物价稳定两大目标，今日行动正是基于对这两个目标的分别考量。同时我们极其审慎地监控金融稳定性——当前情况喜忧参半：家庭与银行部门整体健康，尽管低收入群体承压。我们不对特定资产价格水平做价值判断，而是全面监测寻找结构性脆弱点，目前这些风险并未升高。

▶ Jean what are you for the last question?

#吉恩#，最后一个问题交给你。

 00:50:16

▶ Hi Chair Powell Jean young with M&I Market News.

鲍威尔主席您好，我是M&I市场新闻的#吉恩#·杨。

▶ I wanted to ask about inflation expectations.

我想请教关于#通胀#预期的问题。

▶ You've said the Fed can't take the stability of inflation expectations for granted.

您曾表示美联储不能将通胀预期的#稳定性#视为理所当然。

▶ You mentioned at the short run they've gone up a little bit I wonder if you can talk a bit about that.

您提到短期预期略有上升，能否具体阐述？

▶ And then also at the long run I'm wondering do you see evidence that the debate over Fed independence and the growing deficit is putting pressure on inflation expectations?

另外关于长期预期，您是否发现有关美联储独立性与赤字增长的争论正在施压通胀预期？

 00:50:44

▶ So as you said shorter term inflation expectations have tended to respond to near term inflation.

如您所言，短期#通胀#预期往往对近期通胀数据作出反应。

▶ So if inflation goes up inflation expectations will predict that it takes just a little while to get back down.

若通胀上升，预期会显示需要时间才能回落。

▶ Fortunately throughout this this period longer term inflation expectations both both break even in the markets and almost all of the longer term surveys.

#所幸#在此期间，无论是市场盈亏平衡指标还是绝大多数长期调查都显示...

 00:51:08

▶ Michigan being a bit of an outlier lately have been just rock solid in terms of you know running at levels that are consistent with 2% inflation over time.

长期通胀预期始终稳固（虽密歇根大学调查近期略有偏离），持续处于与2%通胀目标相符的水平。

▶ So we don't take that for granted.

因此我们不会对此掉以轻心。

▶ We actually assume that our actions have a real effect on that and that we need to continually show and also mention discuss our commitment to 2% inflation.

我们坚信自身行动能切实影响预期，需要持续展现并讨论对2%通胀目标的承诺。

 00:51:35

▶ And so you'll hear us doing that.

各位将持续听到我们重申这一点。

▶ But you know that we're as I mentioned it's a difficult situation because we have we have risks that are both affecting the labor market and inflation.

但正如所言，当前形势复杂：我们同时面临影响劳动力市场与通胀的双重风险。

⏮ Those are two goals and so we have to balance those two when they're both at risk we have to balance them and that's really what we're trying to do.

这两大目标需要平衡——当两者同时面临风险时，我们必须进行权衡，这正是我们当前努力的方向。

bilibili 00:51:54

⏮ I don't you're a latter latter part of your question was about independence.

您问题的后半部分涉及独立性。

⏮ You know I don't I don't see market participants.

目前我未观察到市场参与者...

⏮ I don't see if that's something they're factoring in right now in terms of setting interest rates.

未发现他们在利率定价中纳入相关考量。

⏮ Thanks very much.

非常感谢。
